THE COURT: Great. Thank you. I can hear you so much better. Thanks. THE WITNESS: Thank you. BY MR. HUSHKA: Q What did you do after graduation from NDSU? A I moved to Colorado and worked for an engineering firm
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	PROCEEDINGS THE COURT: We are back on the record with bankruptcy Case Number 25-30004, The Ruins LLC. And when we broke, the parties had presented testimony and argument, some argument on whether the Court should find cause to dismiss or convert. During that hearing, I advised the court that under the statute I must also consider unusual circumstances if that's presented. And so the parties requested an opportunity to provide some additional evidence, which I am happy to grant. So it's your motion, Red River State Bank. You may proceed with calling your next witness. MR. HUSHKA: Thank you, Your Honor. We would call Mr. Matthew Gehrtz. THE COURT: Please state your name for the record. MR. GEHRTZ: Matthew Gehrtz. THE COURT: Do you solemnly swear that the testimony you are about to give in this case will be the truth, the whole truth, and nothing but the truth, so help you God? MR. GEHRTZ: (indiscernible).	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A After graduation I went to NDSU and attended civil engineering school from 2007 through 2011. Q Did you graduate in 2011? A I did, yes. Q And what was your major? A Civil engineering with an emphasis in structural. Q What did you THE COURT: I'm going to have you speak up just a little bit. THE WITNESS: Sorry. THE COURT: And repeat what your degree was in because I didn't catch it. THE WITNESS: My degree was in civil engineering with an emphasis in structural engineering. THE COURT: Great. Thank you. I can hear you so much better. Thanks. THE WITNESS: Thank you. BY MR. HUSHKA: Q What did you do after graduation from NDSU? A I moved to Colorado and worked for an engineering firm for approximately four years. Just over four years.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	PROCEEDINGS THE COURT: We are back on the record with bankruptcy Case Number 25-30004, The Ruins LLC. 1	master's in business administration with an emphasis in	1	power lines and substations and things of that nature.
2	finance.	2	Q And that was four years of your employment there?>
3	Q When did you receive that degree?	3	A Correct, yes.
4	A It was approximately I believe it was around 2018 or	4	Q When did your employment with Black & Veatch end?
5	so.	5	A I finished with Black & Veatch in 2015. And then moved
6	Q Do you hold any professional certificates, licenses or	6	back here to Fargo and started work with Gehrtz Construction
7	credentials?	7	Services in 2016.
8	A I do. I am a professional engineer in the state of	8	Q So is that why you left Black & Veatch?
9	Wyoming.	9	A It was, yes.
10	Q And what are the requirements to be licensed as a	10	
11	professional engineer by Wyoming?	11	
1	A You have to work under a professional engineer for four	12	
13	years or more. And then you have to take a licensure test,	13	
14	pass it, obviously, and then receive your licensure.	14	
15	Q Okay. I can assume that you passed then?	15	
16	A I did, yes.	16	
	•	l	
17	Q Have you ever bene subject to any disciplinary	17	management firm. We specialize in project management and
18	proceedings related to that license?	18	
19	A No.	19	
20	Q Have you ever been subject to any disciplinary	20	
21	proceedings related to any court or administrative	21	be budget creation, estimation on the front end of a
22	proceeding?	22	project, bid and scope developments that we can bid out a
23	A No.	23	job and price it out, work on subcontracts. So we really
24	Q You briefly touched on your work history. I want to	24	handle all of the construction-related activities from start
25	talk about that a little bit more. You said you were	25	to finish throughout the entire course of a construction

It was the designation I have until I have my professional licensure. So I was an engineer that was working underneath a professional engineer at that time. Q What were your job responsibilities for them? A My job responsibilities primarily were specific	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	project without actually self-performing any of the work. So our primary responsibility is management, oversight, and quality control. Q So you're not doing the construction, but you're overseeing the construction. Is that a fair A That's correct, yes. Q Okay. What is your title with Gehrtz Construction? A Currently principal construction manager. Q Okay. Looking at the Gehrtz Construction website, it looks like you kind of have services broken down into preconstruction and then the construction phase. Is that an accurate description? A That is accurate, yes. Q Okay. What are the pre-construction phase or design phase services offered? A Pre-construction services would be estimating. As a drawing set is developed with an architect, we'll create budgets to identify a cost of a potential project. And as the drawings further develop, we'll do schematic design, design development and construction documents, estimates so we can see how the budget is progressing as the design is
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	working on receiving your MBA. Is that correct? A That's correct, yes. Q What was the name of that employer? A Black & Veatch. Q What does Black & Veatch do? A They are a municipal engineering firm that specializes in power transmission and infrastructure design and construction. Q Approximately how many employees? A It's a large company. I think it's approximately it's I want to say it's more than 10,000. I don't know that for sure. But it's a large and it's a global company. Q Okay. What was your position or job title with Black & Veatch? A My position was civil engineer. And at that time it was engineering training. It was the designation I have until I have my professional licensure. So I was an engineer that was working underneath a professional engineer at that time. Q What were your job responsibilities for them? A My job responsibilities primarily were specific doing the design and the calculations for the particular	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	project without actually self-performing any of the work. So our primary responsibility is management, oversight, and quality control. Q So you're not doing the construction, but you're overseeing the construction. Is that a fair A That's correct, yes. Q Okay. What is your title with Gehrtz Construction? A Currently principal construction manager. Q Okay. Looking at the Gehrtz Construction website, it looks like you kind of have services broken down into preconstruction and then the construction phase. Is that an accurate description? A That is accurate, yes. Q Okay. What are the pre-construction phase or design phase services offered? A Pre-construction services would be estimating. As a drawing set is developed with an architect, we'll create budgets to identify a cost of a potential project. And as the drawings further develop, we'll do schematic design, design development and construction documents, estimates so we can see how the budget is progressing as the design is progressing. Once it is complete, then we'll put together
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	working on receiving your MBA. Is that correct? A That's correct, yes. Q What was the name of that employer? A Black & Veatch. Q What does Black & Veatch do? A They are a municipal engineering firm that specializes in power transmission and infrastructure design and construction. Q Approximately how many employees? A It's a large company. I think it's approximately it's I want to say it's more than 10,000. I don't know that for sure. But it's a large and it's a global company. Q Okay. 	Document Page 5 o	f 10	08
	Page 14		Page 16
1	two, three, four bidders in every bid package so that we	1	subcontracts for any trade that's on the site. We would
2	ensure competitiveness. Once we receive all those bids and	2	also be doing budget and cost management throughout the
3	we qualify the bids, make sure that there isn't anything	3	course of construction. Anything related to the contractual
4	that's missing from bidder A to bidder B to bidder C, we'll	4	side of things we would provide in the course of a
5	qualify the bidders to make sure that they can complete the	5	construction project under that scope of work.
6	work on time, they can complete it within the schedule that	6	Q I took a peek at the Gehrtz Construction Services
7	we need them to complete and that they have the manpower to	7	website and I found 32 different construction administration
8	do the job that needs to be done.	8	services. I don't want to belabor it for the Court, but can
9	So once that's all completed, then we'll put that	9	you identify if there's any of those 32 services that would
10	together as a package and review it with the owner or the	10	be particularly relevant to what you were asked to look into
11	stakeholders, whoever that particular case. And that	11	for The Ruins?
12	essentially concludes the pre-construction portion of a	12	A Can you list a few that you see on there?
13	project.	13	Q I'll have to
14	Q Are you personally familiar and experienced with all	14	A Just so that I don't belabor as well.
15	those pre-construction services?	15	Q I guess what construction services are particularly
16	A Yes, I am.	16	relevant for The Ruins in what you were asked to do if
17	Q Okay. Approximately how many projects, if you even	17	anything.
18	have a rough ballpark, have you provided pre-construction	18	A I would say quality control, site management, budget
19	services for?	19	control, budget estimating. I would say site inspections,
20	A Oh, it's been I would say more than 50. I mean, quite	20	documentation, punch listing. A lot of those items and
21	a few. Every single project we deal with typically we're	21	activities would be pertinent to this scenario.
22	involved in pre-construction in some manner.	22	Q Are you personally familiar with all those services?
23	Q And what types of projects would these all be?	23	A Yes, I am.
24	A It ranges from industrial to education to religious to	24	Q Can you explain your personal familiarity or experience
25	mixed use. It spans pretty much every industry. I mean,	25	with those services?
	Page 15		Page 17
1	there isn't anything that we wouldn't necessarily do from a	1	A on this particular project or in general?
2	construction management standpoint.	2	Q Just in general for your background.
3	Q You mentioned mixed use. Is that what you consider The	3	Q Okay. In general, I mean, my role as a construction
4	Ruins development to be?	4	manager if I'm on a particular project, I will be receiving
5	A I would, yeah.	5	pay requests from all the subcontractors. I'll review the
6	Q Okay. So you're familiar with mixed use development?	6	pay request, make sure that it's complete, make sure the
7	A Yes, I am.	7	work that they're requesting payment for has actually been
8	Q From both a pre-planning and a construction aspect?	8	completed on the site. I'll also verify if they're complete
9	A Yes, correct.	9	and accurate from a documentation standpoint, reviewing that
10	Q All right. Were any of these services that you just	10	the contract total and the initial total is correct, any
11	kind of discussed relevant particularly relevant to what	11	change orders are correct and the process or the progress
12	you've been asked for to look at with respect to The Ruins?	12	is shown accurately on the pay request and approve it.
13	A I would say yes in the respect that we need to have a	13	In addition to that, to supplement that we'll do site
14	fairly good understanding of what typically falls within	14	visits and if we're not already on site to validate that
15	certain subcontractors' responsibilities. So having that	15	work is complete, we'll provide photos and documentation to
16	knowledge would help me base my assumptions on where I came	16	support the pay request to ensure the work that's being
17	to from the reporting standpoint.	17	requested for payment is actually being completed so that
18	Q Does Gehrtz Construction also provide construction	18	it's not billing ahead of where progress is actually at.
19	phase services?	19	Q You said your current position with Gehrtz Construction
20	A We do, yes.	20	was what again? Sorry.
21	Q Okay. Construction administrative services?	21	A Principal construction manager.
22	A We do, yes.	22	Q And what are your job duties and responsibilities,
23	Q Can you define that term for the Court?	23	anything that we haven't already discussed?
24	A Construction administration services would be anything	24	A In addition to the project-related duties, there's also
25	that relates to contractual documents, putting together	25	business-related duties as a principal construction manager,

_	Document Page 6 o	f 10)8
	Page 18		Page 20
1	but I don't know if that pertains necessarily to this.	1	Q When did you first learn about The Ruins matter?
2	Q Fair enough. I want to talk about whether or not	2	A Red River State Bank had contacted Gehertz Construction
3	you've provided expert services before. Have you ever	3	at or around late March, early April of 2024 in regards to
4	testified as an expert in a prior lawsuit or arbitration or	4	the case.
5	anything of that nature?	5	Q You said Red River State Bank. Who at the bank?
6	A I have not.	6	A Charlie Aarstad, Charles Aarstad.
7	Q Okay. Have you ever provided expert services for an	7	Q You said that was in twenty
8	entity before?	8	A It was in 2024. I believe it was late March, early
9	A In a legal context?	9	April timeframe. I don't recall the exact date on when the
10	Q Well just as have you ever been retained by a third	10	call happened or the when the contact happened.
11	party kind of after the fact to come in and take a look at a	11	Q Okay. What was the nature of that contact? Was he
12	project?	12	reaching out to request something or discuss it, or how did
13	A Yes, we have.	13	this kind of start for you?
14	Q What kind of services do you provide in those	14	A The context of the call was to retain us to do a site
15	circumstances?	15	inspection for the particular project at hand.
16	A It would be similar to this in the respect of a third-	16	Q Okay. Were you ever formally retained then?
17	party site inspection to validate construction is where it	17	A We were, yes.
18	says it is. Typically those are for a bank as a third party	18	Q Okay. And who retained you?
19	inspection to validate pay requests prior to paying	19	A Red River State Bank.
20	subcontractors.	20	Q Were you formally retained around that same time period
21	Q Do you have an approximation of how many times you've	21	you were talking about or
22	provided those types of services?	22	A I believe we had a proposal that was dated April 4th I
23	A More than a dozen. I don't have a specific number for	23	believe. And on that proposal we gave two different
24	that, but numerous times.	24	options, one to do a full and complete punch list type
25	Q And you said normally these are provided for banks.		report and a second option to do more of a cursory overview
	<u> </u>	23	· · · · · · · · · · · · · · · · · · ·

	Page 22		Page 24
1	MR. VERSTANDIG: Thank you	1	determine what that number actually is. I don't know for
2	VOIR DIRE EXAMINATION OF MATTHEW GEHRTZ	2	sure if it's north of a million dollars. That seems high to
3	BY MR. VERSTANDIG:	3	me if the total cost of construction is around \$1.7 million
4	Q Mr. Gehrtz, are you aware of the relief that is being	4	in our estimation.
5	sought by Red River State Bank at this hearing?	5	Q And then six to eight percent of a number north of \$1
6	A Can you expand on the explanation of what that is?	6	million. Yeah.
7	Q Sure. Do you know what it is that Red River State Bank	7	A That would be correct. Yeah. Sorry.
8	is asking the Court to order at the end of this hearing?	8	Q We can agree 1.7 is north of a million, right? And you
9	A I believe I do.	9	do own part of the company, correct?
10	Q Okay. Could you share what that is?	10	A Correct.
11	A I believe that it is the position of the bank to put it	11	Q Okay. so you do stand to economically benefit if the
12	into bankruptcy. I guess I'm sorry, I don't know the	12	bank is given control of this project and Gehrtz is then
13	terminology behind that.	13	hired to finish the work, right?
14	Q That's quite all right. Is it your understanding that	14	A That would be correct.
15	the bank would like to gain possession of The Ruins project	15	Q Okay. Have you ever been denied qualification as an
16	for some combination of events that may follow this hearing?	16	expert witness in any arbitration, state court, federal
17	A I don't know that for sure. I haven't had those	17	court, foreign court, native American court, moot court?
18	specific discussions with them.	18	Any court?
19	Q Okay. Have you ever talked to the bank or any officer	19	A No, I have not.
20	or agent of the bank, Mr. Aarestad or anyone else, about	20	Q Okay.
21	whether or not Gehrtz Construction would be hired to do work	21	MR. VERSTANDIG: Your Honor, we would object on
22	if the bank were to take over The Ruins project?	22	the limited basis that it appears the witness is
23	A We haven't specifically talked to that to my memory.	23	economically incentivized based upon the testimony offered
24	Certainly not in any official capacity.	24	today. We don't object to his qualifications . He seems to
25	Q Well, would there have been any unofficial discussions	25	be very well-qualified. And it would be the monetary
	Page 23		Page 25
1	about what a good job you can do once it's in your hands?	1	component that is problematic.
2	A I guess not specifically, but personally I naturally	2	THE COURT: I am going to overrule because your
3	just go to as a business owner what it might look like. But	3	concerns relate to the weight of the testimony rather than
4	there's been no formal discussion or informal discussion	4	the admissibility.
5	about taking the project over.	5	MR. VERSTANDIG: Thank you, Your Honor.
6	Q Okay. The report you put together does include some	6	THE COURT: Approved as an expert. And you may
	fees that would be charged if Gehrtz were to do work,	7	proceed.
8	correct?	8	MR. HUSHKA: All right. Thank you, Your Honor.
9	A The fees would be included if anybody were to complete	9	RESUMED DIRECT EXAMINATION OF MATTHEW GEHRTZ
	the project. So if it's in the capacity of a third party,	10	BY MR. HUSHKA:
11	someone would need to be paid to finish the project I guess	11	Q I guess maybe just put a button on what Mr. VerStandig
	is kind of how my perspective is on that, whether it's us or	12	asked you, Mr. Gehrtz. You have not been asked to complete
	it's a third party.	13	construction in this project, have you?
	Q Without getting into what I'm sure Mr. Hushka is going	14	
	to ask you about in some detail, broadly speaking if Gehrtz	15	Q And you haven't had any formal or informal discussions
17	were to take over this project, approximately how much would	16	
1	were to take over this project, approximately how much would it stand to make in fees?	17	whether you'd even be available to take over this project?
	were to take over this project, approximately how much would it stand to make in fees? A It's anywhere between six and eight percent is	17 18	whether you'd even be available to take over this project? A Correct.
19	were to take over this project, approximately how much would it stand to make in fees? A It's anywhere between six and eight percent is typically what we would charge on a project as a	17 18 19	whether you'd even be available to take over this project? A Correct. Q Okay. Mr. Gehrtz, I want to get to your expert
19 20	were to take over this project, approximately how much would it stand to make in fees? A It's anywhere between six and eight percent is typically what we would charge on a project as a construction manager.	17 18 19 20	whether you'd even be available to take over this project? A Correct. Q Okay. Mr. Gehrtz, I want to get to your expert opinions then since we have you qualified.
19 20 21	were to take over this project, approximately how much would it stand to make in fees? A It's anywhere between six and eight percent is typically what we would charge on a project as a construction manager. Q So I want to be careful not to ask you the cost of	17 18 19 20 21	whether you'd even be available to take over this project? A Correct. Q Okay. Mr. Gehrtz, I want to get to your expert opinions then since we have you qualified. MR. HUSHKA: And if I could have the Court pull up
19 20 21 22	were to take over this project, approximately how much would it stand to make in fees? A It's anywhere between six and eight percent is typically what we would charge on a project as a construction manager. Q So I want to be careful not to ask you the cost of completion because I, you know, object to that. But six to	17 18 19 20 21 22	whether you'd even be available to take over this project? A Correct. Q Okay. Mr. Gehrtz, I want to get to your expert opinions then since we have you qualified. MR. HUSHKA: And if I could have the Court pull up ECF 60-1, Exhibit A.
19 20 21 22 23	were to take over this project, approximately how much would it stand to make in fees? A It's anywhere between six and eight percent is typically what we would charge on a project as a construction manager. Q So I want to be careful not to ask you the cost of completion because I, you know, object to that. But six to eight percent of a number that's likely north of a million	17 18 19 20 21 22 23	whether you'd even be available to take over this project? A Correct. Q Okay. Mr. Gehrtz, I want to get to your expert opinions then since we have you qualified. MR. HUSHKA: And if I could have the Court pull up ECF 60-1, Exhibit A. BY MR. HUSHKA:
19 20 21 22 23 24	were to take over this project, approximately how much would it stand to make in fees? A It's anywhere between six and eight percent is typically what we would charge on a project as a construction manager. Q So I want to be careful not to ask you the cost of completion because I, you know, object to that. But six to	17 18 19 20 21 22 23 24	whether you'd even be available to take over this project? A Correct. Q Okay. Mr. Gehrtz, I want to get to your expert opinions then since we have you qualified. MR. HUSHKA: And if I could have the Court pull up ECF 60-1, Exhibit A.

		Document Page 8 o	f 10	08
		Page 26		Page 28
1	A	I can see it.	1	we used the same essentially schedule values on the sworn
2	Q	Okay. Do you recognize that document?	2	construction statement for each individual bid packages. So
3	A	I do, yeah.	3	we made assumptions on what might be contained in each one
4	Q	What is that document?	4	of those particular packages to arrive at our estimated
5	A	This was our initial report that we were hired to	5	percentage complete.
6	cor	mplete for the project.	6	Q When you say sworn construction statement, was that a
7	Q	If we scroll to the next page, at the very bottom of	7	document?
8		at's been designated page one on the report, do you see a	8	A That was a document, yes.
9	_	nature?	9	Q Was that a document to the best of your knowledge that
10	A	I do.	10	was provided by Craig Development or Craig Holdings or some
11	Q	Is that your signature?	11	Craig entity?
12	A	Yes, it is.	12	A That's my understanding.
13	Q	By signing this document, are you attesting to the	13	Q And then what was all depicted in that document?
14		inions that are expressed in this report?	14	A It had a list of the subcontracts line by line of like
15	A	Yes.	15	it would be waterproofing and it would be CMU block and
16	Q	Okay. To form the opinions in this report, did you	16	it would be general work and labor, carpentry. Items like
17	ma	ke any observations?	17	that that, that if you continue going down the report, that
18	A	We did.	18	table of contents is laid out in that same structure.
19	Q	What observations did you undertake?	19	Q So essentially you took the format that had been
20	A	We made visual observations as we completed our site	20	provided by the Craig entities and you used that to adapt
21	ins	pection.	21	your report?
22	Q	Site inspection of what?	22	A Correct. Yeah.
23	A	Of The Ruins project.	23	Q Okay. Can you describe for me briefly and we'll get
24	Q	Okay. Down in Watertown, South Dakota?	24	into it a little bit more obviously as we go. But just kind
25	A	Correct.	25	of give an overview of your process of how you reached the
		Page 27		Page 29
1	Q	When you say a site inspection, you went down	1	opinions that you expressed in this report.
2	per	sonally and walked around and checked everything out?	2	A Initially doing the site visit, we tried to take as
3	A	Correct. We went down. We completed an inspection.	3	many photos and tried to organize a structure that made
4	It to	ook approximately the entire day to walk through the	4	sense as we walked through the building. We didn't have an
5	ent	ire building. And we photo documented everything that we	5	accurate floor plan at that time, so we made some
6	saw	v and we prepared this report, which I think is fairly	6	assumptions on which room numbers were associated with which
7	len	gthy.	7	rooms. We structured a folder system within our we have
8	Q	You said you took photos?	8	a software, an online software that we use. So we take a
9	A	We did, yes.	9	photo and it automatically puts it on the software. So it
10	Q	Any approximation of how many photos?	10	helps organize all of the documentation. So we organized.
11		I would have to say more than a thousand. I don't know	11	Each room had its own folder. And so then we had photos
12	an o	exact number, but a lot of photos.	12	that are associated with each room. And then as we were
13	Q	Okay. Are there photos in this report?	13	taking photos, we assigned what we assumed would be a
14	A	There are, yes.	14	particular trace that would be responsible for completing
15	Q	Do those photos truly and accurately depict and	15	that particular task.
16	rep	resent what you observed during your site inspection?	16	So the way that we view it as a construction manager,
17	A	Yes, they do.	17	it was essentially a punch list, which is a list of things
18	Q	Did you make any assumptions in drafting this report?	18	that needed to be complete. And then in order for a punch
19	A	We did, yeah.	19	list to be effective, you need to assign a subcontractor or
20	Q	What were some of those assumptions?	20	a bid package that needs to be responsible to complete that
21	A	Some of the assumptions that we had to make were what	21	package. And so that's how we've structured and assigned
22	sco	pes of work contained in each of the particular bid	22	what we felt if a typical scope of work is X for a
23	-	kages that would be on the sworn construction statement.	23	subcontract and we in our observations felt that it was 80
24		at was basically the document that helped us formulate the	24	percent complete, that's kind of how we've established our
25	tab	le of contents and the structure for this report, is that	25	report structure.

Page 9 of 108

- 1 Q Sir, you used the pronoun we a number of times in that.
- 2 Are you speaking in the royal we, or was there a team that
- went with you down to the site?
- For this initial site, I had a team of three
- 5 individuals plus myself just due to the essence of trying to
- complete the entire report. And then I put together the
- report personally and compiled everything. So I had a team
- helping me take all the photos and organize things. But
- then I personally put the report together myself.
- Okay. So you were the leader of the team? 10
- 11 A Yes, I was.
- 12 Q Okay. Is it typical in the construction industry for a
- project of this size for an inspection to use a team of that
- 14 nature?
- 15 I would say yes.
- Are you confident in your team that they took true and
- accurate renderings and pictures and observations? 17
- 18 A Absolutely, yes.
- Is there anything that you believe you didn't 19 0
- personally observe that could have affected or misconstrued
- 21 your opinions in this case?
- 22 A No.
- 23 MR. HUSHKA: All right. If the Court can proceed
- 24 to the next page of the report.
- 25 BY MR. HUSHKA:

- 1 Q And did you form an opinion for how much of this work
- 2 had been finished as of the time of your inspection?
- We did, yeah.
- And I guess to circle back around, I don't know if we
- 5 have it in yet. But when did you inspect The Ruins on this
- first initial inspection?
- I think if you scroll up on the document, I believe
- that it was April 17th of 2024 is when we were on site for
- the particular visit.
- And are you aware if there's been any additional 10
- 11 construction done to the project since that April 17th, 2024
- 12
- We performed a follow-up inspection in September of 13
- 2024 to determine if any significant work had been 14
- completed. And we observed that there was no significant --
- and I believe there's additional exhibits of that. And then
- 17 we did a third visit to determine what is the cost to
- complete in addition to see if any additional work had been 18
- 19 completed.
- 20 So am I to understand that the report that we're going
- 21 to go through and the percentage complete is still what you
- 22 understand the status of The Ruins today?
- 23 I would say yes.
- 24 MR. HUSHKA: Let me go back down to the actual
- 25 opinion section, Sharon. Thank you.

Page 31

- Is this kind of the breakdown that you've discussed or
- briefly referenced before?
- Okay. And this breakdown you indicated was taken from Q
- 5 the sworn construction statement provided?
- 6 A Correct.
- Okay. I understand it may be slightly tedious, but I 7 Q
- 8 think it may be helpful for the Court if the Court will
- allow for us to kind of go through each of these subparts to
- 10 explain and identify the work that has been performed and
- still needs to be performed. Is that something you can
- 12 provide for us?
- 13 A It is.
- All right. We can proceed to the next page of the
- 15 report then. And what is the first category in this report?
- The first category is concrete waterproofing and 16 A
- 17 insulation.
- 18 O What is that?
- So our assumption would be that concrete waterproofing
- 20 was not observable because it was for foundation. However,
- 21 insulation, we felt like that was building envelope and
- 22 insulation within the walls of the building. In addition to
- 23 that, basically sealing up any penetration on the exterior
- of the building would be how I view insulation. That's why
- we categorized that under this particular line item.

- 1 BY MR. HUSHKA:
- What was the opinion for the percentage complete of
- concrete and waterproofing?
- 4 So my assumption was that the entire building envelope
- insulation was completed, obviously because it's behind
- sheetrock and vapor barrier. However, it appeared that
- 7 there was insulation missing around the A/C sleeves, which
- is the air conditioning sleeve, and louvers and other
- miscellaneous penetrations through the building which in my
- experience would typically fall under the insulation scope
- 11
- 12 Were those just things that hadn't been completed or
- were those deficiencies with what had been done? 13
- Most of what I observed was yet to be complete. But it
- did appear that there were some deficiencies with spray 15
- foam. Overspray under the brick. Just minor things that
- 17 just needed to be corrected.
- And you said those would need to be corrected. They're
- not something that could just kind of be ignored?
- 20 In my opinion they should be corrected.
- 21 Okay. What would be required to complete the -- to
- correct those from a cost and materials or labor standpoint? 22
- I think cost and materials is fairly minor. And I 23
- think maybe two to three days of work for this particular
- package would complete.

	Document Page 10 o		.00
	Page 34		Page 36
1	Q That would be two or three additional days to	1	Q I didn't ask for the previous one, but for the concrete
2	construction is one and then the remediation would be an	2	waterproofing and insulation, what kind of crew would be
3	additional two or three days?	3	used to both finish that or remediate the deficiencies that
4	A For this particular package, remediation is maybe a	4	we talked about?
5	day. Not a significant one on this particular one.	5	A Typically I would see an insulation subcontractor that
6	Q Fair enough. If I can direct your attention to the	6	would be involved with that particular package.
7	bottom of page 3. Do you see a section titled gypcrete?	7	Q If we can proceed to the next page. There's a category
8	A Yes.	8	entitled CMU block. Can you explain for the Court what that
9	Q What is gypcrete?	9	is?
10	A Gypcrete is a subfloor overlay. It's typically	10	THE COURT: Can I interrupt with a question?
11	installed for minimizing sound transfer between floors in	11	MR. HUSHKA: Certainly.
12	residential application. It also provides a level of fire	12	THE COURT: When you're soliciting information
13	rating to the floor system.	13	about what type of subcontractor would be needed to do the
14	Q How much of that work had been completed?	14	repair, is that also included in part of this report or are
15	A We observed that all the gypcrete had been placed and	15	you providing additional information to me that's not in a
16	completed. So our assumption was that it's 99 percent	16	report?
17	complete. Very minor items that needed to be addressed.	17	MR. HUSHKA: That's not in the report.
18	Q You said some items that needed to be addressed though?	18	THE COURT: Thank you. Okay.
19	A We observed that there were some bubbling on the	19	BY MR. HUSHKA:
20	surface of the gypcrete. We also observed, as you can see	20	Q So the question was, the next section is CMU block; can
21	in the photo to the right, that there in some areas must	21	you explain for the Court what that category is or what was
22	have been a hole in the substrate which would allow some of	22	assessed?
23	the gypcrete to drip down through until it got hard enough	23	A CMU block is concrete masonry unit. And as you can see
24	to set up. They are fairly minor deficiencies, but I feel	24	in the photos, it appears that the entire first floor
25	like they might have been an issue when placing flooring on	25	exterior was concrete masonry unit. And so one of the

A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be.	2 3 4 5 6 7 8 9 10 11 12	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor.
2 3 4 5 6 7 8 9 10 11 12 13	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work	2 3 4 5 6 7 8 9 10	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion?
2 3 4 4 5 6 7 8 9 10 11 12 13 14	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally?	2 3 4 5 6 7 8 9 10 11 12 13 14	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion? A They are.
2 3 4 5 6 7 8 9 10 11 12 13 14 15	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor	2 3 4 5 6 7 8 9 10 11 12 13	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion?
2 3 4 5 6 7 8 9 10 11 12 13 14 15	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor to do that trade. And I'm going to get a little bit into	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion? A They are. Q Would those need to be corrected? A Yes.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor to do that trade. And I'm going to get a little bit into the details on this. And the reason why is because if	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion? A They are. Q Would those need to be corrected? A Yes. Q What would need to be done to correct those
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor to do that trade. And I'm going to get a little bit into the details on this. And the reason why is because if what I've seen in the past, if a gypcrete subcontractor is	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion? A They are. Q Would those need to be corrected? A Yes. Q What would need to be done to correct those deficiencies?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor to do that trade. And I'm going to get a little bit into the details on this. And the reason why is because if what I've seen in the past, if a gypcrete subcontractor is requested to do that, it tends to not be corrected in the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion? A They are. Q Would those need to be corrected? A Yes. Q What would need to be done to correct those deficiencies? A In my opinion we would need to have the control joints
2 3 4 5 6 7 8 8 9 10 11 12 13 14 15 16 17 18 19 20	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor to do that trade. And I'm going to get a little bit into the details on this. And the reason why is because if what I've seen in the past, if a gypcrete subcontractor is requested to do that, it tends to not be corrected in the manner that is necessary for a flooring subcontractor to lay	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion? A They are. Q Would those need to be corrected? A Yes. Q What would need to be done to correct those deficiencies? A In my opinion we would need to have the control joints which periodically I would say it's every 20 or so feet
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor to do that trade. And I'm going to get a little bit into the details on this. And the reason why is because if what I've seen in the past, if a gypcrete subcontractor is requested to do that, it tends to not be corrected in the manner that is necessary for a flooring subcontractor to lay floor and glue on there. So we like to have a flooring	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion? A They are. Q Would those need to be corrected? A Yes. Q What would need to be done to correct those deficiencies? A In my opinion we would need to have the control joints which periodically I would say it's every 20 or so feet there should be a joint that allows for building movement
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor to do that trade. And I'm going to get a little bit into the details on this. And the reason why is because if what I've seen in the past, if a gypcrete subcontractor is requested to do that, it tends to not be corrected in the manner that is necessary for a flooring subcontractor to lay floor and glue on there. So we like to have a flooring subcontractor come in, prep the surface that they need to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion? A They are. Q Would those need to be corrected? A Yes. Q What would need to be done to correct those deficiencies? A In my opinion we would need to have the control joints which periodically I would say it's every 20 or so feet there should be a joint that allows for building movement and separation and minor movements to that the block doesn't
2 3 4 4 5 6 7 8 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor to do that trade. And I'm going to get a little bit into the details on this. And the reason why is because if what I've seen in the past, if a gypcrete subcontractor is requested to do that, it tends to not be corrected in the manner that is necessary for a flooring subcontractor to lay floor and glue on there. So we like to have a flooring subcontractor come in, prep the surface that they need to see for their particular materials so that warranties and	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. And so that was our assumption that that spray-applied weather barrier was included within this particular scope of work. And the reason that is important to mention is because we felt like on the exterior where there was not masonry brick installed yet, we could see openings, we could see penetrations through the CMU block, which as you can see in these first few photos showed significant signs of moisture penetration within the building on the first floor. Q Are those deficiencies in your opinion? A They are. Q Would those need to be corrected? A Yes. Q What would need to be done to correct those deficiencies? A In my opinion we would need to have the control joints which periodically I would say it's every 20 or so feet there should be a joint that allows for building movement and separation and minor movements to that the block doesn't crack. All of those would need to be sealed prior to the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	there for adhesive to properly bond to the flooring membrane and things like that. So minor items, but felt like there were deficiencies that needed to be corrected. Q And those again would need to be corrected at some point? A Our opinion would be yes. Q What kind of crew or time and materials are we talking for those remedies? A I would say less than I would say a day per floor to address the gypcrete. So two days total for that. And minor equipment needed for that. Just to sand the floor down essentially what that would be. Q What kind of sub or trade would perform that work generally? A typically what I would see is a flooring subcontractor to do that trade. And I'm going to get a little bit into the details on this. And the reason why is because if what I've seen in the past, if a gypcrete subcontractor is requested to do that, it tends to not be corrected in the manner that is necessary for a flooring subcontractor to lay floor and glue on there. So we like to have a flooring subcontractor come in, prep the surface that they need to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	assumptions we made within this package is that typically you would see the subcontract that is required to install the CMU block also provides a waterproofing membrane on the face of that. A In my opinion we would need to have the control joints which periodically I would say it's every 20 or so feet there should be a joint that allows for building movement and separation and minor movements to that the block doesn't

1 And if there's any gap in the wall, it can't bridge that 2 gap. And so providing some sort of a caulking or a sealant 3 or some sort of item that would fill that gap is important 4 prior to the spray-applied membrane. And so all of that 5 would need to be done. In addition, if you can scroll down 6 just a little bit more on this particular page, we noticed 7 that the first floor, which was a precast plank, extended to 8 the exterior of that wall, which is typical. However, 9 there's numerous gaps in that precast plank that at this 10 point is allowing moisture into the building. So all of 11 that would need to be sealed and it would need to to 12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU 1 Q What is that? 2 rough carpentry labor. Do you see that section? 3 A I do. 4 Q What is that? 5 A This would be the package that typically does the 6 majority of the framing on the building. 4 They would also do the installation of all the 8 windows. They would also do the installation of the Tyve 9 weather barrier on the exterior of the building. And then 10 any other miscellaneous related items such as miscel		Document Page 11 o		.08
2 gap. And so providing some sort of a caulking or a sealant 3 or some sort of item that would fill that up is important 4 prior to the spray-applied membrane. And so all of that 5 would need to be done. In addition, if you can seroll down 6 just a little bit more on this particular page, we noticed 7 that the first floor, which was precast plank, extended to 8 the exterior of that wall, which is typical. However, 9 there's numerous gaps in that precast plank that at this 10 point is allowing moststare into the building. So all of 11 that would need to be sealed and it would need to be either 12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be complete within what we 21 refit was a common space. At that time wed dint have an 22 accurate plan that noted those areas. So our assumption was 11 that the was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU 20 A As we walked through the building, we noted that the 21 penetration and so you can see that we've noted between 22 accurate plan that noted those areas. So our assumption was a pray-applied weather barrier division. So either a 24 masson or a subcontractor that specializes in spray-applied 25 De What crew or crews would be needed to complete the CMU 26 We can scroll to the next page. There's a section 27 the definition of the serior of the page assessed in the median of the first floor for the 28 have a spray-applied weather barrier division. So either a 29 mentation efforts? 30 A I would see a parpa-applied weather barrier di		Page 38		Page 40
3 A I do. 4 prior to the spray-applied membrane. And so all of that 5 would need to be done. In addition, if you can scroll down 6 just a little bit more on this particular page, we noticed 7 that the first floor, which was a precast plank, extended to 8 the exterior of that wall, which is typical. However, 9 there's minerous gaps in that precast plank that at this 10 point is allowing moisture into the building. So all of 11 that would need to be sealed and it would need to be either 12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q and so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 12 felt was a common space. At that time we didn't have an 12 accurate plan that noted those areas. So our assumption was 13 that there was some would be needed to be done on the 14 first floor on the inside of the building. 15 barrier. 1	1	And if there's any gap in the wall, it can't bridge that	1	Q If we can go to the next page, the general W and L
4 Q What is that? 5 would need to be done. In addition, if you can scroll down 6 just a little bit more on this particular page, we noticed 7 that the first floor, which was a precast plank, extended to 8 the exterior of that wall, which is typical. However, 9 there's numerous gaps in that precast plank that at this 10 point is allowing moisture into the building. So all of 11 that would need to be sealed and it would need to be 12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 refit was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a masson or some trades 3 have a spray-applied weather brained wiston. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. Page 39 1 block work plus the remediation work? 2 A That would be typically either a masson or some trades 3 have a spray-applied weather brained wiston. As of you cause that where were worked between 4 mason or a subcontractor that specializes in spray-applied 5 barrier. Q And deficiencies noted as Page 39 1 block work plus the remediation work? 2 A That would be typically either a masson or some trades 4 mason or a subcontractor that specializes in spray-applied 5 barrier. Q And deficiencies noted as Page 39 1 block work plus the remediation work? 2 A That would be repart of the swindow shall and the enti	2	gap. And so providing some sort of a caulking or a sealant	2	rough carpentry labor. Do you see that section?
5 would need to be done. In addition, if you can scroll down 6 just a little bit more on this particular page, we noticed 7 that the first floor, which was a precast plank, extended to 8 the exterior of that wall, which is typical. However, 9 there's numerous gaps in that precast plank that at this 10 point is allowing moisture into the building. So all of 11 that would need to be seaded and it would need to be either 12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 19 first floor that still needed to be completed within what we 20 first floor on the inside of the building. 21 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 2 A I would settimate maybe a week to two weeks depending on 6 the actual scope that's required on the first floor for the 10 CMU. 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 14 A Miscellaneous metals. Can you describe what's 15 assessed in there? 16 A Miscellaneous metals. Can you describe what's 17 of miscellaneous in nature. And we observed that the 18 material was on site but had not been installed yet. 19 Q Any deficiencies noted? 20 A Not for this particular package other than the fact 21 of these windows were in addition to those 12 to 17 22 windows were either broken or missing some sort of glass. 12 to 17 23 windows were either broken or missing some sort of glass. 12 to 17 24 windows were either broken or	3	or some sort of item that would fill that gap is important	3	A I do.
6 majority of the framing on the building, all the wood of the state at the first floor, which was a precast plank, extended to the the exterior of that wall, which is typical. However, 9 there's numerous gaps in that procast plank that at this 10 point is allowing moisture into the building. So all of 11 that would need to be sealed and it would need to be establed and it would need to be sealed and it would need to be either and the sealed have sealed and it would need to be either and the sealed have sealed and it would need to be either and the need to be completed to be completed on the CMU block would still and the need to be completed within what we are accurate plan that noted those areas. So our assumption was a that there is not any gaps in the statill need to be completed within what we are accurate plan that noted those areas. So our assumption as a subtle needed to be completed within what we are accurate plan that noted those areas.	4	prior to the spray-applied membrane. And so all of that	4	Q What is that?
7 that the first floor, which was a precast plank, extended to 8 the exterior of that wall, which is typical. However, 9 there's numerous gaps in that precast plank that at this 10 point is allowing moisture into the building. So all of 11 that would need to be sealed and it would need to be stated and it would need to be sealed and it would need to be installation of all the weather baries of and and the ast stangout near the stangout near the sealed and it wo	5	would need to be done. In addition, if you can scroll down	5	A This would be the package that typically does the
8 the exterior of that wall, which is typical. However, 9 there's numerous gaps in that precast plank that at this 10 point is allowing moisture into the building. So all of 11 that would need to be sealed and it would need to be either 12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU 26 What crew or crews would be needed to complete the CMU 27 block work plus the remediation work? 28 A That would be typically either a mason or some trades 29 have a spray-applied weather barrier division. So either a 20 man and the east elevations of the building. 21 Q How long approximately to finish this or the 22 remediation efforts? 23 A That would be typically either a mason or some trades 35 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 6 Q How long approximately to finish this or the 7 remediation efforts? 8 A I would estimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 10 We can scroll to the next page. There's a section 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 14 A Miscellaneous metals, Can you describe what's 15 and for the windows depending on if their replacement 16 index, railings in th	6	just a little bit more on this particular page, we noticed	6	majority of the framing on the building, all the wood
9 there's numerous gaps in that precast plank that at this 10 point is allowing moisture into the building. So all of 11 that would need to be sealed and it would need to be 12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 19 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 6 Q How long approximately to finish this or the 7 remediation efforts? 8 A I would estimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 14 A Miscellaneous metals. Can you describe what's 15 related steel or metal. Items like bollards, roof access 16 ladder, railings in the stairwells, items that are just kind 17 of miscellaneous in nature. And we observed that the material was on site but had not been installed yet. 19 Q Any deficiencies noted? 20 A Not for this particular package whe had the sate of this item is still to be completed? 21 the top of the window seem that was in the trans. Item be didn't have an 22 escritate plant that needed to be done on the 23 that ther	7	that the first floor, which was a precast plank, extended to	7	framing. They would also do the installation of all the
10 point is allowing moisture into the building. So all of 11 that would need to be sealed and it would need to be either 12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 19 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 6 Q How long approximately to finish this or the 7 remediation efforts? 8 A I would estimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 10 Q What kind of crew would be needed, or crew or trades 11 windows are related items such as miscellaneous of a stabloont. So this package is a fairly large package in 12 tandpoint. So this package is a fairly large package in 13 terms of mixed use building construction. 14 Q About 25 percent of this item is still to be completed? 16 A That was our best assumption. Based on not knowing 17 by A swe walked through the building, we noted that the 28 pecifically what all was in this particular package, we had 29 A swe walked through the building, we noted that the 21 well. 20 A A swe walked through the building, we noted that the 21 well. 22 windows were in addition to those 12 to 17 2 windows were either broken or missi	8	the exterior of that wall, which is typical. However,	8	windows. They would also do the installation of the Tyvek
11 that would need to be sealed and it would need to be either 12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exertior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the report? 16 y A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 16 Q How long approximately to finish this or the 7 remediation efforts? 2 A That would setimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 12 A That would setimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 15 A What skind of crew would be needed, or crew or trades 15 related steel or metal. Items like bollards, roof access 16 ladder, railings in the stairwells, items that are just kind 17 of miscellaneous in nature. And we observed that the 18 material was on site but had not been installed yet. 16 Q Any deficiencies noted? 20 A Not for this sparticular package from 4 labor contraction. 14 Q About 25 percent of this item is still to b	9	there's numerous gaps in that precast plank that at this	9	weather barrier on the exterior of the building. And then
12 resprayed or some sort of additional membrane would need to 13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q. And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A. Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q. What crew or crews would be needed to complete the CMU 25 What crew or rews would be needed to complete the CMU 26 were either broken or missing some sort of glass. 12 to 17 windows were in addition to those 12 to 17 windows were either broken or missing some sort of glass. 12 to 17 windows were either broken or missing some sort of glass. 12 to 17 windows were either broken or missing some sort of glass. 12 to 17 windows were either broken or malfunctioning latches or 3 cranks so that you couldn't actually close the windows wi	10	point is allowing moisture into the building. So all of	10	any other miscellaneous related items such as miscellaneous
13 be put over the top of that so that there is not any gaps in 14 that exterior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 6 Q How long approximately to finish this or the 7 remediation efforts? 8 A I would estimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 14 A Miscellaneous metals. Can you describe what's 15 A That was our best assumptions. Based on not knowing specifically what all was in this particular package, we had to be completed? 17 to make some assumptions to get to that point. 18 Q It looks like there were some deficiencies noted as 19 well. 2 A As we walked through the building, we noted that there were given for the swindows that had signs of moisture penetration on the nortle and the east elevations of the building, to to 15 windows were either broken or missing some sort of glass. 12 to 17 2 windows were in addition to those 12 to 17 2 windows were in addition to those 12 to 17 2 windows were in the rortle and the east elevations of the building, and to the east elevations of the building, and to 15 w	11	that would need to be sealed and it would need to be either	11	metals could fall within this package from a labor
14 that exterior wall. 15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 18 Q It looks like there were some deficiencies noted as 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 6 Q How long approximately to finish this or the 7 remediation efforts? 8 A I would estimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 14 A Miscellaneous metals would be just non-structural 15 related steel or metal. Items like bollards, roof access 16 ladder, railings in the stairwells, items that are just kind 17 of miscellaneous in nature. And we observed that the 18 material was on site but had not been installed yet. 19 Q Any deficiencies noted? 20 A Not for this inadition to those general work and labacy as in this particular package on not knowing 16 specifically what all was in this part all was in this particular package, we had 17 to make some assumptions to get to that point. 18 Q It looks like there were some deficiencies noted as were quite a few windows that had signs of moisture 22 penetration. And so you can see that we've noted between 23 and 50 with some sor of moisture penetration on the n	12	resprayed or some sort of additional membrane would need to	12	standpoint. So this package is a fairly large package in
15 Q And so in addition to those remediation efforts, 16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU 26 That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 6 Q How long approximately to finish this or the 7 remediation efforts? 8 A I would estimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 11 Q We can scroll to the next page. There's a section 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 14 A Miscellaneous metals would be just non-structural 15 related steel or metal. Items like bollards, roof access 16 ladder, railings in the stairwells, items that are just kind 17 of miscellaneous in nature. And we observed that the 18 material was on site but had not been installed yet. 19 Q Any deficiencies noted? 20 A Not for this particular package other than the fact 15 related steel or metal. Items like bollards, roof access 16 ladder, railings in the stairwells, items that are just kind 17 of miscellaneous in nature. And we observed that the 18 query entread to be either were some deficiencies noted as 19 well. 20 A As we walked through the building. Or moisture penetration on the north 21 and the east elevations of the building, and 50 with some sort of moisture penetration to the sever either broken or missing some sort of glass. 12 to 1	13	be put over the top of that so that there is not any gaps in	13	terms of mixed use building construction.
16 there's also about 25 percent of the CMU block would still 17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 6 Q How long approximately to finish this or the 7 remediation efforts? 8 A I would estimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 14 A Miscellaneous metals would be just non-structural 15 related steel or metal. Items like bollards, roof access 16 ladder, railings in the stairwells, items that are just kind 17 of miscellaneous in nature. And we observed that the 18 material was on site but had not been installed yet. 19 Q Any deficiencies noted? 20 A Not for this particular package other than the fact 21 to make some assumptions to get to that point. 22 to make some assumptions to get to that point. 24 to make some assumptions to get to that point. 25 Q I looks like there were some deficiencies noted as 21 well. 22 A As we walked through the building, we noted that thee 21 were quite a few windows that had signs of moisture 22 penetration. And so you can see that we've noted between 23 and 50 with some sort of moisture penetration on the nort 24 and the east elevations of the building. 25 Q I fot sees windows were in addition to tho	14	that exterior wall.	14	Q About 25 percent of this item is still to be completed?
17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 6 Q How long approximately to finish this or the 7 remediation efforts? 8 A I would estimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 14 A Miscellaneous metals would be just non-structural 15 related steel or metal. Items like bollards, roof access 16 ladder, railings in the stairwells, items that are just kind 17 to make some assumptions to get to that point. 18 Q It looks like there were some deficiencies noted as 19 well. 20 A As we walked through the building, we noted that the 21 were quite a few windows that had signs of moisture 22 penetration. And so you can see that we've noted between 23 and 50 with some sort of moisture penetration on the north 24 and the east elevations of the building, use noted that the 25 were either broken or missing some sort of glass. 12 to 17 2 windows were either broken or missing some sort of moisture penetration on the north 26 these windows were in addition to those 12 to 17 2 windows were either broken or malfunctioning latches or 3 cranks so that you couldn't actually close the window 4 completely and secure it. And six to ten of those windows 5 the frames	15	Q And so in addition to those remediation efforts,	15	A That was our best assumption. Based on not knowing
17 need to be completed as well? Is that a fair reading of the 18 report? 19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. So either a 4 mason or a subcontractor that specializes in spray-applied 5 barrier. 6 Q How long approximately to finish this or the 7 remediation efforts? 8 A I would estimate maybe a week to two weeks depending on 9 the actual scope that's required on the first floor for the 10 CMU. 11 Q We can scroll to the next page. There's a section 12 titled miscellaneous metals. Can you describe what's 13 assessed in there? 14 A Miscellaneous metals would be just non-structural 15 related steel or metal. Items like bollards, roof access 16 ladder, railings in the stairwells, items that are just kind 17 to make some assumptions to get to that point. 18 Q It looks like there were some deficiencies noted as 19 well. 20 A As we walked through the building, we noted that the 21 were quite a few windows that had signs of moisture 22 penetration. And so you can see that we've noted between 23 and 50 with some sort of moisture penetration on the north 24 and the east elevations of the building, not as the windows were either broken or missing some sort of glass. 12 to 17 2 windows were either broken or missing some sort of moisture penetration on the north 24 and the east elevations of the building. 25 Q How long approximately to finish this or the 26 of these windows were in addition to those 12 to 17 2 windows were either broken or malfunctioning latches or 23 cranks so that you couldn't act	16	there's also about 25 percent of the CMU block would still	16	specifically what all was in this particular package, we had
19 A Our assumption was that there were some walls on the 20 first floor that still needed to be completed within what we 21 felt was a common space. At that time we didn't have an 22 accurate plan that noted those areas. So our assumption was 23 that there was some work still that needed to be done on the 24 first floor on the inside of the building. 25 Q What crew or crews would be needed to complete the CMU Page 39 1 block work plus the remediation work? 2 A That would be typically either a mason or some trades 3 have a spray-applied weather barrier division. 1	Labor. What is this?	1	A We would have, yeah.
2	A This would be general carpentry that's associated with	2	Q If we can proceed to the next page and the next
3	finishes within the building. So doors and frames,	3	category, Millwork-Cabinets. Can you described for the
4	potentially cabinets. Things of that nature that are	4	Court what is assessed in there?
5	supplied for this particular subcontractor to install.	5	A This would be the supply of any kitchen cabinets
6	Q And your report says 25 percent of the work hadn't been	6	throughout all the residential units. And as we were going
7	completed yet for this?	7	through and doing our observations, we noticed that there
8	A That was our assumption, yeah, based on what we	8	were a handful of cabinets that were not installed, either
9	typically see within this package and what we felt was	9	missing or damaged. So I think I noted on the report that
10	remaining work completed on the site.	10	on the second floor there was one unit where the cabinets
11	Q But you did note deficiencies with what had been	11	were not completed. And you can see that in that first
12	completed.	12	photo on the left. On the third floor there were 17 units
13	A We did, yes.	13	that were missing at least one cabinet and four units that
14	Q Can you kind of outline or give a high-level overview	14	appeared to have more that were missing. So I would say
15	of that for the Court?	15	overall to get to our assumption of what was completed, we
16	A Yeah. We noticed that there were several unit entry	16	did a count on the number of units and how many units didn't
17	doors that were damaged that most likely needed to be	17	have cabinets installed fully and arrived at our assumption,
18	replaced. Number of units which had, you know, just the	18	our percentage.
19	back sides of the bifold doors and the closets had been	19	Q When you say missing, did you observe them on site and
20	ripped down just to fit properly. It felt like that was a	20	they just hadn't been installed yet, or were they totally
21	deficiency that should be corrected.	21	absent?
22	The third note on the potential deficiencies were	22	A Most of the cabinets were on site that we observed. I
23	observed wood base installed prior to flooring with no gaps	23	didn't do an actual count of the individual units, but it
24	in substrate between the bottom of the base.	24	appeared that most of the materials was there. It had just
25	Typically what I see is that the flooring goes in first	25	not been installed.

Q Were there replacement materials or replacements for ones that had been damaged? What would have to be done with those? A They would have to be replaced. I don't recall seeing any replacement pieces on the site. Q You noted some potential deficiencies as well? A There were a few areas that we noticed where the countertop was overhanging too far where it would prevent an appliance from being installed. You know, like a stove or
2 3 4 5 6 7 8 9 10 11 12 13	and then the base goes on top of the floor so that you have a nice basically you're hiding the gap where the floor meets the wall. It didn't appear that that was able to be accomplished in this case. So it's more of an aesthetic deficiency in my opinion than really a functionality deficiency, but it's something to note. Q If this is going to be sold and marketed as a high-end apartment complex, are those the types of finishes, the lack of gap, that you would expect to see? A I would not like to see that in a high-end apartment personally. Q So you're saying that these are deficiencies that would need to be remedied?	2 3 4 5 6 7 8 9 10 11 12 13	Q You mentioned that some had been damaged though as well? A Correct, yes. Q Were there replacement materials or replacements for ones that had been damaged? What would have to be done with those? A They would have to be replaced. I don't recall seeing any replacement pieces on the site. Q You noted some potential deficiencies as well? A There were a few areas that we noticed where the countertop was overhanging too far where it would prevent an appliance from being installed. You know, like a stove or something like that. And in some cases the countertop
2 3 4 5 6 7 8 9 10 11 12 13 14 15	and then the base goes on top of the floor so that you have a nice basically you're hiding the gap where the floor meets the wall. It didn't appear that that was able to be accomplished in this case. So it's more of an aesthetic deficiency in my opinion than really a functionality deficiency, but it's something to note. Q If this is going to be sold and marketed as a high-end apartment complex, are those the types of finishes, the lack of gap, that you would expect to see? A I would not like to see that in a high-end apartment personally. Q So you're saying that these are deficiencies that would need to be remedied? A Yes.	2 3 4 5 6 7 8 9 10 11 12 13 14	Q You mentioned that some had been damaged though as well? A Correct, yes. Q Were there replacement materials or replacements for ones that had been damaged? What would have to be done with those? A They would have to be replaced. I don't recall seeing any replacement pieces on the site. Q You noted some potential deficiencies as well? A There were a few areas that we noticed where the countertop was overhanging too far where it would prevent an appliance from being installed. You know, like a stove or something like that. And in some cases the countertop overhung the edge of the cabinet too far where a

Q So when you say overhung, essentially they jutted out too far for you to be able to slide in a range or a refrigerator? A Correct. Correct. Typically to expand on that, in the installation of a range, the countertop should be flush with the edge of the cabinet so that it slips in there

	Boodinent 1 ago 10 c	/ -	.00
	Page 46		Page 48
1	the countertop had overhung too far to prevent the range	1	any of the damages.
2	from being installed.	2	A Correct, yeah.
3	Q So would those deficiencies need to be remedied in your	3	Q What trade or trades would be needed to finish
4	opinion?	4	installing these units and what is needed to be done to
5	A Yes.	5	install them?
6	Q What crew or crew or trades would be needed to remedy	6	A Yeah. I would say a general work and labor contractor
7	any of these deficiencies?	7	would set the vanity in place and then a plumber would need
8	A Again, I think a general work and labor contractor	8	to hook the sink up and get everything tied in. So multiple
9	would be able to handle all of those trades or all of those	9	trades for this particular package to complete.
10	scopes. In this case, I think it's fairly straightforward	10	Q On the next page, Page 11, there's a section titled
11	with that scope.	11	Moisture Protection. Can you describe what that is?
12	Q And same trade to complete the remaining 15 percent?	12	A Generally roughing membrane for both low and high roof
13	A Yes.	13	would fall under this package.
14	Q If we could proceed to the next page, Countertops-	14	Q And you thought this had been mostly done at 95
15	Kitchen and Bathroom. Can you describe what that is?	15	percent?
16	A My assumption is that this includes the supply and the	16	A It appeared that all of the roofing membrane was in
17	installation of the countertops specifically. And through	17	place. The only items that we noted, just minor flashings
18	our observations we noticed that there were a couple units	18	and rough cap, things like that that wasn't in place. But
19	on the second floor that the countertops were not installed.	19	primarily the majority of this was completed. At the time
20	Third floor, it appeared that all the countertops were in	20	of this report we didn't know that there was any additional
21	place. And when I say 95 percent complete, I mean minor	21	work on top of that. But it appears that there is a patio
22	punch list items. So nothing significant from that	22	or a rooftop patio in some sense here. Which is that were
23	perspective. And on the fourth floor we noted that one unit	23	the case, there is patio pavers that fall under this
24	was not complete but the other units appeared to be in	24	particular scope. So we may have underestimated this a
25	place. So only punch list related items on that.	25	little bit on our first report after now seeing the final
	Page 47		Page 49
1	Q Were the countertops on site or were they still needing	1	plan set at the end of the project. But at the time of our
2	to be brought in?	2	inspection, we noted that the majority of the scope had been
3	A I believe they were on site. I don't recall	3	completed just with minor items.
4	specifically though.	4	Q What trades to finish that last five percent?
5	Q Did you note any deficiencies for the countertops?	5	A This would be a roofing contractor that would be needed
6	A Other than the items that we talked through with the	6	for that.
7	cabinets, those would be the same deficiencies.	7	Q Any deficiencies noted with what had been performed?
8	Q The trades to complete this work or remedy those	8	A We noticed that there were a couple of soft spots on
9	deficiencies are?	9	the roofing area on that lower
10	A Generally a work and labor contractor would perform	10	Q What's a soft spot? Sorry to interrupt you.
11	this package as well.	11	Q Soft spot would be if the substate below the membrane
12	Q Next page, section Bathroom Vanities. Can you describe	12	was not typically you have a rigid insulation underneath
13	and explain that for the Court?	13	it that provides the thermal value. And then your membrane
14	A Bathroom vanities, appeared that this was a supplied	14	is over the top of that. And in some cases if there is some
15	piece of millwork that in each bathroom was kind of a	15	deterioration of that either coverboard or that insulation,
16	complete package. Countertop, sink and cabinet was all part	16	then you get a soft spot as you're walking across the roof.
17	of like a full vanity piece. And we observed that there	17	So our opinion would be that some of those areas would
18	were a couple units that did not have the vanity installed.	18	maybe need to be opened back up and replaced and then
19	It appeared that it was there, it just wasn't installed.	19	patched in order to correct the deficiency.
20	And a couple where there was some damage to the sink and to	20	Q Roofing company do that work, or some other trade?
21	the countertop that needed to be repaired. I don't recall	21	A A roofing company would be doing that.
22	if there was any replacements for the damaged pieces. I	22	Q You can proceed to the next page, the masonry section.
23	think when we took our counts, there was enough for one	23	Can you describe what masonry was involved with The Ruins
24		24	development?
25	Q So enough to finish outfitting the units but not to fix	25	A In this package we assumed that this was the face brick
		1	13 (Pages 46 - 49)

Desc Main Page 14 of 108 Document Page 50 1 on the face of the building. And we noticed that the east 1 A Either a failure of a fastener, which potentially could 2 elevation had -- I'm sorry, the north elevation needed to be 2 be deterioration of substrate that it's being fastened into. completed. There were three course of brick on the bottom, 3 Just over time not being completed and being open to the 3 elements and wind and things like that could also 4 but nothing else had been completed above that. And in 5 addition to that, none of the joints in the masonry that had deteriorate. So just a number of different things that 5 been installed were properly sealed at that time. could lead to the metal panel falling off or coming loose What type of trade? I'm assuming a mason to finish from the building. It's not intended to be set by itself. this work or --It's intended to be a system. Right? So I think just over Mason would be required to finish this trade. time having that not completed is causing some of that Does this type of brick -- I know the local law firm 10 deterioration in my opinion. 10 11 building is brick as well. And we require a sealant in our 11 And then, yeah, just a couple of other items that we 12 brick. Is that required for all brick or would it be 12 noted, that there were some penetrations through the panels required on this brick? that hadn't been completed and properly trimmed. And there 13 13 I would say at all of the joints sealant would need to 14 was some tape that was on the face of the panels, which we be required. Typically after brick is installed and after weren't sure exactly why that was. But just a couple of 16 the mortar is cleaned off, you would acid wash it and clean different deficiencies we felt needed to be addressed in it so that it's presentable. That's a typical installation order to complete the package and finish the project. 17 17 You indicated that time can exacerbate these issues. process with brick. 18 That would be included in the 20 percent to be done or Is that correct? 19 0 19 20 is that --20 That's my opinion, yes. 21 A That would be included, yes. 21 All right. And so this inspection was in April of '24. Also still by a mason, or is that a different person? Do you believe that things would have improved or continued 22 Q 22 23 to deteriorate from then? 23 Okay. Next section is Metal Siding/Metal Panels, on If no work had been completed since this inspection, my Q opinion is that it would only further deteriorate from then 25 Page 13. Do you see that? Page 51 Page 53 1 A Yes. 1 until now. Can you explain to the Court what that section is? What trades or subs would be needed to both finish this Metal siding is what you think it would be. It's the portion and correct these deficiencies that you noted? skin that goes on the building over the top of the weather This would be a siding subcontractor. Typically a barrier, the Tyvek layer. It appeared at the time of our contractor that specializes in installation of exterior siding would be who I would expect to need to be finishing 6 inspection that the north elevation had not been completed. 7 The east elevation had not been completed. There were some 7 this scope. soffit panels missing on the low roof on the west side of Proceed to the next page, Page 14. At the top there's the building. Flashing and metal returns typically are in a section, Commercial Doors, Frames, Hardware. Can you this package that would cover the brick that would return at 10 explain what that section reviewed? any door openings to basically seal the building in its Yeah. This would be the supply of all the doors, 11 11 entirety. So a lot of those items had not yet been 12 frames, and hardware that a general work and labor completed ate the time of our inspection. 13 contractor would finish the installation of. So we noted 13 I think you indicated 60 percent complete 14 that all the doors, frames, and hardware for the stair tower 0 approximately? 15 still needed to be installed. Same for trash rooms. So 15 That was our assumption assuming that two elevations most of the unit entry doors and frames appeared to be hung, 17 had been completed, materials were on site, and two 17 but none of the hardware was finished. Common area doors, elevations still needed to be completed. So that was how we we noticed that none of that work had been completed. So arrived at our 60 percent. 19 all of that would still need to be supplied to then be 20 Q You noted some deficiencies in what had been completed 20 21 though? 21 0 And you said need to be supplied. So materials weren't on site for all this? We did. It appeared that there were some metal panels 22. 22 A

14 (Pages 50 - 53)

Yeah, correct. I think there was additional doors.

leaned up against the doors and placed in certain areas.

You can see in the picture on the right that some doors were

	Page 54		Page 56
1	But none of that had been installed. So our assumption was	1	drywall, taped, textured, and completed the finishing.
2	that some of that material may need to be installed. So we	2	Q Okay. You have 75 percent complete for that?
3	assumed that half the material was on site and available.	3	A Correct.
4	Q And I don't know if I misheard you or not. You said	4	Q Would it be a drywall sub or trade then to finish that
5	general contractor to finish this work or a different sub?	5	remaining 25 work?
6	A General work and labor subcontractors, yeah.	6	A That's correct, yeah.
7	Q All right. Later down the page there is a Vinyl	7	Q Any issues with the 75 percent that had been completed?
8	Windows Supply Only section. What is that?	8	A I think one of the biggest deficiencies that would
9	A So this would be the supply of the windows on the	9	impact this particular subcontractor was where there was any
10	exterior of the building, the residential windows.	10	moisture penetration or repairs that would need to be worked
11	Q And you thought 95 percent complete?	11	on at the windows. It doesn't specifically relate to this,
12	A Yeah. We assumed that, I mean, obviously all the	12	but it requires their work to patch and repair. So I would
13	windows were installed with the exception to a handful of	13	consider that a deficiency that impacts this particular
14	them that appeared to be used for stocking material in and	14	subcontractor.
15	out of the building. So just to get material up to upper	15	Q All right. Next page, Page 16, Section, Carpet.
16	floors. Those windows hadn't been installed yet. But on	16	Again, I think we can all guess what that is. But can you
17	the more concerning side, we noticed that a number of	17	confirm our suspicions?
18	windows had deficiencies that potentially would need to be	18	A Yeah. This would be the carpet in the residential
19	replaced, may not be able to be fixed in place. So we noted	19	units is how we viewed this. So this would be like the
20	this as 95 complete. Not fully completed, assuming that	20	rolled carpet that would go into the bedrooms and into the -
21	there would be some windows that would need to be supplied	21	- within the unit itself. So what we saw is that the common
22	to correct the deficiencies that we observed.	22	space of the unit, like the kitchen and the dining areas,
23	Q What sub or trades to either correct the deficiencies	23	was an LVT type floor. And the bedrooms was a
24	or finish the remaining work?	24	Q Can you explain that acronym for us, please?
25	A A window supplier for the actual material itself. For	25	A It's a luxury vinyl tile or a thinner, more durable
	Page 55		Page 57
1	this particular one, the labor we talked through with the	1	type floor. And sometimes it's either LVT, which is luxury
2	general work and labor subcontractor as well.	2	vinyl tile, or LVP, which is luxury vinyl plank. So kind of
3	Q But you would need contributions from the supplier you	3	interchangeable in my opinion. Carpet would be within the
4	believe?	4	bedrooms. So it's a pad and the carpet that would be there.
5	• •	5	And what we observed was that second and third floor, none
6	Q All right. At the very bottom of the page there is a	6	of the units had carpet in the bedrooms. And we didn't
7	section Glass and Glazing. What is that?	7	observe any materials stocked in those units, either. On
8	•	8	the fourth floor we observed most of the carpet had been
9	floor exterior as it goes out to the rooftop patio area.	9	installed with exception to two units.
10	All of those areas appeared to be installed and complete.	10	Q When you said no carpeting installed or on site, was
11	Q Just punch list items then?	11	the carpet pad or anything down, or were these just
12	A Just minor punch list items, yeah.	12	completely bare plywood floor?
13	Q Next page, next section is Drywall on Page 15. I think	13	A Yeah. We didn't notice any of that material on site at
14	we all know what that is, but can you confirm our	14	the time of our inspection.
15	assumptions?	15	Q Flooring sub to complete this work, or someone else?
16	A Yeah. Drywall is the installation of the drywall on	16	A A flooring subcontractor would complete this package, y
17	the walls. Typically in my experience this package includes	17	es.
18	the installation of the drywall, the supply of the drywall,	18	Q Next page, Page 17, section Painting/Staining. Again,
19	and the finishing of the drywall. So tape, texture, and	19	we can make assumptions, but why don't you tell us?
20	potentially painting. In a residential application	20	A So this painting and staining I think would apply to
21	typically that's all lumped into one just because there's	21	finishing the drywall, which in these rooms primarily
22	efficiencies for them to do the whole scope of work as	22	through the residential areas would just be painting. I
23	opposed to taking and giving the painting to a specific	23	assume that staining was associated with any of the wood
24	subcontractor. So my assumption in getting to the percent	24	materials that was supplied on the project if they were not
25	complete was that this subcontractor supplied, installed the	25	already prefinished. I don't know the makeup of how that
			15 (Dagge 54 57

	Document Page 16 c	of 1	.08
	Page 58		Page 60
1	was created. But we made some assumptions that the entire	1	A You can get those yourself. You just need to
2	building was painted within this particular package. And we	2	coordinate the installation with the post office.
3	noticed that there were quite a few areas that still needed	3	1 1
4	to be touched up. Primarily first floor had no paint	4	**
5	completed on it. Second, third and fourth floor was mostly	5	
6	complete. There were some significant patching areas that	6	y 1
7	still needed to be finished, which is kind of how we arrived	7	
8	at our percent complete.	8	extinguisher in case of an emergency. And we didn't observe
9	Q Earlier I believe you testified that your assumption	9	any of those installed and we did not observe any of the
10	would be that whoever does the drywall generally would do	10	material on site either for those materials.
11	the painting. Accurate?	11	Q Despite not being installed, you still noted
12	A Typically that's how we have seen it in most cases.	12	deficiencies. What were those?
13	Q But the sworn report in this case had painting and	13	A It appeared that they were higher than what you would
14	staining broken out separately from drywall.	14	typically see for a fire extinguisher cabinet generally
15	A Correct.	15	speaking. It depends on the jurisdiction, but there is a
16	Q And that was Craig or that was the Craig or Craig	16	required maximum height so that if you're in a handicap or
17	entities that did it that way.	17	accessibility requirements that need to be met from an
18	A Correct.	18	installation standpoint. I didn't look up the official the local codes to determine whether or not it was an issue.
19 20	Q Okay. Any deficiencies noted or just a lack of completion for this?	19	Just we observed it being higher than what we typically see
20	A Lack of completion.	20 21	in our experience.
22	Q Okay. And I think you indicated maybe drywall or any	22	Q And if that's obviously a code issue, that would need
23	other trades potentially involved to complete this? Could	23	to be remedied potentially?
24	it be a separate paint crew?	24	A Correct. It would need to be lowered, which would
	A Correct.		require a framer to come in and cut a new opening, drop the
			require a runner to come in and car a new opening, drop and

We also didn't observe any postal specialties or mailboxes on site or installed at the time of our inspection. Q Okay. General contractor or who would do that work? A Installation would typically be by a general contractor or general or general working labor subcontractor. But they	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	hole, patch the opening, drywall repair, painting and touchup as well. Q So multiple crews potentially. A Correct. Q And what about just the installation or the order and mode? Who would do that? A If it was just installing the cabinet and the fire extinguisher, that would be done typically by a general work and labor subcontractor. Q Next page, Page 20, Ceiling Fans. I think we know what that is. Can you confirm and just percentage done? A Yeah. It appeared that each bedroom had a ceiling fan installed. We observed all the ceiling fans installed. It was just minor punch list related items that would pertain to this. Typically this would fall under an electrician. They would either do the installation only or sometimes supply and install. It just depends on how it's packaged for this particular job. Q Electrician required then for those punch list issues? A Correct. Q Next page, Page 21, Closet Shelving. What is that? A Closet shelving would be in the bedrooms. Typically we
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Q Next page, Page 18, Fill Nail Holes. Can you confirm for us what that means? A Typically when you install wood base, there's nail holes that need to be filled from an aesthetic standpoint. So this would be generally completed by a general work and labor carpenter or a finish carpenter. Q It looks like just punch lists on floors three and four, but nothing on floor two? A Correct. Q And you already indicated that punch list carpenter to come in to complete that work? A Yes. Q All right. Next section, still on this page, is Postal Specialties, Bike Rack, Door Markers. What is that? A That would be mailboxes for the residential units. I wasn't sure if there was actually door racks, door markers, things like that. We didn't observe any of those. We also didn't observe any postal specialties or mailboxes on site or installed at the time of our inspection. Q Okay. General contractor or who would do that work? A Installation would typically be by a general contractor or general or general working labor subcontractor. But they would need to be supplied by a vendor of some sort.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	hole, patch the opening, drywall repair, painting and touchup as well. Q So multiple crews potentially. A Correct. Q And what about just the installation or the order and mode? Who would do that? A If it was just installing the cabinet and the fire extinguisher, that would be done typically by a general work and labor subcontractor. Q Next page, Page 20, Ceiling Fans. I think we know what that is. Can you confirm and just percentage done? A Yeah. It appeared that each bedroom had a ceiling fan installed. We observed all the ceiling fans installed. It was just minor punch list related items that would pertain to this. Typically this would fall under an electrician. They would either do the installation only or sometimes supply and install. It just depends on how it's packaged for this particular job. Q Electrician required then for those punch list issues? A Correct. Q Next page, Page 21, Closet Shelving. What is that? A Closet shelving would be in the bedrooms. Typically we see wire shelving in these areas. We didn't observe any of

Page 62 Page 64 1 Q So that would still have to be ordered conceivably and 1 We observed that on the second floor there were not any --2 delivered. 2 and you can kind of go through the list here. A/C units Correct. Correct. were missing throughout all floors or all the second floor. 3 And then installed О Washer and dryers were missing from the units on the second Correct. floor. The dishwasher is missing from the unit. The range Α Q By whom? and refrigerators were also missing on the second floor. Typically this could be done by a general work and 7 Same applies for the third floor. labor subcontractor. We sometimes see a specific trade come And then on the fourth floor we noticed that the A/C in and do this by themselves. But I would say generally units were stocked, but not installed. So they were on site speaking it could be done by a general work and labor in the unit. The washer and dryers, we did not observe 10 11 subcontractor. those on site anywhere. The dishwashers, we observed they Next page, Page 22, Toilets and accessories. were in the units but they were still in the box and not 12 0 12 Toilet and accessories. Obviously toilets within the installed. And then range and refrigerators, most of them 14 bathrooms. Accessories being toilet paper holders, grab were stocked in the units, but not installed. bars in the accessible units, things like that nature. We You say most. So not all appliances for every unit 16 observed that the toilets were on site. I did not take an were on site? actual count of how many toilets were on site. But none of 17 From what we observed, we did not locate any washer and 17 18 them had been installed throughout the entire building. So 18 dryers throughout the building. Most of the other units the 19 the -ranges, refrigerators, dishwashers appeared -- on the fourth 19 20 If they were on site, were they boxed, unboxed? Were 20 floor specifically appeared to be on site, not installed. Q 21 you able to observe what kind of condition they were in? 21 Who does installations. Is it an electrician or a They were boxed. We didn't observe the condition of 22 A 22 general contractor, or who? 23 the toilets. It would be multiple trades for these. So you would And construction, is it typical that there's some 24 Q 24 have the appliance vendor would typically come in, put them 25 breakage or damage to a large number of toilets when they're 25 in place and prepare them for connections. And then the Page 63 Page 65 1 delivered like that? washer, dryers and the -- so the washer and the dishwasher Certainly possible. would require a plumber and an electrician. And the range So it could be possible that there might be would require electrician. So there's multiple 4 replacements needed to be ordered if all on site? subcontractors that would be required to get the appliances Correct. And you said no installation at all on these. HVAC required at all for A/C units or can those be done Q 6 Q Correct. 7 by whom? What subs or trades to get these into the proper Typically those would be installed and plugged in by position and installed? the appliance supplier. And generally speaking the dryer, 10 A plumber would be required. it's a fairly minor hookup. Usually the appliance So it says toilets and accessories. Any particular subcontractor would hook that up and push it into place. 11 11 accessories that you noted or anything else needed to be 12 Fair enough. Next page, Page 24. Kitchen Sinks, done if they categorize this as toilets and accessories? Faucets. What did you observe with that? 13 In my experience, it would be toilet paper holder, it We observed that there were no sinks installed or would be towel or a robe hook. Just general accessories faucets or any trim-out done related to the kitchens and the 15 15 16 that would be within the bathroom. Those would be installed bathrooms on second, third, or fourth floor. 17 by the plumber or would be installed by a general work and 17 Were those in unit or were those missing from the site? labor subcontractor. It just depends on how it's packaged I believe I recall a pallet of sinks and faucets on the 19 in the project. first floor, but it had not been unboxed or verified that 19 20 Any of those noted on site? 20 there was any damage or issues with it. I did not notice or observe any of those on site. 21 It's unclear whether there's enough to finish the Next page, Appliances and A/C Units. Can you describe project on site? 22 Q 22 23 what you observed with respect to those? 23 A Unclear. We did not take a count of how many were This typically would be the supply of the appliances 24 there. and the installation of the appliances in hooking them up. What subs or trades to get this work done?

Page 68 1 A This would be a plumber. 2 Q Next page, Page 25. Bath, Fancets, Showtheads. 3 A Same thing. It would be the frim-out of the showers. 4 A plumber would be required to rim all of the stuff out. 5 None of these we observed in the units installed. Again, I of believe there was a pallet of muterial on the first floor. 5 None of these we observed in the units installed. Again, I of believe there was a pallet of muterial on the first floor. 9 Q So obviously you don't know the condition of the units policied materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Cany you 15 summarize that? 15 A Bathroom mirrors would — in appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. Also purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were noticed 21 there was some damage with it. So 2 Q And it looks like some of those, looking at Photo 2, 2 D ibl it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 5 A We do not know, no. 6 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 timi-out for this work. 9 Q Nox page, Page 27, top, Window Treatments. 9 A Window treatments would be blinds, whether they are — 10 the type of blind kind of varies between projects, but it's installed and and window it the residential units. 12 Q You have zero percent complete. This in our 16 septements is usually a supple and install package. 13 A Page 60 in the past is the supplement with the weddown tobserve any window treatments sincled, other. 14 A Weddo not observe an	1 A This would be a plumber 2 Q Next page, Page 25, Bath, Faucets, Showerheads, 3 A Same thing. It would be the trim-out of the showers, 4 A plumber would he required to trim all of the staff on. 5 None of these we observed in the units installed. Again, I 5 believe there was a pullet of material on the first floor, 7 but I don't recall how many there were and what specifics 8 there were within the pullet. 9 Q So obviously you don't know the condition of the un- 10 pulleted materials? 11 A Correct. 12 Q Plumber or unyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Buthour mirrors. Can you 15 summarize that? 15 A Bathroom mirrors would – it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and alabor subcontractor. Appeared that this was a 19 purchased mirror that would need to be installed by a 18 general work and alabor subcontractor. Appeared that this was a 19 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 19 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 19 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 19 purchased mirror that would require the were replacement materials on 3 size? 1 A Correct. 2 Q And it look like some of those, looking at Photo 2, 2 Did it look like there were ever eplacement materials on 3 size? 2 A We do not know, no. 2 What would require the fire sprinkler system 2 within the building. There is coverage - typically it's 3 concealed within the truss spaces between the floors so you 4 can treally see it at this stage of the proj		Document Page 18 of	of 1	.08
2 Q Next page, Page 25. Bath, Funcers, Shoverheads. 3 A Same fining. It would be the trim-out of the showers. 4 A plumber would be required to material on the first floor, 5 None of these we observed in the units installed. Again, I 6 believe there was a pallet of material on the first floor, 7 but I don't recall how many there were and what specifies 8 there were within the pallet. 9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 28. Buthroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would – in appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasnit installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like owner of those, looking at Photo 2, 23 were still boxbed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 A Correct. 27 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 3 A We do not know, no. 3 We do not know, no. 4 Q Next page, Page 27, top. Window Treatments. 5 Q Next page, Page 27, top. Window Treatments. 6 Q Next page, Page 27, top. Window Treatments. 9 A Window treatment would be blinds, whether they are— 10 the type of blind kind of varies between projects, but its installed and a can be windows in the residential units. 15 A We did not observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and units, 18 So appeared that the sive of the projects, but its 18 installed to a can be windows in the residential units. 18 Correct. 19 Q Would hatter require the first prince and the would have be? 19 Q Would hatter require the first prince	2 Q Next page. Page 25. Bath. Paucets. Showertheads. 3 A Same thing. It would be the trim-out of the showers. 4 A plumber would he required for this all of the starff out. 5 Nome of these we observed in the units installed. Again, I believe there was a pallet of material on the first floor, 7 but I don't recull how many there were and what specifics 8 there were within the pallet. 9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page. Can you 1 summarice that? 15 A Bathroom mirrors would – it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 18 general work and labor subcontractor. Appeared that this was a 18 general work and labor subcontractor. Appeared that this was a 19 general work and labor subcontractor. Appeared that this was a 19 general work and labor subcontractor. Appeared that this was a 19 general work and labor subcontractor. Appeared that this was a 19 general work and labor subcontractor. Appeared that this was a 19 general work and labor subcontractor. Appeared that this was a 19 general work and labor subcontractor. Appeared that this was a 19 general work and labor subcontractor. Appeared that this was a 19 general work and labor subcontractor. Appeared that the wind work. 12 Q D you know if any of those were damaged or undamaged? 13 A We do not know, no. 14 Q D oxid it look like there were replacement materials on 3 site? 15 A We do not know, no. 16 Q D did it look like there were replacement materials on 3 site? 16 A General work and labor subcontractor could finish the 7 trim-out for this work. 17 Q D what were the work and labor subcontractor could finish the 7 trim-out for this work. 18 Q Next		Page 66		_
3 A Same thing. It would be the trim-out of the showers. 4 A plumber would be required to trim all of the stuff out. 5 None of these we observed in the units installed. Again, I. 6 believe there was a pallet of material on the first floor, 7 but I don't recall how many there were and what specifies 8 flore were within the pallet. 9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would he required for this scope. 14 Q Next page, Page 26. Barbroom mirrors. Can you 15 summarize that? 16 A Batfuroom mirrors would it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 20 Do you know if any of those were damaged or undamaged? 18 A The elevator supplier or subcoutractor would need to be 19 on site of that work. 20 Q Mon pays for that susally? 21 A It would, yes. 22 Q And it look like there were replacement materials on 3 site? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 A General work and labor subcontractor could finish the 7 tim-out for this work. 26 Q Who pays for that usually? 27 A We do not know, no. 29 Q Did it look like there were replacement materials on 3 site? 29 A Window treatments would be blinds, whether they are - 10 the type of blind kind of varies between prejocts, but it's 18 that all the surrous probability of the stop of the project, which is 5 own noted them as zero percent complete. This in our 18 capture of the project, which is 5 own noted them as zero percent complete. This in our 19 capture of the p	3 A Same thing. It would be the trim-out of the showers. 4 A plumber would be required to trim all of the sunff out. 5 None of these we observed in the units installed. Again, 1 6 believe there was a pallet of material on the first floor, 7 but I don't recall how many there were and what specifics 8 there were within the pallet. 9 Q So obviously you don't know the condition of the unity palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this socpe. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Buttroom mirrors would - it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcourtactor. Appeared that this was a 17 purchased mirror that would aced to be installed by a 18 general work and labor subcourtactor. Appeared that most of 19 on site to do that work. 12 Q Mand it looks like some of those, looking at Photo 2, 22 were still boased? 14 A Northat I noticed, no. 15 Q Who would finish that work? 15 Q Who would finish that work? 16 A General work and labor subcourtactor could finish the 7 trim-out for his work. 17 Q You have zero percent on that? 18 A Plumber would be required for this? 19 Q Who would finish that work? 20 Q Next page, Page 27, top. Window Treatments. 21 A We do not know, no. 22 Q Did it look like there were replacement materials on 3 site? 23 A Completely. 24 A Northat I noticed, no. 25 Q Who would finish that work? 26 A General work and labor subcourtactor could finish the 7 trim-out for his work. 27 Q To his work. 28 Q Next page, Page 27, top. Window Treatments. 29 A Window treatments would be blinds, whether they are - 16 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 29 Q You have zero percent on that? 20 Q You have zero percent on that? 21 Q You have zero percent on that? 22 Q What kind of varies between projects, but it's 10 one first floor that the final inspection mag	1	A This would be a plumber.	1	A In my opinion, yes.
A plumber would be required to trim all of the stuff out. 5 Nome of these we observed in the units installed. Again. I 6 believe there was a pulled of material on the first floor. 7 but I don't recall how many there were and what specifies 8 there were within the pallet. 9 Q. So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q. Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q. Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 10 there was now diamage with it. So 21 Q. Dyou know if any of those were damaged or undamaged? 12 A We do not know, no. 12 Q. Do you know if any of those were damaged or undamaged? 13 A We do not know, no. 14 Q. Next page, Page 27, top. Window Treatments. 15 A We do not know, no. 16 Q. Now would finish that work? 17 A We do not know, no. 18 Q. Next page, Page 27, top. Window Treatments. 19 A Window treatments would be bilinds, whether they are— 10 they got bilind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q. You have 20 pope was completed. The 13 installation at the windows in the residential units. 14 Q. Vox page, Page 27, top. Window Treatments. 15 A We do not know, an apply from who? A separate trade or 16 A General work and labor subcourtactor could finish the 17 triming that the device was project, but it's 18 A Separate trade. 19 Q. You have 20 percent complete. This in our 19 the project would pay for that. 20 Q. Now page, Page 27, top. Window Treatments. 21 Q. You have 20 percent complete. 22 Q. Now page, Page 28, Building Sprinkler Can you 23 were still boxed? 24 Q. Next page,	4 A plumber would be required to trim all of the stuff out. 5 None of these we observed in the units installed. Again, I obselive there was a pallet of material on the first floor, 7 but I don't recall how many there were and what specifics 8 there were within the pallet. 9 Q So obviously you don't know the condition of the unit polleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Buthroom mirrors. Can you 15 summarize that? 15 A Bathroom mirrors would – in appeared that this was a 17 purchased mirror that would need to be installed by a 28 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some dimage with it. So 2 Q And it looks like some of those, looking at Photo 2, 20 were still boased? 2 A Correct. 2 Q Do you know if any of those were damaged or undamaged? 2 A Nor that I noticed, no. 3 yie? 4 A Nor that I noticed, no. 5 Q Who would finish that work? 4 A Nor that I noticed, no. 5 Q Who would finish that work? 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, pup. Window Treatments. 9 Q Who would finish that work? 10 G Who would finish flod varies between projects, but it's 11 installation at the windows in the residential units. 12 Q Y what average reprecion that? 13 A We did not observe any window treatments so site. And 14 we didn't observe any window treatments so site. And 14 we didn't observe any window treatments so site. And 14 we didn't observe any window treatments so site. And 14 we didn't observe any window treatments so site. And 14 we didn't observe any window treatments so site. And 14 we didn't observe any window treatments so site. And 15 we preference it wasn't installed. 40 control to this work. 10 Q Notat page, Page 27, pup. Window Treatments. 11 I metal	2	Q Next page, Page 25. Bath, Faucets, Showerheads.	2	Q Next section is Conveying Systems. What is that?
5 None of these we observed in the units installed. Again, I 6 believe there was a pallet of material on the first floor, 7 but I don't recall how many there were and what specifies 8 there were within the pallet. 9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 aumantarize that? 16 Q Bathwer mould be required for this scope. 17 purchased mirror that would need to be installed by a general work and labor subcontractor. Appeared that most of log there it wasn't installed. However, there were a couple of units 10 where it wasn't installed and a couple where we noticed 11 there was some damage with it. So 12 Q O and it looks like some of those, looking at Photo 2, 13 We do not know, no. 14 A We do not know, no. 15 Q Who would finish that work? 16 A General work and labor subcontractor could finish the 1 trim-out for this work. 17 Q Did took like there were replacement materials on 1 trim-out for this work. 18 Q Next page, Page 27, top. Window Treatments. 19 A Window treatments would be bilinds, whether they are the 1 trim-out for this work. 19 Q Who have zero percent on that? 11 A Suiding sprinkler would be the fire sprinkler system 1 trim-out for this work. 12 Q I would have twenther they are the trim-out for this work. 13 A Separate trade. 14 We did not observe any window treatments installed, either. 15 So we noted them as zero percent completes. This in our the trim-out for this work as a proper treatment materials on 2 the trim-out for this work. 19 A Window treatments would be bilinds, whether they are the trim-out for this work. 20 Q Who page, Page 27, top. Window Treatments. 21 Q Who page, Page 27, top. Window Treatments on site. And 14 we didn't observe any window treatments installed, either. 22 Q Who page, Page 27, top. Window treatments on site. And 14 we didn't observe any window treatments installed, eit	Some of these we observed in the units installed. Again, I 6 believe there was a pallet of material on the first floor, 7 but I do'nr ceall how many there were and what specifies 8 there were within the pallet. 9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 9 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So	3	A Same thing. It would be the trim-out of the showers.	3	A This would be the elevator.
6 believe there was a pallet of material on the first floor, 7 but I don't recall how many there were and what specifies 8 there were within the pallet. 9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plamber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirror was would — it appeared that this was a 17 purchased morror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it was not installed. However, there were a couple of units 21 were still backed? 22 A Correct. 23 Q Do you know if any of those were damaged or undamaged? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 A Not that I noticed, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 tim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be belinds, whether they are— 10 the type of this work. 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We do not observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 the type of this don't A wise dan't or backer. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 Q Next page, Page 27, top. Window treatments installed, either. 21 So we noted them as zero percent complete. This in our 22 Cap the window would finish the residential units. 23 A We did not observe any window treatments on site. And 24 We didn't observe any window treatments on site. And 25 Cap	6 believe there was a pallet of material on the first floor. 7 but I don't recall how many there were and what specifies 8 there were within the pallet. 9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of them were installed. However, there were a couple of units 20 where it want't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those. looking at Photo 2, 2 Q and it looks like some of those. looking at Photo 2, 3 were still boxed? 24 A Correct. 25 Q D you know if any of those were damaged or undamaged? 26 A General work and labor subcontractor could finish the 7 trim-out for this work. 29 Q Who would finish that work? 30 Q Who would finish that work? 40 A Not that I noticed, no. 41 We do not know, no. 42 Q Did it look like there were replacement materials on 3 site? 43 A Not that I noticed, no. 44 We do not know, no. 45 Q Who would finish that work? 46 A General work and labor subcontractor could finish the 7 trim-out for this work. 47 Q Next page, Page 27, top. Window Treatments. 48 Q Next page, Page 28, page 27, top. Window Treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And	4	A plumber would be required to trim all of the stuff out.	4	Q You have 90 percent complete?
7 but I don't recall how many there were and what specifies 8 there were within the pallet. 9 Q So dovisoly you don't know the condition of the un- 10 palleted materials? 11 A Correct. 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plamber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would—it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q D by ou know if any of those were damaged or undamaged? 26 A General work and labor subcontractor could finish the 27 trim—and the third work. 28 Q Now that I noticed, no. 29 Q Didit took like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 27 trim—and the dubies are fully completed. The final inspection tags, had not been under the final inspection tags, had not been under the final inspection tags, had not been of finish and the windows in the residential units. 19 Q What wind veraments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q I would window veraments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q I shall and supply from who? A separate trade or 13 A Separate trade. 14 A Not that I noticed, no. 15 Q Who would finish that work? 16 G Parena window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it	7 but I don't recall how many there were and what specifies 8 there were within the pallet. 9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 25. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do yu know if any of those were damaged or undamaged? 26 Q Did it look like there were replacement materials on 3 site? 27 A We do not know, no. 3 site? 4 A Not that I noticed, no. 4 Q Next page, Page 27, top. Window Treatments. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 6 Q Next page, Page 27, top. Window Treatments. 9 Q Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 a We do not know, no. 12 Q You have zero percent on that? 13 A We did not observe any window treatments ansitaled, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 19 Q What kind of trade would that be? 10 A Peger 20 Q What kind of trade would that be? 11 A We did not observe any window treatments on site. And 12 we didn't observe any window treatments ansitaled, either. 13 A Separate trade. 14 Q D what kind of trade would that be? 15 Q What kind of trade would that be? 16 Q What kind of trade would that be? 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are rades that specifi	5	None of these we observed in the units installed. Again, I	5	A Yeah. It appeared that the elevator was installed.
8 there were within the pallet. 9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bushroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q D you know if any of those were damaged or undamaged? 26 A We do not know, no. 2 Q D did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A Building sprinkler would be the fire sprinkler subcontractor 14 A Building sprinkler would be the fire sprinkler subcontractor of this work. 15 O we noted them as zero percent complete. This in our experience it is a separate trade or 16 A Separate trade. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 Q A There are trades that specifically do window 21 treatments, supply and install package. 21 Q Pour black in of trade would that be? 22 Q A There are trades that specifically do window 23 completely. 24 Description of the work of the	8 was functional. Typically they — an elevator subcontractor 9 Q So orbiviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 2.6 Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 10 where it wasn't installed and a couple where we noticed 11 there was some damage with it. So 12 Q And it looks like some of those, looking at Photo 2, 13 were still boxed? 14 A Correct. 15 Q Do you know if any of those were damaged or undamaged? 15 Q Did it look like there were replacement materials on 15 since? 16 A General work and labor subcontractor and finish the 15 trimout for this work. 16 A General work and labor subcontractor could finish that work? 16 A General work and labor subcontractor could finish the 16 Trimout for this work. 17 A We do not know, no. 18 Q Who would finish that work? 18 Q Next page, Page 27, top. Window Treatments. 19 Q Who who would finish that work? 10 Q Who who would finish that work? 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 finishes are completely done. And it's the last item to 14 terminate and yone connections, test; balance and get the 15 submardize of portions, and turn work the elevator until all the surrounding finishes are completely done. And it's the last item to 16 to that work. 16 Q That sounds like specific work, specific sub needed to 17 do that? 18 A The elevator supplier or subcontractor would need to be 19 on site to do that work. 20 Q Would that require a city inspection as well? 21 A I twould, yes. 22 Q Nho pays for that usually? 23 A Usually is the project would pay for that. 24 Q Next page, Page 28, Building Sprinkler. Can you 25 explain what	6	believe there was a pallet of material on the first floor,	6	The components were on first floor. I was unclear whether
9 Q So obviously you don't know the condition of the un- 10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would—it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 19 there was nome durange with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q D you know if any of those were damaged or undamaged? 26 Verb page 27 27 Page 67 28 A We do not know, no. 29 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 4 Q Next page, Page 27, top. Window Treatments. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim—out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are—10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q J would mate the majority of the scope happens during the framing before 17 dywall happens. And the only items that we observed needed 18 to be complete were trimming out sprinkler subcontractor 19 to be on site to do that work. 19 Q Next page, Page 28, Building Sprinkler system 19 A Window treatments would be blinds, whether they are—10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q is the majority of the scope happens during the framing before 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments on site. And 15 we didn't observe any window treatments installed, either. 16 A December of this work. 17 Q Possaid the fire spri	9 Q. So obviously you don't know the condition of the un- 10 palleted materials? 11 A. Correct. 12 Q. Plumber or anyone else you needed for this? 13 A. A plumber would he required for this scope. 14 Q. Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A. Bathroom mirrors would — it appeared that this was a purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units where we noticed 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q. And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A. Correct. 25 Q. Do you know if any of those were damaged or undamaged? 26 A. Correct. 27 Q. Do you know, no. 28 Q. Do do it look like there were replacement materials on 3 site? 3 A. We do not know, no. 3 site? 4 A. Not that I noticed, no. 5 Q. Who would finish that work? 6 A. General work and labor subcontractor could finish the trim-out for this work. 3 A. We do not know in the residential units. 4 Q. Next page, Page 27, top. Window Treatments. 5 A. We didn ot observe any window treatments smalled, either. 15 So we noted them as zero percent om that? 16 A. Separate trade. 19 Q. What kind of trade would that he? 10 Q. What kind of trade would that he? 11 A. Separate trade. 12 Q. Whot page, Page 27, top. Window treatments so site. And we didn't observe any window treatments smalled, either. 15 So we noted them as zero percent om that? 16 A. Separate trade. 17 G. What and of that who we have used 21 in the past. In my experience, it's a separate trade or 18 A. Separate trade. 19 Q. What kind of trade would that he? 20 A. There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade or 18 A. Separate trade. 19 Q. What kind of trade would that he? 20 A. There are trades that specifically do window 21 treatments, suppl	7	but I don't recall how many there were and what specifics	7	it was hooked up and functional. It didn't appear that it
10 palleted materials? 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would—it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q D by you know if any of those were damaged or undamaged? 26 A We do not know, no. 27 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 4 trim—out for this work. 9 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installed, and supply of mon who? A separate trade or 12 Q I stall and supply from who? A separate trade or 13 This has are completed, one elevator operational. 14 terminate any councections, test, balance and get the 15 elevator operational. 16 Q That sounds like specific work, specific sub needed to 17 do that? 18 A The elevator supplier or subcontractor would need to be 19 on site to do that work. 20 Q Who pays for that usually? 21 A It would, yes. 22 Q Who pays for that usually? 23 A Usually it's the project would pay for that. 24 Q Next page, Page 28, Building Sprinkler. Can you 25 explain what you observed? Page 69 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage—typically lit's 3 concealed within the truss spaces between the floors so you 4 and 'treally see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority o	10 completed, proper lighting in those areas. So there is — 11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 A Med onot know, no. 2 Q Do did it look like there were replacement materials on 3 site? 2 Who would finish that work? 3 A Not that I noticed, no. 5 Q Who would finish that work? 4 A Not that I noticed, no. 5 Q Who would finish that work? 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 6 T General work and labor subcontractor could finish the 6 T General work and labor subcontractor could finish the 6 T tim—out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 finishes are completed. The last tiem to 14 terminate any connections, test, balance and get the 15 elevator operational. 16 Q That sounds like specific sub heeded to 17 do that? 18 A The elevator supplier or subcontractor would need to be 19 on site to do that work. 20 Q Would that require a city inspection as well? 21 A It would, yes. 22 Q Moh to that work? 23 A Usually risk the project would pay for that. 24 Q Next page, Page 28, Building Sprinkler would be the fire sprinkler system 25 within the building. There is coverage—typically it's 26 who would finish that	8	there were within the pallet.	8	was functional. Typically they an elevator subcontractor
11 A Correct. 12 Q Plumber would be required for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 A We do not know, no. 27 Q Did it look like there were replacement materials on 28 site? 29 A Not that I noticed, no. 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We didn to observe any window treatments on site. And 14 we didn't observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 coverned them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Department would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the window in the residential units. 12 (Q You said the first pripie and values were 13 A We didn to observe any window treatments installed, either. 14 So we noted them as zero percent complete. This in our 15 completed. It appeared that the first pripie and values were 16 the substilial of trade would that be? 17 Q Next page, Plumbing. Can you describe what you 1	11 A Correct. 12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would – it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 25 were still boxed? 26 A Coereal work and labor subcontractor could finish the 27 trim-out for this work. 28 Q Next page, Page 27, top. Window Treatments. 39 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments in stalled, either. 15 So we noted them as zero percent complete. This in our experience it's a separate trade 21 of the past. In my experience it's a separate trade 22 in the past. In my experience it's a spearate trade 23 completely. 24 Q Window treatments generally required to finish a	9	Q So obviously you don't know the condition of the un-	9	would not turn over an elevator until the lobbies are fully
12 Q Plumber or anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would – it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasnt installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q D you know if any of those were damaged or undamaged? 26 A Not that I noticed, no. 2 Q Did it look like there were replacement materials on 3 site? 27 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 4 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window reatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 4 we didn't observe any window treatments on site. And 4 we didn't observe any window treatments on site. And 4 we didn't observe any window treatments on site. And 5 Q What kind of trade would that be? 6 A Separate trade. 7 Q Install and supply from who? A separate trade 7 Q What kind of trade would that be? 8 A Separate trade. 9 Q What kind of trade would that be? 10 Q What kind of trade would that be? 21 A The rear trades that specifically do window 22 treatments, supply and install. So that's who we have used 23 in the past. In my experience it's a separate trade 24 completely.	12 Q Plumber on anyone else you needed for this? 13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Doyou know if any of those were damaged or undamaged? 26 Q Doy on know, no. 27 Q Did it look like there were replacement materials on 28 site? 39 A Wed on ot know, no. 30 Q Did it look like there were replacement materials on 31 site? 4 A Nor that I noticed, no. 4 A Nor that I noticed, no. 5 Q Who would finish that work? 5 A General work and labor subcontractor could finish the 4 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 finishes are completely done. And it's the last item to 14 terminate any connections, test, balance and get the 15 elevator operational. 16 Q That sounds like specific sub needed to 16 do that? 18 A The elevator supplier or subcontractor would need to be 19 on site to do that work. 20 Q Would that require a city inspection as well? 21 A It would, yes. 22 Q Who pays for that usually? 23 A Usually it's the project would pay for that. 24 Q Next page, Page 28, Building Sprinkler Can you 25 explain what you observed? 26 A General work and labor subcontractor could finish the 27 trim-out for this work. 28 Q Next page, Page 27, top. Window Treatments. 29 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but	10	palleted materials?	10	completed, proper lighting in those areas. So there is
13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 A General work and labor subcontractor could finish that work. 27 Q Did it look like there were replacement materials on 28 site? 29 A Not that I noticed, no. 20 Q Who would finish that work? 30 Site? 4 A Not that I noticed, no. 4 A Not dand finish that work? 4 A Oracle work and labor subcontractor could finish the trim-out for this work. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be bilinds, whether they are — the tryep of bilind kind of varies between projects, but it's installation at the windows in the residential units. 19 Q You have zero percent complete. This in our experience is usually a supply and install package. 10 Q Son and the were didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our experience is usually? 20 A Next page, Page 28 A because the final inspection tage, have been deed to be one first partial and the were didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't observe any window treatments on site. And we didn't obs	13 A A plumber would be required for this scope. 14 Q Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 A We do not know, no. 27 Q Did it look like there were replacement materials on 28 site? 29 A Not that I noticed, no. 20 Q Did it look like some of those vere placement materials on 29 a Window treatments would be blinds, whether they are— 20 A Med din ot observe any window treatments in stalled, citebre. 21 installation at the windows in the residential units. 22 Q D had of those were any window treatments in stalled, citebre. 23 A We did not observe any window treatments in stalled, citebre. 24 A We did not observe any window treatments in stalled, citebre. 25 Q D had we didn't observe any window treatments in stalled, citebre. 26 A Separate trade. 27 Q Install and supply from who? A separate trade or 28 A We did not observe any window treatments installed, citebre. 29 Q Nat have zero percent on that? 20 Q Nat have zero percent on that? 21 Q You have zero percent on that? 22 Q Instal nad supply from who? A separate trade or 23 A Usually it's the project, which is the variety of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete. Use that the riser pipe and values were with the type of blind kind of varies between projects, but it's 10 might be a project, which were projects, but it's 10 might be project, which we have used 10 might be proved to that the project of the project, which we have used 11 might be project by the project	11	A Correct.	11	based on my experience, this is to a point where they won't
14 Up Next page, Page 26. Bathroom mirrors. Can you 15 summarize that? 16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 0 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Doy ok now if any of those were damaged or undamaged? 26 V Page 27 Did it look like there were replacement materials on 27 is iste? 28 A Not that I noticed, no. 29 Q Who would finish that work? 29 A Window reatments would be blinds, whether they are— 20 the type of blind kind of varies between projects, which is 21 A Window reatments would be blinds, whether they are— 22 they of blind kind of varies between projects, but it's 23 the would observe any window treatments on site. And 24 we did not observe any window treatments on site. And 25 We did not observe any window treatments on site. And 26 We did not observe any window treatments on site. And 27 We did not observe any window treatments on site. And 28 We did not observe any window treatments on site. And 38 We did not observe any window treatments on site. And 39 We did not observe any window treatments on site. And 30 We did not observe any window treatments on site. And 31 A We did not observe any window treatments on site. And 32 We did not observe any window treatments on site. And 33 A We did not observe any window treatments installed, either. 34 A Correct. Not general plumbing work. 35 Q What kind of trade would that be? 36 A There are trades that specifically do window 37 General work and labor subcontractor and the were did not supply and install package. 39 A There are trades that specifically do window 30 General work and labor subcontractor it is be not site to assist in that process and finalize any 31 A We did not observe any window treatments	14 terminate any connections, test, balance and get the	12	Q Plumber or anyone else you needed for this?	12	finish and turn over the elevator until all the surrounding
15 summarize that? 16 A Bathroom mirror would – it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 2 Q And it looks like some of those, looking at Photo 2, 2 Q and it looks like some of those, looking at Photo 2, 2 Q who pays for that usually? 2 Q Whould that require a city inspection as well? 4 A Correct. 2 Q Do you know if any of those were damaged or undamaged? 4 Q Next page, Page 28, Building Sprinkler. Can you 25 explain what you observed? 4 A Not that I noticed, no. 5 Q Who would finish that work? 4 A General work and labor subcontractor could finish the 7 trim-out for this work. 4 A General work and labor subcontractor could finish the 7 trim-out for this work. 5 A Window treatments would be blinds, whether they are – 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments on site. And 14 we didn't observe any window treatments on site. And 14 we didn't observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 19 Q What kind of trade would that be? 19 A Correct. Not general plumbing work. 20 Next page, Page 27, top. Window Water treatments, which is 20 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 21 observed for that? 22 A Yeah. Plumbing would be just what — you know, all of 25 completely.	15 summarize that? 16 A Bathroom mirrors would —it appeared that this was a purchased mirror that would need to be installed by a 18 general work and labors subcontractor. Appeared that most of them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 27 A Wed on not know, no. 2 Q Did it look like there were replacement materials on 3 site? 28 A Not that I noticed, no. 4 A Not that I noticed, no. 4 A Not that I noticed, no. 4 Carn't really see it at this stage of the project, which is 5 why we noted the majority of that scope happens during the framing before 4 carn't really see it at this stage of the project, which is 10 completed. It appeared that the fires prinkler subcontractor of this work. 10 completed. It appeared that the riser pipe and values were 10 the type of blind kind of varies between projects, but it's installation at the windows in the residential units. 11 wired and installed, but without the final inspection tags. 12 they wouldn't be able to turn the system on and have it be 13 operational. 14 we didn't observe any window treatments on site. And 14 we didn't observe any window treatments on site. And 14 we didn't observe any window treatments on site. And 15 were are rades that specifically do window 16 carperage and that be? 16 carperage and that be? 17 Q You said the fire sprinkler subcontractor. So this is in general plumbing work. 18 A The elevator supplier or subcontractor would need to be of hat work. 19 Ow have zero becent does not seed to do that? 18 A The elevator supplier or subcontractor would need to be on site to do that work. 20 Q Nota that point a city inspection as well? 21 A The would, yes. 20 Q Nota was prinkler subcontractor 21 A The would paye for t	13	A A plumber would be required for this scope.	13	finishes are completely done. And it's the last item to
16 A Bathroom mirrors would — it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 Page 67 2 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 1 trim-out for this work. 9 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments on site. And 15 Window treatments would bate be? 16 A Separate trade. 17 Q Install and supply from who? A separate trade or 18 A The elevator supplier or subcontractor would need to be 19 on where it wasn't installed, either. 20 Q Would that require a city inspection as well? 21 A It would, yes. 22 Q Who pays for that usually? 23 A Usually it's the project would pay for that. 24 Q Next page, Page 28, Building Sprinkler. Can you 25 explain what you observed? 26 within the building. There is coverage—typically it's 3 concealed within the trusts spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 9 on first floor that the final inspection tags had not been 10 completed. It appeared that the firse prinkler subcontractor 15 to be on site to assist in that	16 A Bathroom mirrors would it appeared that this was a 17 purchased mirror that would need to be installed by a 18 general work and labor subcontractor. Appeared that most of 19 them were installed. However, there were a couple of units 20 where it wasn't installed and a couple where we noticed 21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 A Correct. 27 Q Did it look like there were replacement materials on 28 site? 29 A Not that I noticed, no. 30 site? 4 A Not that I noticed, no. 4 A Not that I noticed, no. 5 Q Who would finish that work? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 4 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are—10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We didn't observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 on that were eliver or subcontractor would need to be 10 do that? 20 Q Would that require a city inspection as well? 21 A It would, yes. 22 Q Who pays for that usually? 23 A Usually it's the project would pay for that. 24 Q Next page, Page 28, Building Sprinkler. Can you explain what you observed? 24 Q Next page, Page 28, Building Sprinkler vould be the fire sprinkler system 25 within the building. Can you 27 explain what you observed? 28 A Building Sprinkler would be the fire sprinkler subcontractor in the form of the fire sprinkler subcontractor in the form and that it is the project would pay for that. 26 Q Next page, Page 28, Building Sprinkler. Can you 27 the subling Sprinkler. Can you 28 within the building. Ther	21 there was some damage with it. So 22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 Page 67 27 A We do not know, no. 28 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually? 22 Q Winhow treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a 25 Q How pays for that usually? 26 Q Who pays for that usually? 26 Q Next page, Page 28, Building Sprinkler. Can you explain what you observed? 27 Q Next page, Page 28, Building Sprinkler. Can you explain what you observed? 28 A Usually it's the project would pay for that. 29 Q Next page, Page 28, Building Sprinkler. Can you explain what you observed? 20 A Window treatments would be the fire sprinkler sprinkler sprinkler sprinkler subcontractor to that the final inspection tags had not been on first floor that the final inspection tags had not been of them as zero percent complete. This in our livered and installed, but without the final inspection tags, the page of the project, w	19	them were installed. However, there were a couple of units	19	on site to do that work.
22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 Explain what you observed? Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are — 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 4 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 C Who pays for that usually? 24 A Usually it's the project would pay for that. 24 Q Next page, Page 28, Building Sprinkler. Can you 25 explain what you observed? Page 69 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage typically it's 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags had not been 10 completed. It appeared that the riser pipe and values were 11 installation at the windows in the residential units. 12	22 Q And it looks like some of those, looking at Photo 2, 23 were still boxed? 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a 25 Q Who pays for that usually? 26 Q Next page, Page 28, Building Sprinkler. Can you 26 explain what you observed? 27 Q Next page, Page 28, Building Sprinkler. Can you 28 explain what you observed? 28 Q Next page, Page 28, Building Sprinkler. Can you 29 explain what you observed? 29 Q Ha Building Sprinkler would be the fire sprinkler system 20 A Building Sprinkler would be the fire sprinkler system on the floor so you 4 A Building Sprinkler would be the fire sprinkler system on the floor so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope happens during the framing before 6 drywall happens. And the only item state we observed needed 8 to be completed. It appeared that the riser pripe and values were 10 completed. It appeared that the	20	where it wasn't installed and a couple where we noticed	20	Q Would that require a city inspection as well?
23 A Usually it's the project would pay for that. 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We didn to observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 a Next page, Page 28, Building Sprinkler. Can you 23 explain what you observed? Page 69 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage typically it's 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags, had not been 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags, 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require the fire sprinkler subcontractor 14 to be on site to	23 A Usually it's the project would pay for that. 24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 explain what you observed? Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 A Usually it's the project would pay for that. 24 Q Next page, Page 28, Building Sprinkler. Can you 25 explain what you observed? Page 69 A Building sprinkler would be the fire sprinkler system 26 within the building. There is coverage typically it's 26 concealed within the truss spaces between the floors so you 27 concealed within the truss spaces between the floors so you 28 dent's the project, which is 29 within the building. There is coverage typically it's 20 concealed within the truss spaces between the floors so you 29 on first floor that the final inspection tags had not been 29 on first floor that the final inspection tags. We noted 39 to be complete were trimming out sprinkler woods. We noted 40 to be complete were trimming out sprinkler woods. We noted 41 to be complete were trimming out sprinkler beads. We noted 41 to	21	there was some damage with it. So	21	A It would, yes.
24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? 26 Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 3 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Next page, Page 28, Building Sprinkler. Can you explain what you observed? Page 69 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage typically it's 3 concealed within the building. There is coverage typically it's 3 concealed within the building. There is coverage typically it's 3 concealed within the building. There is coverage typically it's 3 concealed within the building. There is coverage typically it's 3 concealed within the building. There is coverage typically it's 3 concealed within the building. There is coverage typically it's 3 concealed within the building. There is coverage typically it's concealed within the building. There is coverage typically it's concealed within the building. There is coverage typically it's concealed within the building. There is coverage typically it's concealed within the unabiliding. There is coverage typically it's concealed within the unidso	24 A Correct. 25 Q Do you know if any of those were damaged or undamaged? Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are— 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Next page, Page 28, Building Sprinkler. Can you explain what you observed? Page 69 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage—typically it's 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and	22	Q And it looks like some of those, looking at Photo 2,	22	Q Who pays for that usually?
Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trades 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. Page 69 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage typically it's 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler bads. We noted 9 on first floor that the final inspection tags had not been 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags, 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work. 20 Q Next page, Plumbing	Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a Page 69 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage typically it's 3 cand't really see it at this stage of the project, which is 4 within the building. There is coverage typically it's 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags had not been 10 completed. It appeared that the riser pipe and values were 11 installated, but without the final inspection tags, 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't ge	23	were still boxed?	23	A Usually it's the project would pay for that.
Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 3 concealed within the truss spaces between the floors so you 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. Page 69 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage typically it's 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags had not been 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags, 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were req	Page 67 1 A We do not know, no. 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a Page 69 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage typically it's 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler subcoth tags had not been 10 completed. It appeared that the final inspection tags, 11 wired and installed, but without the final inspection tags, 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this	24	A Correct.	24	Q Next page, Page 28, Building Sprinkler. Can you
1 A Building sprinkler would be the fire sprinkler system 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We didnot observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 1 A Building sprinkler would be the fire sprinkler system 2 within the building. There is coverage typically it's 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags had not been 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags. 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcont	1 A Building sprinkler would be the fire sprinkler system 2 Q Did it look like there were replacement materials on 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a	25	Q Do you know if any of those were damaged or undamaged?	25	explain what you observed?
2 Within the building. There is coverage typically it's 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 2 within the building. There is coverage typically it's 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags. In wived and installed, but without the final inspection tags. 11 wired and installed, but without the final inspection with the 12 completed. It appeared that the riser pipe and values were 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 19 A Correct. Not general plumbing work. 20 Q Next page, Plumbing, Can you describe what you 21 observed for that? 22 A Yeah. Plumb	2 Within the building. There is coverage typically it's 3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We didn't observe any window treatments on site. And 14 we didn't observe any window treatments on site. So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Window treatments generally required to finish a 2 within the building. There is coverage typically it's 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags. Had not been 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags. 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 in't general plumbing work? 20 Q Next page, Plumbing. C				
3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completedy. 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags, had not been 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags, had not been 12 they wouldn't be able to turn the system on and have it be operational. So that would require fire inspection with the eity. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 19 A Correct. Not general plumbing. Can you describe what you 20 observed for that? 21 A Yeah. Plumbing would be just what you know, all	3 site? 4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments on site. And 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a 3 concealed within the truss spaces between the floors so you 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags had not been 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags. 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 20 Q Next page, Plumbing. Can you describe what you 21 observed for that? 22 A Yeah. Plumbing would be just what you know, all of 23		Page 67		Page 69
4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We didnot observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 4 can't really see it at this stage of the project, which is 5 why we noted the majority of that scope happens during the framing before 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags had not been 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags, 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 19 A Correct. Not general plumbing work. 20 Q Next page, Plumbing. Can you describe what you 21 observed for that? 22 A Yeah. Plumbing would be just what you know, all of 23 the rough-in within the walls for PVC for drains, for water	4 A Not that I noticed, no. 5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a 4 can't really see it at this stage of the project, which is 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags, 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 19 A Correct. Not general plumbing work. 20 Q Next page, Plumbing. Can you describe what you 21 observed for that? 22 A Yeah. Plumbing would be just what you know, all of 23 the rough-in within the walls for PVC for drains, for water	1	-	1	
5 Why we noted the majority of the scope was completed. The 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted the majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags had not been 10 completed. It appeared that the riser pipe and values were 11 wired and installed, but without the final inspection tags, 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 19 A Correct. Not general plumbing work. 20 Q Next page, Plumbing. Can you describe what you 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Yeah. Plumbing would be just what you know, all of 25 the rough-in within the walls for PVC for drains, for water	5 Q Who would finish that work? 6 A General work and labor subcontractor could finish the 7 trim-out for this work. 8 Q Next page, Page 27, top. Window Treatments. 9 A Window treatments would be blinds, whether they are 10 the type of blind kind of varies between projects, but it's 11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a 5 why we noted the majority of the scope was completed. The 6 majority of that scope happens during the framing before 7 drywall happens. And the only items that we observed needed 8 to be complete were trimming out sprinkler heads. We noted 9 on first floor that the final inspection tags had not been 10 completed. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 19 A Correct. Not general plumbing work. 20 Q Next page, Plumbing. Can you describe what you 21 observed for that? 22 A Yeah. Plumbing would be just what you know, all of 23 the rough-in within the walls for PVC for drains, for water	11 installation at the windows in the residential units. 12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a 15 wired and installed, but without the final inspection tags, 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 19 A Correct. Not general plumbing work. 20 Q Next page, Plumbing. Can you describe what you 21 observed for that? 22 A Yeah. Plumbing would be just what you know, all of 23 the rough-in within the walls for PVC for drains, for water 24 piping. But it also includes trimming out all of the	2 3 4 5 6 7 8	A We do not know, no. Q Did it look like there were replacement materials on site? A Not that I noticed, no. Q Who would finish that work? A General work and labor subcontractor could finish the trim-out for this work. Q Next page, Page 27, top. Window Treatments.	2 3 4 5 6 7	A Building sprinkler would be the fire sprinkler system within the building. There is coverage typically it's concealed within the truss spaces between the floors so you can't really see it at this stage of the project, which is why we noted the majority of the scope was completed. The majority of that scope happens during the framing before drywall happens. And the only items that we observed needed to be complete were trimming out sprinkler heads. We noted
12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 12 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 19 A Correct. Not general plumbing work. 20 Q Next page, Plumbing. Can you describe what you 21 observed for that? 22 A Yeah. Plumbing would be just what you know, all of 23 the rough-in within the walls for PVC for drains, for water	12 Q You have zero percent on that? 13 A We did not observe any window treatments on site. And 14 we didn't observe any window treatments installed, either. 15 So we noted them as zero percent complete. This in our 16 experience is usually a supply and install package. 17 Q Install and supply from who? A separate trade or 18 A Separate trade. 19 Q What kind of trade would that be? 19 Q What kind of trade would that be? 20 A There are trades that specifically do window 21 treatments, supply and install. So that's who we have used 22 in the past. In my experience it's a separate trade 23 completely. 24 Q Window treatments generally required to finish a 15 they wouldn't be able to turn the system on and have it be 13 operational. So that would require fire inspection with the 14 city. That would require the fire sprinkler subcontractor 15 to be on site to assist in that process and finalize any 16 items that were required. 17 Q You said the fire sprinkler subcontractor. So this 18 isn't general plumbing work? 19 A Correct. Not general plumbing work. 20 Q Next page, Plumbing. Can you describe what you 21 observed for that? 22 A Yeah. Plumbing would be just what you know, all of 23 the rough-in within the walls for PVC for drains, for water 24 piping. But it also includes trimming out all of the	2 3 4 5 6 7 8	A We do not know, no. Desc Main Page 19 of 108 Document Page 70 Page 72 1 Our assumption is that all of the work within the walls is 1 A Our assumption was that this was the electrical 2 completed because it's behind sheetrock and was not 2 package. So any work associated with wiring, panels. And 3 you could see on the couple of photos there it appeared that the electrician had installed the devices prior to You didn't rip anything open to take a peek? sheetrock, which is very atypical. In our experience it's We did not. However, there were areas where there were showers mounted, as you can see in those first two finished, painted before any of the devices are trimmed out photos. So there was still significant work that needed to in the units. So in order to get that to a completed state, 8 be done to set those showers and to get them plumbed and I would assume that that would need to be taken off, let the 9 hooked up. Obviously those would require a drain connection drywall subcontractor come in, repair the walls, finish 10 and water connections in and to the shower itself. So everything, and then have the electrical subcontractor come 10 11 there's work that would be required for that subcontractor 11 back in and trim all the devices out after paint is 12 to complete the job. 12 complete. 13 We did observe that most of the panels within the units You've used the phrase trim out on a few different had been labeled and what appeared to be trimmed out. We 14 occasions. What do you mean by that term of art? 14 Trim out in the context of plumbing would be -- the did not test the system to determine if it was fully 16 rough-in would be the piping within the walls. And 16 functional. So that was -- it appeared that there was still generally they'll stub a pipe out of the wall that they'll 17 some work and final inspections that needed to be done to 18 hook into later with the finish materials. So a showerhead 18 close that package out. will have a pipe, a copper pipe coming out of the wall and 19 This would need to be performed by an electrician? 20 then they'll tie onto that with the finished showerhead to 20 Correct. 21 trim out the unit. So when I say trim-out, it's putting the 21 And that was all electrical work. Did you notice any 22 items that you are seeing as a finished product beyond the 22 type of security system on site? rough-in stage if that makes sense. 23 I did not, no. If there was going to be a security system, would that Kind of put the finishing touches on whatever the sub 24

Page 71 Finishing touches, exactly. Yeah. Thank you. Next page, Page 30, HVAC. What specifically was needed for HVAC in this building? HVAC is heating, ventilation, air conditioning. So 5 this is the -- this would be the exhaust fans in the 6 bathrooms. We noted that none of those had been trimmed out 7 on the upper floors, which is why we've noted it as 90 percent complete. The assumption was that there was additional work that needed to be happening on the first 10 floor to support the common spaces. At that time we were unsure of what the full scope of that project was. So our 11 12 assumption would be that there is an HVAC contractor that

would need to be on site to finish that particular scope of

It's basically a trim piece that conceals the fan and

work. Trim-out the grills and the diffusers within the

the motor that makes it look finished and complete.

An HVAC subcontractor would do that work.

24 Q Next page, Page 31, Electrical Security System. What's

I have not seen a general subcontractor do that work on

15 bathrooms. As you can see by those first --

Who would do that work?

23 any of the projects that I've been on.

Couldn't be done by a general?

What are grills and diffusers? Sorry.

be an electrician or a separate sub? Page 73 It could be an electrician. It also could be a separate subcontractor. It depends on the scope there. But it could be another trade. And again, electrical/security system was the category used by The Ruins LLC? Correct. 7 Next page, Page 32, Paving and Sidewalk. 75 percent complete. What was that? Site concrete around the building. At the time of our inspection, we observed that there was some concrete work between the street and the building that had not been 11 12 completed yet. We also observed that there was elevation discrepancies between the garage and the exterior alley which would require some removal of concrete and 15 reinstallation of concrete to make sure that there isn't a step as you drive into the building. 17 To remove that concrete and pour new concrete. Is that a concrete crew? Is that a general in concrete? Or who gets that done? 19 20 Typically that would be done by a concrete 21 subcontractor. They could perform the removal and the setup 22 and the replacement of that particular item.

Did you identify any materials on site that would be

able to finish that remediation?

We did not.

13

14

23

25 is.

Desc Main Page 20 of 108 Document Page 74 1 Q All right. Next page, Page 33, is Bid Packages not 1 A If I were doing that, I would cut open the ceiling and applicable for the site inspection. Can you explain for the 2 understand where the water is coming in. Typically when 3 Court what that is? we're doing leak investigation, we'll try to recreate the 3 These would be items that just weren't observable. leak first. So we'll go up and we'll -- if it's a roof 5 Could be items that were completed prior to the stage of the leak, we'll try to put water on the roof to recreate the process such as building demolition, site survey, civil, water coming in to signify where the leak is. So then we asbestos. My assumption is that those items were pertaining open up the ceiling, determine where the water is coming in, to the existing site prior to construction of the new and trace it back to its source. So at its most intensive, building, testing and inspections, foundation removal. it becomes a bit of a process to try to correct those items. Again, those are items that just are not observable. So Obviously I say, but assuming a leaking roof is 10 10 categorized all of these that were not applicable because we something that needs to be fixed before you can get a couldn't observe actual work, whether they were done or not. 12 certificate of occupancy or various... 12 So these were their categories, but you couldn't 13 Correct. 13 Α Okay. And you were not asked to investigate the source 14 provide an opinion for them? 14 Correct. of the leak for this Ruins building, were you? If we go to the next page, Page 34, Additional 16 No, we were not. 17 Considerations. Can you summarize this for the Court at 17 Q Do you know if anyone has investigated the source of a 18 leak? 18 all? 19 Α I'm not aware of that 19 Additional considerations is just items that we noticed 20 as we were walking through doing our inspections that we 20 If we can skip to Page 36. Can you provide a brief 21 felt would need to be addressed in one way or another. On 21 depiction of what these punch items are? the exterior side we noted that there were a couple leaks 22 if you can scroll a little bit further there. within the building that we identified as we were walking One more page here. I'm sorry. 23 through. We took some photos of those. We did not do an Yeah. So this -- just to kind of give some context for 24 25 investigation to determine where those leaks were coming 25 this, the software that we u sed to compile and organize Page 75 Page 77 1 from, but there would have to be some potential work 1 everything with our photos and our inspection was a software associated with that. There could also be remediation with called Procore. And so this is a report that Procore 3 those obviously. So that would entail roofing generates after we put all of the information into it. subcontractor, general work and labor contractor potentially Associated with this is a specific item that we identify. 5 to open the cavity up to determine where the leak is coming 5 So where it says number 581, complete door hardware, I would 6 from and then repair it back. Potentially electrician. consider that a punch list item or a task that needed to be 6 7 There was one area we noted that there was an actual light completed. We identify a location with that. So a second 8 that was filled with water in the hallway. And so that floor fitness center in this particular case. The date that would require an electrician to come and potentially do some was created. The due date is an arbitrary date that's remediation on that. just applied if it was in the context of a normal project What would indicate a possible cause for that, the would set a particular day that it needs to be completed in. 11 0 11 12 water in the light? 12 Status initiated, again, that's just -- it's either Our assumption would be that it was a roof leak and initiated, addressed, completed. There's a couple different 13 A 13 that somehow water got down into the roof cavity or the 14 phases that would be appropriate for that. 14 15 truss cavity, found a wire, went along the wire and into the 15 Generally speaking, we use this to try to organize all 16 light. It's unlikely that it was directly above the light, of the potential items that needed to be completed. We can 16 17 but it somehow navigated to -- whether it ran on the top of 17 assign photos to each particular item so that it's the sheetrock and then made it to the light, which is the 18 organized. When we look at a photo, we know what it's 19 lowest or the point of release for the water, if you will. 19 associated with. 20 So a number of different things, but it would require a 20 So for this particular one, we took four photos of this 21 little bit more investigation to determine where exactly the 21 particular door that had not been installed. So doorframe, 22 leaks may be coming from in that particular instance. 22 door hardware, all noted that needed to be completed. So

20 (Pages 74 - 77)

generally speaking that's how every one of these items is

We didn't go through line by line, item by item so that we could put the report in. I guess if the Court would object to taking the report itself to the extent that we want to get those opinions in, it would require us to again go through those four-hundred-and-

	Document Page 22 (of 108
	Page 82	Page 84
1	hope that we don't have to do that.	1 Sorry to interrupt.
2	THE COURT: That's the way I see it. that's	2 THE COURT: Pages 1 through 401 of 60-1 is
3	exactly you must be a mind reader. Yes. It's absolutely	3 received. Okay. Thank you.
4	a legitimate objection, but the response that I would tell	4 (Exhibit 60-1(A) admitted into evidence)
5	you is that if you don't want me to read that report after	5 THE COURT: All right.
6	today, then I'm going to let the expert testify as to every	6 RESUMED DIRECT EXAMINATION OF MATTHEW GEHRTZ
7	detail.	7 BY MR. HUSHKA:
8	MR. VERSTANDIG: And, Your Honor, for clarity	8 Q All right. Mr. Gehrtz, before we get to your second
9	without waiving privilege, I think that was anticipated.	9 report, I want to talk briefly about The Ruins development
10	And that was the reason for wanting some colloquy with the	10 and the construction project. I believe you earlier
11	client, was understanding that this might be a very lengthy	11 testified that you have experience in these type of multi-
12	trip to the expert stand.	12 use developments. Is that correct?
13	THE COURT: Yes. So am I hearing that you still	13 A That's correct.
14	want to maintain your objection and we'll sit and listen to	14 Q If you had been in charge of a development of this type
15	what all of the expert opinions are, or that you now	15 of scope, can you explain for the Court what your process
16	recognize that you have a legitimate objection but are	
17	willing to waive it so that you don't have to listen to	
18	every line of the expert report?	17 leading up to ground break? And then we'll kind of draw the
19	MR. VERSTANDIG: I Your Honor, based on my	18 line there and we'll talk about what comes later after.
20	colloquy with my client, unless Ms. Cathcart is going to bob	19 Q From a pre-construction standpoint, I would go through
	her head in a different direction, I think we would note	20 the process of developing individual scopes of work for each
21		21 of the subcontractors that would be required to be on the
22	that we're open to the expert testifying in broad summary	22 job to complete the project. And that may be anywhere from
23	form and we're open to the expert offering the conclusions	23 20 to 35 different subcontractors that would have individual
24	from his report without going over them on a line-by-line	24 scopes of work to be completed. In that development phase,
25	basis. We are not trying to turn this into a ten-day trip	25 we would put together a list of items that we would expect
	Page 83	Page 85
1	to the witness stand by any means. But there are some	1 that particular subcontractor to complete for their full
2	concerns about allowing the report in without them being	2 scope. We call it a scope of work document. And so we put
3	testified to.	3 that together when we send that out for bidding. We would
4	Is there any chance Ms. Cathcart is bobbing her	4 get all of the pricing put together for each of the
5	head?	5 subcontractors. Typically we would receive two to three
6	THE COURT: She's shaking her head no. So I don't	6 different bidders in every subcontractor package and would
7	know what that means in your exchange.	7 tabulate all the bidders, make sure that all of the scopes
8	MR. VERSTANDIG: Your Honor, Court's indulgence	8 of work are comparable so that there isn't any missing scope
9	for one second.	9 or missing item, to make sure that the bids are comparable
10	THE COURT: Okay.	10 apples to apples. So if one bidder is lower and the other
11	MR. VERSTANDIG: I will be there Tuesday. I	11 is higher, we want to make sure that they have the same
12	promise.	12 scope of work to ensure that the price is comparable before
13	THE COURT: You know what? nobody really	13 we recommend awarding to a certain subcontractor.
14	anticipated how long this hearing would take. So we're just	Once we put that all together, we'll associate or put
15	going to be flexible.	15 together a schedule that coordinates all of the different
16	MR. VERSTANDIG: Your Honor, we'll consent to	16 trades in sequential order. And the reason that's important
17	letting it in.	17 is because if they're not acting in unison with the overall
18	THE COURT: Okay. All right. The Court receives	18 project, they may they only care about their own work
19	the expert report at Docket 60-1. Is that right?	19 unless they're told otherwise. And so we make sure that we
20	MR. HUSHKA: 60-1(A).	20 put together a scope or a schedule that says this
21	THE COURT: 60-1(A). Okay.	21 subcontractor is expected to be on site from this time to
22	MR. HUSHKA: Pages 1 through 401. Sorry for	22 this time. And once that's complete, then this next
23	interrupting.	23 subcontractor comes in. We don't want
24	THE COURT: I'm sorry?	24 Q I'm going to interrupt you there for a second, Mr.
25	MR. HUSHKA: It's pages 1 through 401 of 60-1.	25 Gehrtz. My apologies. You said you put together a schedule

	Document Page 23 of	of 108
	Page 86	Page 88
1	as part of your process. And I believe you were explaining	1 Q What items?
2	that schedule. Is that the responsibility of the	2 A Generally I would say the water tightness of the
3	construction manager? Or who is responsible for putting	3 building is a priority prior to finishing any of the inside
4	that together and deciding which subs or which trades are	4 of the building. So when I look at the siding not being
5	going to be on site at any given time?	5 completed and I see visible signs of moisture penetration at
6	A I would say it's the responsibility of whoever is	6 windows and whatnot, that to me says that the exterior isn't
7	managing the project, whether that's a construction manager	7 watertight, therefore some of the finishes if they're going
8	or project manager, whatever the term is used. It's whoever	8 on inside the building could be damaged and have to be
9	is managing the work of the project.	9 repaired. So that's to me out of sequence. It's not
10	Q And you described the schedule as sequential. Does	10 uncommon to have those happening simultaneously. But for
11	that mean that you have certain subs or trades in before	11 one to be completely not finished while others continue to
12	others? Or what did you mean by that?	12 move forward on the inside is for my opinion is out of
13	A Yeah. There's a certain sequence that's required to be	13 sequence.
14	efficient for contractors to do their work. And so	14 Q So just to put a button on this, do you believe that
15	Q What is that sequence?	15 The Ruins development was properly sequenced?
16	A So sequencing, in broad terms it's it's foundation,	16 A I do not.
17	it's framing, it's rough-in. So there's orders that things	17 Q All right, Mr. Gehrtz, I would like to turn your
18	need to be done in order for it to be efficient, in order	18 attention to the second report that you prepared.
19	for quality to be where it needs to be.	19 Sharon, if you can pull up ECF 60-1, Page 402.
20	For example, from a flooring standpoint, you typically	20 It's Exhibit B.
21	don't see the flooring installed after some of the base and	21 BY MR. VERSTANDIG:
22	the trim and stuff is installed. So we need to have the	22 Q Please let me know when you see that on the screen,
23	floor installer in there first to do all of the flooring and	23 sir.
24	then a finish carpenter to come in, trim out the doors,	24 A I can see it.
25	frames, base, things like that. So you achieve the level of	25 Q All right. Do you recognize this document?
	Page 87	Page 89
1	quality that's expected by doing the sequential order of	1 A I do.
2	operations.	2 Q What is this document?
3	Q Are there dangers that manifest if that proper	3 A This is our follow-up inspection to our original
4	sequential order isn't followed? Not I guess from like a	4 inspection. And I believe that this it's dated September
5	physical danger to people, but to the building or the	5 27th. I believe we were on site September 24th to do a
6	construction process?	6 reinspection to understand if there had been any additional
7	A I think generally speaking if a subcontractor comes in	7 work that had been completed since our first inspection.
8	out of sequence, there is potential for materials to be	8 Q Okay. If we scroll to the bottom of this page, is
9	damaged. There's potential for work that has to be redone	9 there a signature on this document?
10	because it's one of the examples that I would point to is	10 A Yes.
11	appliances being delivered to the site before they're ready.	11 Q Is that your signature?
12	If there's other activities of construction that are	12 A It is, yes.
13	happening that are going to risk damaging the appliances	13 Q All right. Does this report contain our opinion as to
14	that are delivered to the site out of sequence, there could	14 the progress that had been done on The Ruins?
15	be cost to replace or to repair particular items. That's	15 A Yes.
16	just one example that I can point to to illustrate.	16 Q And what was that opinion?
17	Q If things aren't properly sequenced, is there an	17 A Based on the observations I made on the site, I felt
18	increased danger of water penetration or other damages such as that?	18 like there was no significant advancement of any of the 19 work, specifically any items pertaining to the water
19	as man:	
20	A I could see that being the case was	20 nenetration and the damage that we had noted on the first
20	A I could see that being the case, yes. O Talking specifically to this project, based on your	20 penetration and the damage that we had noted on the first
21	Q Talking specifically to this project, based on your	21 report.
21 22	Q Talking specifically to this project, based on your observations and your inspection and your knowledge of this	21 report. 22 Q You mentioned water penetration. Does this report also
21 22 23	Q Talking specifically to this project, based on your observations and your inspection and your knowledge of this project, was this building properly sequenced?	21 report. 22 Q You mentioned water penetration. Does this report also 23 identify your opinion as to water penetration and damage to
21 22	Q Talking specifically to this project, based on your observations and your inspection and your knowledge of this	21 report. 22 Q You mentioned water penetration. Does this report also

Page 24 of 108 Document Page 90 1 Q And what was that opinion? 1 location as it was during our first inspection in addition My opinion was that there was more water damage or more 2 to the material and the door and the frame and everything 3 that was -- all appeared to be roughly in the same spot. 3 signs of moisture penetrating into the building from the If we were to scroll down to the next three photos, the first inspection to the second inspection. next line, can you describe what these photos depict? Was that opinion informed by observations that you made during your second inspection? The photo on the left is from the original April 17th 7 inspection, which if you -- it's a little bit hard to see. 0 What observations? But on the right side of the window at the head, you can see Visual observations. that there's a little bit of drywall tape that has sagging Does this report contain photos of those visible down from the head of the window. And the middle photo, 10 O 10 11 observations? 11 that was taken on September 24th. And it shows further 12 A Yes, it does. 12 deterioration of the head of that window where there's now a spot just to the left of that center of the window that Are those photos true and accurate representations of 13 14 what you observed? shows some material that's hanging down there. And then the 14 photo on the right is just a close-up of the head of that 15 A 16 Q All right. If we were to scroll down to Page 2 of the 16 window to further emphasize that further deterioration from 17 report, are these photos of what you observed during your inspection one and two over time. 17 18 second --18 Just to make clear, you didn't peel back any of that Yes. 19 A material, did you, for your inspection? 19 We did not, no. 20 Q Can you kind of go through these for the Court and 20 21 explain what we're looking at and what you're observing and 21 Do you have an idea of what caused that material to what your conclusions are? 22 bubble and peel like that? Sure. The photo on the left was from the original site 23 My assumption is that it's water damage or water penetration of some sort. It's consistent with what I've 24 inspection. It showed cardboard taped over the window. And 24 25 the middle photo was that same window but it had appeared seen in the past for water penetration. Page 91 Page 93 1 that the cardboard was removed and replaced with some sort If we go to the next page, there's another three-photo of a clear tape or clear plastic of some sort. The window lineup. Can you describe these photos for the Court? 3 had not been replaced, but it had just -- the cardboard had Yeah. The photo on the left again is from the first been removed and replaced with some other type of temporary inspection. And it shows that at the head of the window 5 solution. there was a little bit of deterioration with the drywall And the photo to the right is just a closer-up photo of material there and the tape. The second photo, which is in 6 7 that. You can see the tape there in the middle of the photo the middle, it shows that that's further deteriorated and 8 over the top of the window. it's now hanging down from the head of the window. And another item I would note just in the foreground of the What's that discoloration on the top above the frame? My assumption is that that discoloration was from photo, there is equipment. I believe these are appliances moisture penetration at the particular head of that window. that are in boxes. It still appeared to be in generally the 11 11 12 Q Why do you believe that? exact location as they were when we did our first report. 12 It's consistent with what I've seen in the past with The photo on the right is just again a closeup photo of that 13 A 13 other areas where water is leaking above the window. same scenario where it shows that there's further 15 Q Are you familiar with water penetration from other jobs 15 deterioration at the head of that window. 16 and inspections you've performed? And again just to clarify, you didn't peel back any of 16 Yes. the tape or anything on this window? 17 A 17 18 Q If we go down to the next line and the next pair of 18 Correct. 19 photos, what are -- can you describe those for the Court What do you believe is the cause of that bubbling and 19 what we're looking at? 20 peeling? 20 The photo on the left in comparison to the photo on the 21 Moisture penetration. 22 right is taken from approximately the same location. And it The next set of three photos. We were on that page. 22 23 23 illustrates in my opinion that there had been no significant What are these three? work to the point where there appears to be a pile of debris 24 Again, this is another scenario that just shows from

the first inspection of the second inspection that further

that's swept into a pile and is in the same approximate

1	deterioration. This photo orientation isn't in exactly the	1	under-construction 63-unit mid-high-rise property at 315
2	same location, but it does show the further deterioration of	2	East Kemp Avenue in Watertown, South Dakota."
3	the head of the window essentially.	3	MR. VERSTANDIG: Objection, hearsay.
4	Q The cause of this deterioration in your opinion?	4	THE COURT: Hold on.
5	A Moisture penetration.	5	MR. VERSTANDIG: Objection, hearsay.
6	Q Okay. We've looked at window photos. Just to clarify	6	THE COURT: It is hearsay.
7	for the Court, is this the same window from different angles	7	MR. HUSHKA: I'm going to summarize, Your Honor,
8	or are these various sets of two or three slides, are these	8	and then I'm going to ask if that is still his opinion. And
9	different, separate windows?	9	so I guess I can go line through line and ask if that's your
10	A This particular window is a different orientations. In	10	opinion or go through this. But I believe that he can
11	the first photo it's to the left essentially. And the	11	testify what his opinion is currently and whether it's
12	second two photos are to the right.	12	consistent with this.
13	Q I guess what I'm asking I phrased that unartfully.	13	THE COURT: He can, but reading straight from the
14	There's one, two, three, four, five different lines of	14	report, is that necessary? Or can you just ask questions?
15	photos. Are those five lines depicting an individual five	15	MR. HUSHKA: I guess I thought it would be more
16	different areas, or are those multiple angles of fewer than	16	efficient to just do that and summarize. But I guess I can
17	five areas?	17	ask questions if we want to do it that way.
18	A They're different areas.	18	THE COURT: You can you know what? You're in
19	Q Mr. Gehrtz, the multiple opinions that we just	19	charge. It's your examination. I'll just tell you I'm
20	discussed with respect to this report, did you reach those	20	calling balls and strikes. And you just
21	opinions utilizing your training and experience?	21	MR. HUSHKA: I guess was that sustained, Your
22	A Yes.	22	Honor, and you want me to ask shorter questions, or was it
23	Q And did you reach those opinions to a reasonable degree	23	overruled?
24	of certainty?	24	THE COURT: So it is hearsay when you read it. If
25	A Yes.	25	you ask questions and he answers them, no matter how close
	Page 95		Page 97
1	MR. HUSHKA: Your Honor, we would offer ECF	1	they are to the written word, it would be different. So the
2	Exhibit 60-1(B), Pages 402 through 404 of the ECF number.	2	objection is sustained.
3	MR. VERSTANDIG: Your Honor, this time we're going	3	BY MR. HUSHKA:
4	to assert the same objection but in hybrid form. We don't	4	Q Mr. Gehrtz, did Gehrtz Construction Services provide
5	object to pages 403 and 404, which are the photographs	5	independent third-party inspection to The Ruins?
6	insofar as the expert opinion this time is a neat three	6	A Yes.
7	paragraphs. We would object to the actual expert opinion.	7	Q Was that inspection performed on or about was the
8	THE COURT: Response?	8	follow-up inspection performed on or about September 24th,
9	MR. HUSHKA: I can certainly read in the opinion	9	2024 at or about 2:30 p.m.? 12:30 p.m.
10	and ask if that is still his opinion and we can omit Page 1	10	A 12:30 p.m., yes.
11	and just put in the photo pages if that would alleviate the	11	Q Was that inspection completed by or about 2:00 p.m.?
12	objection and concern.	12	A Yes, it was.
13	THE COURT: So the objection is sustained, and	13	Q During that inspection, did GCS observe any significant
14	I'll allow you to offer whatever you would like to offer.	14	
15	MR. HUSHKA: All right. Sharon, if we can scroll	15	MR. VERSTANDIG: Objection, leading.
16	back to the first page of that, Page 402 of the ECF. All	16	MR. HUSHKA: Well, it's did not
17	right.	17	THE COURT: Yeah.
18	BY MR. HUSHKA:	18	MR. HUSHKA: It's the Court's ruling.
19	Q Mr. Gehrtz, I'm going to read from this page. And	19	THE COURT: It appeared leading to me. I'm going
20	please follow along and let me know if I read it accurately	20	to sustain this one and allow you to ask another question.
21	at the end. Okay?	21	BY MR. HUSHKA:
1 -	A Mm-hmm.	22	Q Was any significant advancement observed at The Ruins
22	0 110 1 10 10 10 10 10 10 10 10 10 10 10		
23	Q "Gehrtz Construction Services, GCS, is pleased to	23	inspection site during that second inspection from the
	Q "Gehrtz Construction Services, GCS, is pleased to present our independent third-party follow-up inspection and report for The Ruins. We understand the subject is an	23 24 25	inspection site during that second inspection from the initial inspection? A No.

	Document Page 26 (<u> </u>	.08
	Page 98		Page 100
1	Q Were any signs of water penetration noted during this	1	Ruins?
2	second inspection?	2	A My opinion was that there was no significant
3	A Yes.	3	advancement on the project. However, at the time of our
4	Q Were those signs off water penetration more or the same	4	inspection, we did notice that there were some minor drywall
5	as from during the first inspection?	5	repair activities happening. However, we also observed that
6	A More.	6	even in areas where they were patched, it appeared that
7	Q Do the remainder of these report pages, pages 2 and 3,	7	there was still additional moisture penetrating through what
8	provide photos of that water penetration and that	8	was being patched.
9	progression?	9	Q So if I understand correctly, is it your observations
10	A Yes.	10	during the second follow-up that there was ongoing water
11	Q Are those photos true and accurate representations of	11	penetration in The Ruins?
12	what was observed during the second observation as well as	12	A That's correct.
13	the first observation?	13	Q Does this report also contain your opinion regarding
14	A Yes.	14	the cost to complete The Ruins development?
15	Q And I believe we already testified as to your opinions	15	A Yes, it does.
16	of what is particularly depicted in those photos.	16	Q I want to focus on that portion of the report for a
17	A Yes.	17	moment.
18	MR. HUSHKA: Your Honor, at this time we would	18	MR. HUSHKA: If you an scroll to Page 2, Sharon?
19	offer Pages 2 and 3 of Report Two, the photos.	19	BY MR. HUSHKA:
20	THE COURT: So that would be 60-1(B) at 403 and	20	Q I would like to direct your attention to the first
21	404?	21	column entitled Bid Package. Do you see that?
22	MR. VERSTANDIG: For clarity, we have no objection	22	A I do.
23	to the photographs.	23	Q Are these the same categories that were contained in
24	THE COURT: The Court receives 60-1(B),	24	your first report?
25	photographs at Pages 403 and 404.	25	A Yes, they are.
	Page 99		Page 101
1	BY MR. HUSHKA:	1	Q And can you remind us where those categories came from?
2		2	A Those came from the sworn construction statement.
	inspection for which we have not gone over?	3	Q And if we were to look at the third column, Assumed
4			Scope of Work to Complete, what does that column summarize?
5	MR. HUSHKA: Sharon, if we can pull up Page 405,	5	A Those are the assumptions I made in arriving at a
_	Exhibit C, the same ECF number.		
		6	dollar value to complete the particular scope of work.
7	BY MR. HUSHKA:	6 7	dollar value to complete the particular scope of work. Q Okay. And so if we look at the second column, the

We also relied on some exterior or outside subcontractors that to validate some of the pricing that we've arrived to. Q If we were to go through these opinions, the first one is General Conditions. What is that? A General conditions is a line item that typically covers items that are not within specific bid packages. So it would be facilities, toilets, dumpsters. Just utility hookup costs, inspection fees, things like that that would be required to finish that cost work.
8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	BY MR. HUSHKA: Q Mr. Gehrtz, do you see a document on the screen? A I do. Q Do you recognize that document? A Yes. Q What is this document? A This was our third site inspection or second follow-up inspection, which the goal was to complete an opinion of cost to complete the project. Q Is that your signature on the first page? A Let me scroll down to yes, it is. Q Are you attesting to the opinions expressed in this report? A I am. Q Does this report contain your opinion regarding progress to The Ruins Development since the first follow-up inspection? A Yes.	6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	dollar value to complete the particular scope of work. Q Okay. And so if we look at the second column, the middle column, Opinion Cost to Complete, is that your opinion regarding the cost to complete the various subparts of The Ruins? A That's correct. Q What did you rely upon in reaching those opinions? A Visual observations from our site inspections and the expertise in what we typically would see. We also relied on some exterior or outside subcontractors that to validate some of the pricing that we've arrived to. Q If we were to go through these opinions, the first one is General Conditions. What is that? A General conditions is a line item that typically covers items that are not within specific bid packages. So it would be facilities, toilets, dumpsters. Just utility hookup costs, inspection fees, things like that that would be required to finish that cost work. Q Those would be necessary to finish The Ruins?

	Document Page 27 o	ד ול	.00
	Page 102		Page 104
1	Q And in your opinion would that cost be \$50,000 to	1	rather something in the nature of a bid, a quote or an
2	complete The Ruins?	2	estimation. That is hearsay within hearsay. That's
3	A Yes.	3	inadmissible.
4	MR. VERSTANDIG: Objection. The objection is	4	MR. HUSHKA: Your Honor, I believe that the second
5	hearsay. And the testimony has been that some of these	5	part of 703 gets to Mr. VerStandig's point that the hearsay
6	numbers (indiscernible) isn't articulated which are based	6	is only in the quote, but if the facts or data would be
7	upon the input of third-party subcontractors. To the extent	7	otherwise would be inadmissible, the proponent of the
8	that is the foundation, the foundation is hearsay. To the	8	opinion may disclose them to the jury only if the probative
9	extent that is not the foundation for certain line items	9	value in helping the jury evaluate the opinion substantially
10	and I don't know which it is and which it isn't the line	10	outweighs their prejudicial effect.
11	items for which there's no third party input as a foundation	11	I'm not asking him to say did you get any quotes
12	would not be hearsay. This is not going to fall within the	12	from subcontractors and what are those quotes that you
13	learned treatises objection and the third parties are not	13	received. That would be hearsay, and I'm not soliciting
14	here to speak to their bids or their quotes.	14	that. I'm asking what is your opinion based on your
15	MR. HUSHKA: Your Honor, I believe that the rule	15	experience in the region and building multiple of these
16	is clear that an expert is allowed to rely on hearsay when	16	muti-unit dwellings what it would cost to complete these
17	forming their opinion. I believe it's within the scope of	17	various line items.
18	his bidding and processing and application for a scope of	18	MR. VERSTANDIG: If it was based on what it costs
19	work and expert opinion that he's already been qualified for	19	to get plumbing for a similarly-situated building of this
20	to rely upon some types of bids and his knowledge of the	20	size on a project managed in the past, that would be one
21	industry and the cost for various things to reach an	21	thing. And again, I say hearsay within hearsay. There is a
22	opinion.	22	foundational element to this, right? The foundation of his
23	As for whether or not the actual opinion itself is	23	testimony is facts ascertained for the idiosyncratic prism
24	hearsay, I asked, is it your opinion that it would cost	24	of this case; what would it cost to do and I'm making
25	\$50,000. So I didn't ask what the opinion in the report	25	this up because I don't know which he got from subs and
	Page 103		Page 105

2	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general	2	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost
3	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as	2 3	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000.
2 3 4 5	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report.	2 3 4	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule.
2 3 4 5	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report. MR. VERSTANDIG: To be clear, I should be more	2 3 4 5	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule. And it's enormously prejudicial because it's going
2 3 4 5 6	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report. MR. VERSTANDIG: To be clear, I should be more articulate about this. There's hearsay and there's hearsay	2 3 4 5 6	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule. And it's enormously prejudicial because it's going to ultimately go to a cost of completion which goes to the
2 3 4 5 6 7	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report. MR. VERSTANDIG: To be clear, I should be more articulate about this. There's hearsay and there's hearsay within hearsay. To the extent the expert is simply reading	2 3 4 5 6 7	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule. And it's enormously prejudicial because it's going to ultimately go to a cost of completion which goes to the argument that is being made that the cost of completion
2 3 4 5 6 7 8	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report. MR. VERSTANDIG: To be clear, I should be more articulate about this. There's hearsay and there's hearsay within hearsay. To the extent the expert is simply reading from his report, that's hearsay. But I'm not really	2 3 4 5 6 7 8	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule. And it's enormously prejudicial because it's going to ultimately go to a cost of completion which goes to the argument that is being made that the cost of completion being proffered by the Debtor is not reliable and accurate.
2 3 4 5 6 7 8 9	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report. MR. VERSTANDIG: To be clear, I should be more articulate about this. There's hearsay and there's hearsay within hearsay. To the extent the expert is simply reading from his report, that's hearsay. But I'm not really standing on that. That is fine. To the extent there's	2 3 4 5 6 7 8 9	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule. And it's enormously prejudicial because it's going to ultimately go to a cost of completion which goes to the argument that is being made that the cost of completion being proffered by the Debtor is not reliable and accurate. THE COURT: So given the previous colloquy and the
2 3 4 5 6 7 8 9	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report. MR. VERSTANDIG: To be clear, I should be more articulate about this. There's hearsay and there's hearsay within hearsay. To the extent the expert is simply reading from his report, that's hearsay. But I'm not really standing on that. That is fine. To the extent there's hearsay within hearsay, which is to say that the numbers in	2 3 4 5 6 7 8 9	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule. And it's enormously prejudicial because it's going to ultimately go to a cost of completion which goes to the argument that is being made that the cost of completion being proffered by the Debtor is not reliable and accurate. THE COURT: So given the previous colloquy and the foundation that was previously laid, the objection is
2 3 4 5 6 7 8 9 10	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report. MR. VERSTANDIG: To be clear, I should be more articulate about this. There's hearsay and there's hearsay within hearsay. To the extent the expert is simply reading from his report, that's hearsay. But I'm not really standing on that. That is fine. To the extent there's hearsay within hearsay, which is to say that the numbers in the report are derivative of what third parties told him,	2 3 4 5 6 7 8 9 10	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule. And it's enormously prejudicial because it's going to ultimately go to a cost of completion which goes to the argument that is being made that the cost of completion being proffered by the Debtor is not reliable and accurate. THE COURT: So given the previous colloquy and the foundation that was previously laid, the objection is sustained. You may ask more questions.
2 3 4 5 6 7 8 9 10 11 12	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. Q You have an opinion regarding the general conditions and what the cost would be to complete those. A Yes, I do. Q How did you reach your opinion what the cost would be
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report. MR. VERSTANDIG: To be clear, I should be more articulate about this. There's hearsay and there's hearsay within hearsay. To the extent the expert is simply reading from his report, that's hearsay. But I'm not really standing on that. That is fine. To the extent there's hearsay within hearsay, which is to say that the numbers in the report are derivative of what third parties told him, that's not within the scope of what's allowed by Rule 703. Rule 703 provides an expert may base an opinion on facts or data in the case that the expert is to be made aware of or personally observed. If experts in the particular field reasonably rely on those kinds of facts or data in forming an opinion on the subject, they need not be admissible for the opinion to be admitted. This isn't a question of whether or not he's reviewed other pictures in this case. It isn't a question of whether he has reviewed affidavits in this case. It's a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule. And it's enormously prejudicial because it's going to ultimately go to a cost of completion which goes to the argument that is being made that the cost of completion being proffered by the Debtor is not reliable and accurate. THE COURT: So given the previous colloquy and the foundation that was previously laid, the objection is sustained. You may ask more questions. BY MR. HUSHKA: Q Mr. Gehrtz, you said you are familiar with the construction of multi-unit, multi-purpose dwelling units. Is that correct? A Yes. Q You have an opinion regarding the general conditions and what the cost would be to complete those. A Yes, I do. Q How did you reach your opinion what the cost would be to complete the general conditions?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	was. I'm not asking what the report is. I'm asking if his opinion today is that it's \$50,000 to complete the general conditions. So I don't believe it's a hearsay objection as it relates to the report. MR. VERSTANDIG: To be clear, I should be more articulate about this. There's hearsay and there's hearsay within hearsay. To the extent the expert is simply reading from his report, that's hearsay. But I'm not really standing on that. That is fine. This isn't a question of whether or not he's reviewed other pictures in this case. It isn't a question of whether he has reviewed affidavits in this case. It's a question of whether he went out and solicited third-party information that is not an existing learned treatise, that	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	which he didn't. But what would it cost to do the concrete work? Someone presumably said \$27,000. What would it cost to do the CMU block? And someone presumably said \$50,000. That's outside the scope of the rule. And it's enormously prejudicial because it's going to ultimately go to a cost of completion which goes to the argument that is being made that the cost of completion being proffered by the Debtor is not reliable and accurate. THE COURT: So given the previous colloquy and the foundation that was previously laid, the objection is sustained. You may ask more questions. BY MR. HUSHKA: Q Mr. Gehrtz, you said you are familiar with the construction of multi-unit, multi-purpose dwelling units. Is that correct? A Yes. Q You have an opinion regarding the general conditions and what the cost would be to complete those. A Yes, I do. Q How did you reach your opinion what the cost would be to complete the general conditions? A Typically on a construction project, it's anywhere between three to seven percent of the total cost of work.

	Document Page 28 (of 1	.08
	Page 106		Page 108
1	soliciting a particular number or quote from any particular	1	like that. So exterior concrete-related scope of work.
2	sub or vendor?	2	Q And you provided an amount for what you believe the
3	A It was not.	3	cost would be to complete that work?
4	MR. HUSHKA: Your Honor, again we would ask that -	4	A Yes, I did.
5	-	5	Q Is that opinion a product of your experience and
6	BY MR. HUSHKA:	6	knowledge in the field?
7	Q What is your opinion regarding the cost to complete the	7	A It is.
8	general conditions of The Ruins?	8	Q It is not the byproduct of a direct quote from any one
9	A \$50,000.	9	competitor?
10	Q Sir, the next line item on here is Testing and	10	A Correct.
11	Inspections. Do you see that?	11	Q What is your opinion regarding the cost to complete the
12	A I do.	12	concrete work?
13	Q What is testing and inspections?	13	A \$27,000.
14	A My opinion of that line item would be any permitting or	14	Q The next five line items don't have a cost associated
15	inspections or follow-up that would be required by the city	15	with them. Why is that?
16	to validate any concerns that are on the project. That's a	16	A I didn't feel that there was any work associated with
17	line item that could contain a number of different things.	17	those particular packages to complete the project.
18	So it was hard to identify exactly what that might be. But	18	Q For the line item CMU Block, what would be encompassed
19	the permit can the permit cost can be calculated from the	19	in that?
20	City of Watertown and a number of other things can be	20	A CMU block would be any remediation work associated with
21	calculated to get to that point.	21	the exterior with the waterproofing membrane to make sure
22	I conservatively put three times that in there just to	22	that it's watertight. That would be also any CMU block
23	make sure that we were covered on any additional inspections	23	that's required within the first floor common area. I
24	that would be required to satisfy the city's concern and in	24	assumed it was roughly a thousand square feet of block that
25	getting the project complete.	25	would need to be installed. So I made an assumption on what

A I didn't feel that there was any scope of work associated with any of those line items that needed to be completed. Q What did you believe needed to be done for concrete still? A My estimation was based on the fact that there was some concrete that needed to be removed and replaced in order to	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the true scope of work was required on that first floor to arrive at that number. Q And you provided an opinion regarding the cost to complete the CMU block? A Yes. Q Is that opinion a product of your knowledge and experience in the field of construction project management? A Yes. Q What awas that opinion? A \$50,000. Q The next line item, Miscellaneous Metals. What is that? A Miscellaneous metals would be any stairs, ladders, railings. And the majority of this cost based on the final set of plans as we were reviewing to put this together, noted that there was some railing on the second floor patio area. And without quoting it out, I made some assumptions based on our experience with other projects and estimating services that we do to apply a dollar value to approximately how many linear feet of rail we felt was needed to complete the job. Q So this was not based on any particular quote?
2 3 4 4 5 6 7 8 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q Does this report contain your opinion regarding the cost to complete the testing and inspections? A Yes, it does. Q Is that opinion based solely from statements made to you by a third party? A No. Q Is that opinion regarding your or derived from your experience and knowledge in this field? A Yes. Q What is your estimate and opinion for the cost to complete the testing and inspections for The Ruins? A \$39,555. Q Sir, in this report the next line item for which you provide a cost is concrete. Can you explain why you didn't have a line item for any of the four intermediaries? A I didn't feel that there was any scope of work associated with any of those line items that needed to be completed. Q What did you believe needed to be done for concrete still? A My estimation was based on the fact that there was some concrete that needed to be removed and replaced in order to get the grades to allow or to align with the garage, with	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	the true scope of work was required on that first floor to arrive at that number. Q And you provided an opinion regarding the cost to complete the CMU block? A Yes. Q Is that opinion a product of your knowledge and experience in the field of construction project management? A Yes. 2 3 4 5 6 7 8 8 9 10 11 12 13 14 15 16 17 18 19 20 21	hardware throughout the building, that would fall within this category. Q How did you you provided an opinion as to price. How was that opinion reached? A Through our experience and our past work on other estimates and projects similar to this. Q What was your opinion? A \$12,500. Q Next line item, Millwork, Cabinets. Can you describe what would be included in there? A This would be the supply of any cabinets that were not on site assuming that three units may need to be replaced in its entirety. So the supply of those particular cabinets to be installed by the general W&L finish carpentry labor. Q Did you have an opinion as to the price for that? A Our opinion was established based on other estimates that we've done, similar costs for projects that are similar in scope. Q And what was your opinion? A \$9,000. Q Countertops, kitchen and bathroom. What's that?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	A \$80,000. Q Line item for masonry, what would be included in that completion? A Masonry would be the brick veneer on the face of the building on the elevation where it was not completed. It would also include a mobilization cost for a mason to come on site, set up mixers, towers, equipment to finish the work. And then also to clean and seal the brick when completed. Q Did you have an opinion as to price for that? A I did, yes. Q And how did you reach that opinion? A Again, through history, experience and performing estimates that are very similar scope and scale for this project. Q That opinion was? A \$90,000. Q Is that still your opinion? A Yes. Q Next line item, Metal Siding/Metal Panels. What is that?
2 3 3 4 5 6 6 7 8 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	hardware throughout the building, that would fall within this category. Q How did you you provided an opinion as to price. How was that opinion reached? A Through our experience and our past work on other estimates and projects similar to this. Q What was your opinion? A \$12,500. Q Next line item, Millwork, Cabinets. Can you describe what would be included in there? A This would be the supply of any cabinets that were not on site assuming that three units may need to be replaced in its entirety. So the supply of those particular cabinets to be installed by the general W&L finish carpentry labor. Q Did you have an opinion as to the price for that? A Our opinion was established based on other estimates that we've done, similar costs for projects that are similar in scope. Q And what was your opinion? A \$9,000. Q Countertops, kitchen and bathroom. What's that? A That is the supply of the material for the countertops.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	A \$80,000. Q Line item for masonry, what would be included in that completion? A Masonry would be the brick veneer on the face of the building on the elevation where it was not completed. It would also include a mobilization cost for a mason to come on site, set up mixers, towers, equipment to finish the work. And then also to clean and seal the brick when completed. Q Did you have an opinion as to price for that? A I did, yes. Q And how did you reach that opinion? A Again, through history, experience and performing estimates that are very similar scope and scale for this project. Q That opinion was? A \$90,000. Q Is that still your opinion? A Yes. Q Next line item, Metal Siding/Metal Panels. What is that? A This would be the supply of the material and the
2 3 4 4 5 6 7 8 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	hardware throughout the building, that would fall within this category. Q How did you you provided an opinion as to price. How was that opinion reached? A Through our experience and our past work on other estimates and projects similar to this. Q What was your opinion? A \$12,500. Q Next line item, Millwork, Cabinets. Can you describe what would be included in there? A This would be the supply of any cabinets that were not on site assuming that three units may need to be replaced in its entirety. So the supply of those particular cabinets to be installed by the general W&L finish carpentry labor. Q Did you have an opinion as to the price for that? A Our opinion was established based on other estimates that we've done, similar costs for projects that are similar in scope. Q And what was your opinion? A \$9,000. Q Countertops, kitchen and bathroom. What's that? A That is the supply of the material for the countertops. And again in arriving at that assumption, we assume that	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	A \$80,000. Q Line item for masonry, what would be included in that completion? A Masonry would be the brick veneer on the face of the building on the elevation where it was not completed. It would also include a mobilization cost for a mason to come on site, set up mixers, towers, equipment to finish the work. And then also to clean and seal the brick when completed. Q Did you have an opinion as to price for that? A I did, yes. Q And how did you reach that opinion? A Again, through history, experience and performing estimates that are very similar scope and scale for this project. Q That opinion was? A \$90,000. Q Is that still your opinion? A Yes. Q Next line item, Metal Siding/Metal Panels. What is that? A This would be the supply of the material and the installation of the material to complete the skin of the

	Document Page 30 o)T 1	.08
	Page 114		Page 116
1	the face of the building that the panels are not they are	1	allowance of \$2,500 if we found that there was not
2	not installed. All that in my opinion would fall under this	2	particular material. If we needed to get a handle or
3	particular package.	3	replace a handle or something like that. Fairly small item,
4	Q Did you have an opinion as to the price to finish this?	4	but felt that without doing an actual count of every piece
5	A Yes.	5	of equipment and hardware and handle set and closure and
6	Q How did you form that opinion?	6	hinge and all of those items, to determine that there might
7	A This opinion was assuming that all the material was on	7	be something that needs to be replace or is missing over the
8	site. So this is primarily labor. We did observe pallets	8	course of the time from the start to the finish.
9	of panels. We didn't count all the panels and do a	9	Q And you said you assumed that all the stuff was on-
10	quantitative analysis of what was there to determine if	10	• •
11	there was enough. Our assumption was that there was enough	11	A Correct.
12	panels there to complete. So this is primarily labor. And	12	
13	again	13	
14	Q This is a best-case assumption then almost.	14	
15	A Yeah, exactly. And we based our labor rate on past	15	
١	•		
16	projects of similar size and scope.	16	
17	Q And what is your opinion?	17	
18	A \$195,000.	18	course of construction and need to be replaced.
19	Q Is that still your opinion?	19	Q Next line item, overhead doors. What is that?
20	A It is.	20	
21	Q Next line item, Sealants. What's included in that?	21	basically into the on-grade parking area.
22	A Typically this is every Sealant is a separate	22	Q How many doors for this project?
23	subcontract that essentially where there is a dissimilar	23	A I don't recall a specific this particular estimate
24	material is the way we say it. So if it's block to drywall	24	was based on the replacement of one door that we observed
25	or if it's tile to drywall, typically we see all of that	25	some damage to.
	Page 115		Page 117
1	sealed. And in most cases this also includes any sealant on	1	Q And so how did you reach that opinion as to price?
2	the exterior where there is a penetration through the	2	A History and experience with other estimates and scopes
3	siding, if there's any window sealants, any just general	3	of work in similar size and scale.
4	I would say typically less than a half an inch gap would	4	Q And what was your opinion?
5	fall within the scope of sealants.	5	A \$10,000.
6	Q The purpose of all those sealants is?	6	Q Stil your opinion?
7	A To seal and to provide an aesthetic finish to the	7	A Yes.
8	building.	8	Q Vinyl windows. What would be included in that?
9	Q Did you have an opinion as to the cost to finish that?	9	A This would be the supply of any windows that needed to
10	A Yes.	10	be replaced. The assumption was that five windows needed to
11	Q How was that opinion formed?	11	be replaced with the remaining windows being on-site and the
10			
12	A Typically when we're putting together an estimate for	12	ones that we noted for damage. So this is again kind of a
13	A Typically when we're putting together an estimate for building, we're estimating a cost on a per square foot of	12 13	ones that we noted for damage. So this is again kind of a best-case scenario assuming that there may be a few parts
			best-case scenario assuming that there may be a few parts
13	building, we're estimating a cost on a per square foot of	13	· · · · · · · · · · · · · · · · · · ·
13 14	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per	13 14	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any
13 14 15	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of	13 14 15	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed.
13 14 15 16	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of some unknowns with the building. So that's how I arrived at	13 14 15 16	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed. Q Did you have an opinion as to price?
13 14 15 16 17 18	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of some unknowns with the building. So that's how I arrived at my \$182,712, was based on \$2 a square foot for the footprint of the building.	13 14 15 16 17 18	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed. Q Did you have an opinion as to price? A Yes. Q Formed how?
13 14 15 16 17 18 19	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of some unknowns with the building. So that's how I arrived at my \$182,712, was based on \$2 a square foot for the footprint of the building. Q Is that still your opinion?	13 14 15 16 17 18 19	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed. Q Did you have an opinion as to price? A Yes. Q Formed how? A From historical estimates and experience.
13 14 15 16 17 18 19 20	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of some unknowns with the building. So that's how I arrived at my \$182,712, was based on \$2 a square foot for the footprint of the building. Q Is that still your opinion? A Yes.	13 14 15 16 17 18 19 20	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed. Q Did you have an opinion as to price? A Yes. Q Formed how? A From historical estimates and experience. Q And that price was?
13 14 15 16 17 18 19 20 21	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of some unknowns with the building. So that's how I arrived at my \$182,712, was based on \$2 a square foot for the footprint of the building. Q Is that still your opinion? A Yes. Q Next line item, Commercial Doors, Frames and Hardware.	13 14 15 16 17 18 19 20 21	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed. Q Did you have an opinion as to price? A Yes. Q Formed how? A From historical estimates and experience. Q And that price was? A \$3,000.
13 14 15 16 17 18 19 20 21 22	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of some unknowns with the building. So that's how I arrived at my \$182,712, was based on \$2 a square foot for the footprint of the building. Q Is that still your opinion? A Yes. Q Next line item, Commercial Doors, Frames and Hardware. What's included in that?	13 14 15 16 17 18 19 20 21 22	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed. Q Did you have an opinion as to price? A Yes. Q Formed how? A From historical estimates and experience. Q And that price was? A \$3,000. Q Still believe that's accurate?
13 14 15 16 17 18 19 20 21 22 23	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of some unknowns with the building. So that's how I arrived at my \$182,712, was based on \$2 a square foot for the footprint of the building. Q Is that still your opinion? A Yes. Q Next line item, Commercial Doors, Frames and Hardware. What's included in that? A This is any miscellaneous hardware that is not already	13 14 15 16 17 18 19 20 21 22 23	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed. Q Did you have an opinion as to price? A Yes. Q Formed how? A From historical estimates and experience. Q And that price was? A \$3,000. Q Still believe that's accurate? A Yes.
13 14 15 16 17 18 19 20 21 22 23 24	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of some unknowns with the building. So that's how I arrived at my \$182,712, was based on \$2 a square foot for the footprint of the building. Q Is that still your opinion? A Yes. Q Next line item, Commercial Doors, Frames and Hardware. What's included in that? A This is any miscellaneous hardware that is not already on the site. It's just the supply of the material. I'm	13 14 15 16 17 18 19 20 21 22 23 24	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed. Q Did you have an opinion as to price? A Yes. Q Formed how? A From historical estimates and experience. Q And that price was? A \$3,000. Q Still believe that's accurate? A Yes. Q Drywall. What would be included in there?
13 14 15 16 17 18 19 20 21 22 23 24	building, we're estimating a cost on a per square foot of the floor plan. And so anywhere between \$1 and \$2 per square foot. I used the higher range of that because of some unknowns with the building. So that's how I arrived at my \$182,712, was based on \$2 a square foot for the footprint of the building. Q Is that still your opinion? A Yes. Q Next line item, Commercial Doors, Frames and Hardware. What's included in that? A This is any miscellaneous hardware that is not already	13 14 15 16 17 18 19 20 21 22 23	best-case scenario assuming that there may be a few parts and pieces that need to be purchased in order to fix any damaged windows that we observed. Q Did you have an opinion as to price? A Yes. Q Formed how? A From historical estimates and experience. Q And that price was? A \$3,000. Q Still believe that's accurate? A Yes. Q Drywall. What would be included in there?

1 texturing, finishing of any drywall areas. We noted that in 2 the first floor there was some additional work that needed 3 to be done in the lobby areas that did not appear to be 4 completed. So that was primarily where this scope entailed. 5 Q Did you have an opinion as to the cost to finish that? 6 A Yesh. 7 Q How did you reach your opinion? 8 A Experience, historical estimates, pricing similar in 8 scope and sacle to what we writessed or observed on site. 10 Q What was your opinion? 11 A \$5,250. 12 Q Is that still your opinion? 13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it also the LVT. But - 18 Q Again, that's lasury viny file? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. Page 119 1 Q What was that opinion formed? 2 A This is particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost - 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring in The Ruins? 12 A Yesh. And what was based on? 13 A Yes. 14 A Yesh. The painting and staining and staining and staining of 15 amy finished materials within the inside of the building. 15 the anything that would be 22 required. 16 a typical fract that we would see in a similar project from a 7 cost - Page 119 16 A Tiss is the supply of the carpet in the bedroom areas. 17 formed my assumption. 18 A Tiss is the supplied of the cost of the specific material, so I applied to the proper of the supplied of the supplied of the proper of		Document Page 31 (of 1	.08
2 A Yes. 3 to be done in the lobby areas that did not appear to be 4 completed. So that was primarily where this sope entailed. 5 Q Did you have an opinion as to the cost to finish that? 6 A Yesh. 7 Q How did you reach that opinion? 8 A Experience, historical estimates, pricing similar in 9 scope and scale to what we witnessed or observed on site. 10 Q What was your opinion? 11 A \$5,250. 12 Q Is that still your opinion? 13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But		Page 118		Page 120
3 Q. How did you reach your opinion regarding the cost to completed. So that was primarily where this scope entailed. 5 Q. Did you have an opinion as to the cost to finish that? 6 A. Yeah. 7 Q. How did you reach that opinion? 8 A. Experience, historical estimates, pricing similar in scope and scale to what we witnessed or observed on site. 10 Q. What was your opinion? 11 A. \$5.250. 12 Q. Is that still your opinion? 13 A. Yes. 14 Q. Carpet (Materials). I assume I know what that is, but 5 can you confirm? 15 can you confirm? 16 A. This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But	1	texturing, finishing of any drywall areas. We noted that in	1	Q Still your opinion?
4 completed. So that was primarily where this scope entailed. 5 Q Did you have an opinion as to the cost to finish that? 6 A Yesh. 7 Q How did you reach that opinion? 8 A Experience, historical estimates, pricing similar in so scope and scale to what we witnessed or observed on site. 10 Q What was your opinion? 11 A \$5,250. 12 Q Is that still your opinion? 13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 5 can you confirm? 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But — 18 Q Again, that's fuxury vinyl tile? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that a part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 27 A Opinion was \$120,000. 30 And how was that opinion? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a roots — 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yesh. And generally what that does is allows for some 13 Rexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedroom area. 10 A Yesh. The painting and staining while the inside of the building, and staining while the inside of the building, so in a similar project from a flooring material or the cost of this type and scope? 24 A Yesh. 25 Q And how was that opinion? 26 Q Did you have an opinion as to this? 27 A Correct, square footage allowance essentially? 28 A Correct, square footage allowance, eyah. 29 A Corre	2	the first floor there was some additional work that needed	2	A Yes.
5 Q Did you have an opinion as to the cost to finish that? 6 A Yesh. 7 Q How did you reach that opinion? 8 A Experience, historical estimates, pricing similar in 9 scope and scale to what we witnessed or observed on site. 10 Q What was your opinion? 11 A \$5,250. 12 Q Is that still your opinion? 13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LYT. But 18 Q Again, that's luxury vinyl tile? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this. 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. Page 119 Page 121 painting and staining. What would all be included allowances to 21 touch up and repair any drywall patching that would be 22 required. 23 Q Is that typical for a project of this type and scope? 24 A Yes. 25 Q And what was your ultimate opinion for the cost for some in the state opinion formed? 3 A This would be the material for postal boxes, mailboxes are 11 footage allowance for flooring costs? 3 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yesh. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but if alls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 A Ordinary that would be both carpet in the bedrooms and luxury 19 Q Still your opinion?	3	to be done in the lobby areas that did not appear to be	3	Q How did you reach your opinion regarding the cost to
6 A Yeah. 7 Q How did you reach that opinion? 8 A Experience, historical estimates, pricing similar in 9 scope and scale to what we witnessed or observed on site. 10 Q What was your opinion? 11 A \$5.250. 12 Q Is that still your opinion? 13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But — 18 Q Again, that's luxury vinyl lite? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 26 Q And what was your opinion as to the cost for the 27 materials. Typically—in this instance we included an addition to finishing scope, we also included allowances to 2 touch up and repair any drywall patching that would be 2 required. 25 Q Did you have an opinion as to this? 26 A Opinion was \$120,000. 27 cost— 28 Q So based on a square footage allowance essentially? 29 A Correct, square footage allowance essentially? 30 And how was that opinion formed? 41 A This particular one, I cost if the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost— 29 C So based on a square footage allowance essentially? 40 A Correct, square footage allowance essentially? 41 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 17 Q What was that opinion? 18 A This is the lineal as a similar project form a 7 cost included by the floor A or floor B, but it falls within that 15 estimate. 19 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 19 Q Soill your opinion?	4	completed. So that was primarily where this scope entailed.	4	install carpet or flooring in The Ruins?
7 Q How did you reach that opinion? 8 A Experience, historical estimates, pricing similar in scale to what we witnessed or observed on site. 10 Q What was your opinion? 11 A \$5.250. 12 Q Is that still your opinion? 13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 15 A Yes. 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But 18 Q Again, that's luxury vinyt lite? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. Page 119 1 Q What was that opinion? 2 A Opinion was \$12,0,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance essentially? 10 Q Is that reasonable in your industry to give a square 11 footage allowance for industry to give a square 11 footage allowance for project from a 17 cost 18 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 17 Q What was to dot on a copy or project of the flooring materials. 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 10 Q Still your opinion? 11 A Yeah. 12 Q Hand what was your opinion? 12 A Yesh. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 cestimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 17 Q What was t	5	Q Did you have an opinion as to the cost to finish that?	5	A Again, historical experience on past projects of
8 A Experience, historical estimates, pricing similar in 9 scope and scale to what we witnessed or observed on site. 10 Q What was your opinion? 11 A \$5.250. 12 Q Is that still your opinion? 13 A Yes. 13 there? 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But	6	A Yeah.	6	similar size to arrive at that assumption.
9 scope and scale to what we witnessed or observed on site. 10 Q What was your opinion? 11 A \$5,250. 12 Q Is that still your opinion? 13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But 18 Q Again, that's haven'y nyi tile? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 26 Q Again, what's have an opinion as to this? 27 A Opinion was \$120,000. 30 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of material or the cost of the specific material, so I applied for a typical rate that we would see in a similar project from a rocks. 31 Cost 32 Q So based on a square footage allowance essentially? 4 A Correct, square footage allowance sesentially? 5 A Correct, square footage allowance essentially? 6 A This was \$50,000. 7 Confirm what's in there? 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance essentially? 10 Q I sthat reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 16 A Historical costs on other projects of similar size. 17 Q What was that opinion? 18 A this is the installal tool the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 19 Q Still your opinion?	7	Q How did you reach that opinion?	7	Q And what was your opinion as to the cost for the
10 Q What was your opinion? 11 A \$5.250. 12 Q Is that still your opinion? 11 A \$5.250. 12 Q Is that still your opinion? 13 A Yes. 13 there? 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 15 any finished materials within the inside of the building. 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But — 18 Q Again, that's luxury vinyl tile? 18 A Correct. It doesn't specifically say it on the line 19 A Correct. It doesn't specifically say it on the line 19 A Correct. It doesn't specifically say it on the line 10 term, but I've assumed that it's included within this 12 package. Typically I see that as part of one package when 12 we are putting together these projects. So that was how I 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as part of one package when 12 package. Typically I see that as par	8	A Experience, historical estimates, pricing similar in	8	installation of carpeting?
11 A Yes. 12 Q Is that still your opinion? 13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But 18 Q Again, that's luxury viryl file? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. Page 119 Page 121 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of some at the cost of the specific material, so I applied for a project of this type and scope? 2 A Spanion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of some at a similar project from a rocost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 A Yeah. 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 10 Q Still your opinion? 11 A Yes. 12 Q Painting and staining. What was thin the inside of the building, of the trails of the building, on the wild the deviation in this instance we included in the 12 Q Total specialities, in this instance we included in the 12 Q Total specialities, in this instance we included in the 12 Q Total specialities, in this instance was included allowance for flooring costs? 1 A Yes. 2 Did you have an opinion as to this? 2 A So So based on a square footage al	9	scope and scale to what we witnessed or observed on site.	9	A It was \$50,000.
12 Q Fainting and staining. What would all be included in 13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But 18 Q Again, that's luxury vinyl tile? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 26 Q Again, that's luxury vinyl tile? 27 A Opinion was \$120,000. 3 Q And how was that opinion? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific materials, but 16 a typical rate that we would see in a similar project from a 17 cost 18 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance essentially? 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yesh. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it icould be floor A or floor B, but it falls within that 15 there? 16 A Yesh. The painting and staining would be painting of the building. 16 whether that be drywall, block, or any other finish 17 materials. Typically in this instance we included an 18 allowance of \$15,000 just to cover any miscellaneous patches 18 allowance of \$15,000 just to cover any miscellaneous patches 18 allowance of \$15,000 just to cover any miscellaneous patches 18 allowance of \$15,000 just to cover any miscellaneous patches 18 allowance of \$15,000 just to cover any miscellaneous patches 18 lallowance of \$15,000 just to cover any miscellaneous patches 18 allowance of \$15,000 just to cover any miscellaneous patches 18 allowance of \$15,000 just to cover any miscellaneous patches 18 allowance of \$15,000 just to cover any miscellaneous patches 19	10	Q What was your opinion?	10	Q Still your opinion?
13 A Yes. 14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But — 18 Q Again, that's luxury vinyl tile? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 26 A Yes. 27 Page 119 1 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost — 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance essentially? 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. The painting and staining would be painting of 15 any finished materials within the inside of the building. 16 whether that be drywall, block, or any other finish 17 materials. Typically — in this instance we included an 18 allowance of \$15,000 just to cover any miscellaneous patches 19 that would be required throughout the building. 10 addition to finishing scope, we also included allowances to 10 touch up and repair any drywall patching that would be 12 required. 12 Q Is that typical for a project of this type and scope? 14 A Yesh. 15 Q Hant typically — in this instance we included an 18 allowance of \$15,000 just to cover any miscellaneous patches 19 that would be required throughout the building. 19 that would be required froighout the building. 10 and that was based on? 11 painting and staining? 12 A Yesh. 13 that typically — in this instance we included an duallowance of \$15,000 just to cover any miscellaneous patches 14 that would be required in the	11	A \$5,250.	11	A Yes.
14 Q Carpet (Materials). I assume I know what that is, but 15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's last the LVT. But - 18 Q Again, that's luxury vinyl tile? 18 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's last the LVT. But - 18 Q Again, that's luxury vinyl tile? 18 A I allowance of \$15,000 just to cover any miscellaneous patches 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 21 touch up and repair any drywall patching that would be required. 22 required. 23 Q Is that typical for a project of this type and scope? 24 A Yes. 25 Q And what was your ultimate opinion for the cost for 24 A Yes. 25 Q And what was your ultimate opinion for the cost for 24 A This particular one, I don't know exactly the type of 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost - 7 cost - 7 cost - 7 cost - 7 a This would be the material for postal boxes, mailboxes 8 Q So based on a square footage allowance yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance of oflooring costs? 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yeah. 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 18 A Sh,700. 19 Q Still your opinion? 19 Q Still your opinion?	12	Q Is that still your opinion?	12	Q Painting and staining. What would all be included in
15 can you confirm? 16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the L.VT. But - 18 Q Again, that's luxury vinyl tile? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. Page 119 1 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost - 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 19 Q Still your opinion? 10 What was that opinion formed? 11 footage allowance for flooring materials. 19 And that would be both carpet in the bedrooms and luxury 10 What was that opinion? 11 footage allowance for flooring materials. 11 flootage allowance for flooring materials. 11 flootage allowance for flooring materials. 12 Q What was that opinion? 13 Q S ob best case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line item? 16 Q Carpet install. Again, I think I know, but can you 17 Q What was that opinion? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury	13	A Yes.	13	there?
16 A This is the supply of the carpet in the bedroom areas. 17 I assume that it's also the LVT. But 18 Q Again, that's luxury vinyl tile? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically 1 see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 26 Q Mad what was supplied for a project of this type and scope? 27 A Ves. 28 Q So Hand how was that opinion? 29 A Opinion was \$120,000. 30 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance essentially? 10 Q Is that reasonable in your industry to give a square 11 footage allowance of pooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be even a point in the bedrooms and luxury 19 Q Still your opinion?	14	Q Carpet (Materials). I assume I know what that is, but	14	A Yeah. The painting and staining would be painting of
17 I assume that it's also the LVT. But 18 Q Again, that's luxury vinyl tile? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 26 Q And what was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be required throughout the building. So in addition to finishing scope, we also included allowances to 20 addition to finishing scope, we also included allowances to 21 touch up and repair any drywall patching that would be 22 required. 23 Q Is that typical for a project of this type and scope? 24 A Yes. 25 Q And what was your ultimate opinion for the cost for Page 119 Page 119 Page 121 1 painting and staining? 2 A S51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that po	15	can you confirm?	15	any finished materials within the inside of the building,
18 Q Again, that's luxury vinyl tile? 19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 26 A Opinion was \$120,000. 27 Q And what was that opinion? 28 A Opinion was \$120,000. 39 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance essentially? 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 that would be required throughout the building. So in 20 addition to finishing scope, we also included allowances to touch up and repair any drywall patching that would be text out to pand repair any drywall patching that would be text out to pand repair any drywall patching that would be text out to pand repair any drywall patching that would be text out to pand repair any drywall patching that would be text out to pand repair any drywall patching that would be text out to pand repair any drywall patching that would be text out to pand repair any drywall patching that would be text out to touch up and repair any drywall patching that would be text out to pand repair any drywall patching that would be text out to pand repair any drywall patching that would be bad repair any drywall patching that would be text out to touch	16	A This is the supply of the carpet in the bedroom areas.	16	whether that be drywall, block, or any other finish
19 A Correct. It doesn't specifically say it on the line 20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. Page 119 Page 119 Page 121 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 that would be required throughout the building. So in 20 addition to finishing scope, we also included allowances to 21 touch up and repair any drywall patching that would be 22 required. 23 Q Is that typical for a project of this type and scope? 24 A Yes. 25 Q And what was your ultimate opinion for the cost for Page 121 1 painting and staining? 2 A Splood. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 footage allowance for flooring costs? 12 Q So best case opinion? 13 Q So best case opinion? 14 A Yeah. 15 Q How did your eac	17	I assume that it's also the LVT. But	17	materials. Typically in this instance we included an
20 item, but I've assumed that it's included within this 21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. Page 119 1 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 20 addition to finishing scope, we also included allowance to 21 touch up and repair any drywall patching that would be 2 required. 22 required. 23 Q Is that typical for a project of this type and scope? 24 A Yes. 25 Q And what was your ultimate opinion for the cost for Page 121 1 painting and staining? 2 A S51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line item? 16 A Historical costs on other projects of similar size. 17 Q What was	18	Q Again, that's luxury vinyl tile?	18	allowance of \$15,000 just to cover any miscellaneous patches
21 package. Typically I see that as part of one package when 22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 26 Q And what was your ultimate opinion for the cost for Page 119 1 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 21 touch up and repair any drywall patching that would be 22 required. 23 Q Is that typical for a project of this type and scope? 24 A Yes. 25 Q And what was your ultimate opinion for the cost for 24 A Yes. 25 Q And what was spour ultimate opinion for the cost for 24 A Yes. 25 Q And what was spour ultimate opinion for the cost for 26 A S51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q Bob est case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line	19	A Correct. It doesn't specifically say it on the line	19	that would be required throughout the building. So in
22 we are putting together these projects. So that was how I 23 formed my assumption. 24 Q Did you have an opinion as to this? 25 A Yes. 26 Q And what was your ultimate opinion for the cost for Page 119 1 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 22 required. 23 Q Is that typical for a project of this type and scope? 24 A Yes. 25 Q And what was your ultimate opinion for the cost for Page 121 1 painting and staining? 2 A \$51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialities, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yesh. 15 Q How did your each your opinion as to this line item? 16 A Historical costs on other projects of similar size. 17 Q What was that opinion? 18 A \$8,700. 19 Q Still your opinion?	20	item, but I've assumed that it's included within this	20	addition to finishing scope, we also included allowances to
23 Q Is that typical for a project of this type and scope? 24 A Yes. 25 A Yes. 26 Q And what was your ultimate opinion for the cost for Page 119 1 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 23 Q Is that typical for a project of this type and scope? 24 A Yes. 25 Q And what was your ultimate opinion for the cost for Page 121 1 painting and staining? 2 A \$51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line item? 16 A Historical costs on other projects of similar size. 17 Q What was that opinion? 18 A \$8,700. 19 Q Still your opinion?	21	package. Typically I see that as part of one package when	21	touch up and repair any drywall patching that would be
24 Q Did you have an opinion as to this? 25 A Yes. Page 119 Page 121 1 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury Page 129 Page 129 Page 129 Page 129 A Yes. 25 Q And what was your ultimate opinion for the cost for Page 121 1 painting and staining? 2 A \$51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line item? 16 A Historical costs on other projects of similar size. 17 Q What was that opinion? 18 A \$8,700. 19 Q Still your opinion?	22	we are putting together these projects. So that was how I	22	required.
Page 119 Page 121 1 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury Page 121 1 painting and staining? 2 A \$51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line item? 16 A Historical costs on other projects of similar size. 17 Q What was that opinion? 18 A \$8,700. 19 Q Still your opinion?	23	formed my assumption.	23	Q Is that typical for a project of this type and scope?
Page 119 Page 121 1 Q What was that opinion? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury Page 121 1 painting and staining? 2 A \$51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line item? 16 A Historical costs on other projects of similar size. 17 Q What was that opinion? 18 A \$8,700. 19 Q Still your opinion?	24	Q Did you have an opinion as to this?	24	A Yes.
1 painting and staining? 2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 10 Q Still your opinion? 11 painting and staining? 2 A \$51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line item? 16 A Historical costs on other projects of similar size. 17 Q What was that opinion? 18 A \$8,700.	25	A Yes.	25	Q And what was your ultimate opinion for the cost for
2 A Opinion was \$120,000. 3 Q And how was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that would be both carpet in the bedrooms and luxury 10 A S51,000. 2 A S51,000. 3 Q And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line item? 16 A Historical costs on other projects of similar size. 17 Q What was that opinion? 18 A \$8,700. 19 Q Still your opinion?		Page 119		Page 121
3 Q And thow was that opinion formed? 4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 7 Cost 7 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. Again, I think I know, but can you 17 confirm what's in there? 18 A This is the installation of the flooring materials. 19 And that was based on? 4 A Experience and historical estimating. 5 Q Postal specialties, bike rack, door markers. What 6 would all be included in there? 7 A This would be the material for postal boxes, mailboxes 8 essentially. I did not include any additional cost for bike 9 racks or door markers or anything of that nature. I didn't 10 know what was there. I do know that postal boxes are 11 required for occupancy. So that's what we included in the 12 cost. 13 Q So best case opinion? 14 A Yeah. 15 Q How did your each your opinion as to this line item? 16 A Historical costs on other projects of similar size. 17 Q What was that opinion? 18 A \$8,700. 19 Q Still your opinion?	1	-	1	painting and staining?
4 A This particular one, I don't know exactly the type of 5 material or the cost of the specific material, so I applied 6 a typical rate that we would see in a similar project from a 7 cost 7 Cost 8 Q So based on a square footage allowance essentially? 9 A Correct, square footage allowance, yeah. 10 Q Is that reasonable in your industry to give a square 11 footage allowance for flooring costs? 12 A Yeah. And generally what that does is allows for some 13 flexibility when we're putting together an estimate to say 14 it could be floor A or floor B, but it falls within that 15 estimate. 16 Q Carpet install. We assume that the installation would be in the general work and labor. So this would be supply only for the 174 or sorry, 147 blinds. It would be one at each window essentially. Q Cost for supplying those blinds? A \$30,000. Q Conveying system. I believe you earlier indicated this was the elevator?
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	Q Do you have an opinion as to the cost for this? A \$1,000. Q And that was based on what? A It was based on historical experience and past estimates. MR. HUSHKA: If I may indulge the Court and Mr. VerStandig, if I asked for his opinion in that and if he answers, can he clarify if he has anything different, or do we want to keep clarifying this for the record for every line item as we continue to go? MR. VERSTANDIG: I have a hunch that the witness was well attuned to a certain objection and we're going to get the same response. I'm fine foregoing the standard question at this point. THE COURT: Okay. Then you may proceed. MR. VERSTANDIG: Thank you. BY MR. VERSTANDIG: Q Next line item that has a price is sorry, Closet Shelving. What's included there? A This would be the shelving for the essentially the closets in the residential yeah, bedroom closets. And it's typically a wire shelving that is, yeah, bolted to the	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	site and there were a number of units that the fourth floor had the units on or in the units but hadn't been installed. So there's a certain labor that would be associated with the installation of them. But we assumed that the other two floors would need to be supplied and installed. And so that's how we arrived at the estimate. Q And what was the estimate? A \$160,000. Q Next line item, Window Treatments. What would be in there? A This would be the window treatments that each of the windows at the residential apartments. And so that would be supplying and installing I take that back. It would be supply-only. We assume that the installation would be in the general work and labor. So this would be supply only for the 174 or sorry, 147 blinds. It would be one at each window essentially. Q Cost for supplying those blinds? A \$30,000. Q Conveying system. I believe you earlier indicated this was the elevator? A This is the elevator, yeah. So assuming that let's
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q Do you have an opinion as to the cost for this? A \$1,000. Q And that was based on what? A It was based on historical experience and past estimates. MR. HUSHKA: If I may indulge the Court and Mr. VerStandig, if I asked for his opinion in that and if he answers, can he clarify if he has anything different, or do we want to keep clarifying this for the record for every line item as we continue to go? MR. VERSTANDIG: I have a hunch that the witness was well attuned to a certain objection and we're going to get the same response. I'm fine foregoing the standard question at this point. THE COURT: Okay. Then you may proceed. MR. VERSTANDIG: Thank you. BY MR. VERSTANDIG: Q Next line item that has a price is sorry, Closet Shelving. What's included there? A This would be the shelving for the essentially the closets in the residential yeah, bedroom closets. And it's typically a wire shelving that is, yeah, bolted to the wall with some support. And we applied a typical rate that	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	site and there were a number of units that the fourth floor had the units on or in the units but hadn't been installed. So there's a certain labor that would be associated with the installation of them. But we assumed that the other two floors would need to be supplied and installed. And so that's how we arrived at the estimate. Q And what was the estimate? A \$160,000. Q Next line item, Window Treatments. What would be in there? A This would be the window treatments that each of the windows at the residential apartments. And so that would be supplying and installing I take that back. It would be supply-only. We assume that the installation would be in the general work and labor. So this would be supply only for the 174 or sorry, 147 blinds. It would be one at each window essentially. Q Cost for supplying those blinds? A \$30,000. Q Conveying system. I believe you earlier indicated this was the elevator? A This is the elevator, yeah. So assuming that let's say this is 60 percent complete or whatever the original
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	Q Do you have an opinion as to the cost for this? A \$1,000. Q And that was based on what? A It was based on historical experience and past estimates. MR. HUSHKA: If I may indulge the Court and Mr. VerStandig, if I asked for his opinion in that and if he answers, can he clarify if he has anything different, or do we want to keep clarifying this for the record for every line item as we continue to go? MR. VERSTANDIG: I have a hunch that the witness was well attuned to a certain objection and we're going to get the same response. I'm fine foregoing the standard question at this point. THE COURT: Okay. Then you may proceed. MR. VERSTANDIG: Thank you. BY MR. VERSTANDIG: Q Next line item that has a price is sorry, Closet Shelving. What's included there? A This would be the shelving for the essentially the closets in the residential yeah, bedroom closets. And it's typically a wire shelving that is, yeah, bolted to the wall with some support. And we applied a typical rate that we see for projects that are similar to this to arrive at	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	site and there were a number of units that the fourth floor had the units on or in the units but hadn't been installed. So there's a certain labor that would be associated with the installation of them. But we assumed that the other two floors would need to be supplied and installed. And so that's how we arrived at the estimate. Q And what was the estimate? A \$160,000. Q Next line item, Window Treatments. What would be in there? A This would be the window treatments that each of the windows at the residential apartments. And so that would be supplying and installing I take that back. It would be supply-only. We assume that the installation would be in the general work and labor. So this would be supply only for the 174 or sorry, 147 blinds. It would be one at each window essentially. Q Cost for supplying those blinds? A \$30,000. Q Conveying system. I believe you earlier indicated this was the elevator? A This is the elevator, yeah. So assuming that let's say this is 60 percent complete or whatever the original estimation of what the elevator installation was, that they
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	Q Do you have an opinion as to the cost for this? A \$1,000. Q And that was based on what? A It was based on historical experience and past estimates. MR. HUSHKA: If I may indulge the Court and Mr. VerStandig, if I asked for his opinion in that and if he answers, can he clarify if he has anything different, or do we want to keep clarifying this for the record for every line item as we continue to go? MR. VERSTANDIG: I have a hunch that the witness was well attuned to a certain objection and we're going to get the same response. I'm fine foregoing the standard question at this point. THE COURT: Okay. Then you may proceed. MR. VERSTANDIG: Thank you. BY MR. VERSTANDIG: Q Next line item that has a price is sorry, Closet Shelving. What's included there? A This would be the shelving for the essentially the closets in the residential yeah, bedroom closets. And it's typically a wire shelving that is, yeah, bolted to the wall with some support. And we applied a typical rate that	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	site and there were a number of units that the fourth floor had the units on or in the units but hadn't been installed. So there's a certain labor that would be associated with the installation of them. But we assumed that the other two floors would need to be supplied and installed. And so that's how we arrived at the estimate. Q And what was the estimate? A \$160,000. Q Next line item, Window Treatments. What would be in there? A This would be the window treatments that each of the windows at the residential apartments. And so that would be supplying and installing I take that back. It would be supply-only. We assume that the installation would be in the general work and labor. So this would be supply only for the 174 or sorry, 147 blinds. It would be one at each window essentially. Q Cost for supplying those blinds? A \$30,000. Q Conveying system. I believe you earlier indicated this was the elevator? A This is the elevator, yeah. So assuming that let's say this is 60 percent complete or whatever the original

Page 33 of 108
Page 126

- 1 completed, test the car, balance the car, make sure all the
- 2 inspections are completed, and then do the complete turnover
- 3 of the elevator system.
- 4 Q Cost for all that work?
- 5 A \$90,000.
- 6 Q Building Sprinkler. What's in there?
- 7 A This would be any related work associated with the
- 8 building sprinkler system throughout the whole building.
- 9 The majority of the work appeared to be finished based on
- 10 our observations other than finishing the -- trimming out
- 11 the heads in the units. We also assumed that the system was
- 12 not filled because it had not been tagged and inspected. So
- 13 we -- our assumption was that a building sprinkler
- 14 subcontractor would need to come onto the site, fill the
- 15 system, test it, witness the test with the fire department
- 16 and then turn over the system.
- 17 Q The cost for that work?
- 18 A \$15,000.
- 19 Q Plumbing. What would all be included in that to get
- 20 The Ruins completed?

\$100,000.

done as far as that scope.

Cost?

\$25,000.

0

11

13

15 Q

16 A

19 A

17 Q

- 21 A Installation of all of the toilets, sinks, faucets,
- 22 hooking up the sinks and faucets. Anything related to
- 23 showers, valves, sinks. All plumbing-related scope of work
- 24 within the residential areas. In addition to that, there
- 25 are also connections and water piping and items that needed

1 to be completed that we observed in the commercial areas and

in the garage areas. So in addition to trimming out all the

units, there was still some infrastructure that needed to be

Trimming out any of those bathroom fans within the

unclear whether all of that scope of work had been completed

in place and installed within those lower two levels.

HVAC. What would be included there?

9 residential units. I think primarily the scope of work

pertained to the first floor in the common areas. It was

at the time of our observations. So we assumed that there

was a substantial amount of work there that needed to be

Electrical system -- Electrical Security System.

Again, this is assuming that there is some scope of

work that needed to be completed within the footprint of the

building to get the building operational. So electrical is

observing, visual observing, it's hard to determine exactly

what might be a potential discrepancy or issues specifically

22 a little bit more unclear in terms of how we arrive to a

23 number just because we can't go in there as a -- with

The price to get that work done?

- 1 regarding water penetration if there is any of those systems
- 2 that has -- that have failure due to water. I can't test
- 3 that as observing, so I have to assume that there may be
- 4 some work associated with that.
- 5 In addition, down in the main electrical room, it was
- 6 packed fairly tightly in there. And I know that there's
- 7 restrictions and requirements that there's distances from
- $8\,\,$ main panels to other items within that electrical room. And
- 9 should there have been any issues or discrepancy that needed
- 10 to be corrected there, there obviously would be significant
- 11 cost with that. There's also cost associated with
- 12 finalizing the elevator and working with the elevator
- 13 supplier to test, terminate, and finalize the elevator. So
- 14 a fairly substantial scope of work in my opinion to get that
- 15 completely finished and ready for occupancy.
- 16 Q And your opinion as to the price to finish that scope
- 17 of work?
- 18 A \$125,000.
- 19 Q Last line item with a price associated with it, Paving
- 20 and Sidewalks. What was that?
- 21 A It was just any exterior concrete work. Primarily
- 22 striping. We covered the concrete work on the beginning
- 23 part of this. So this would just be striping the parking
- 24 lot and striping a handicapped stall. So it's based on kind
- 25 of our experience on past projects.

Page 127

- Q All right. Price associated with that?
- 2 A \$2,750.
- 3 MR. HUSHKA: Sharon, if we can scroll up a little
- 4 bit before we get to the conclusion. Scroll up. Sorry.
- 5 BY MR. HUSHKA:
- 6 Q Mr. Gehrtz, I know we've gone through these, but what I
- 7 want you to help explain for the Court is in your opinion
- 8 what subs or crews would be required to perform these works
- 9 or how many different -- essentially how many different
- 10 groups we would need to get on site to get this thing
- 11 completed in a timely package. So I don't know if you --
- 12 I'll defer to you if it's best to go line-by-line and
- 13 explain who, or if you can just kind of give an overview of
- 14 the Court on how many or who you think.
- 15 A I guess in general terms, the way I view this, every
- 16 one of these line items would be a separate subcontractor.
- 17 There might be some overlap with a general work and labor
- 18 contractor that may pick up some of these packages and
- 19 combine some of these packages. But in my experience, each
- 20 one of these packages would typically be a separate
- 21 subcontractor wherever there is a line item for cost to
- 22 complete.
- 23 Q So it's your opinion that over a dozen subcontractors
- 24 would be needed to finish The Ruins in a professional
- 25 manner?

33 (Pages 126 - 129)

Page 129

Page 130 1 A Yeah. 2 Q Did you have an opinion regarding the ultimate cost to 3 complete The Ruins development? 4 A Yes. 5 Q And what was that opinion? 6 A \$1,605,967. 7 Q Is that still your opinion today? 8 A Yes. 9 Q Included in that is there any cost associated with 10 remediating any deficiencies that have been noted or any 11 water penetration issues? 12 A No, there is not. 13 Q Mr. Gebrtz, based on your training and experience, how 14 long would it take for confusined of these subconnectors. 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had a untimized checkbook today, how 18 long would it take for you to extually line everything up to 19 get ity properly experted and in the proper order and 20 them wrapped up and a bow tied so to speak? 21 A I mean, I would – my best estimation would be three to 22 four trumbus samming thers a month that would be required 23 to get any additional materials on site to complete the 24 months. Bard assuming the was month that would be required 25 to get any additional materials on site to the tree to 26 more than a sauming the associated with 27 Q Do subs typically line up projects in advance and ne 28 they always available? 29 A They do line up in advance and they are not typically 29 a They do line up in advance and they are not typically 29 a They do line up in advance and they are not typically 29 a They do line up in advance and my work. Idealy norn than is it 31 months in advance of any work. Idealy norn than is it 32 months in advance of any work. Idealy norn than is it 33 months in advance of any work. Idealy norn than is it 34 months. Bart it these all the experience, how 35 materials on the appropriate in advance of any work. Idealy norn than is it 36 p Q Are Boos all still your opinions? 39 A Yes, they are. 30 Part Republication of this projection in the proper order and supplied to complete the work right them and there. 40 C and that as a secure of the projection in a		Document Page 34 (of 1	.08
2 Q Did you have an opinion regarding the ultimate cost to 3 complete The Ruins development? 4 A Yes. 5 Q And what was that opinion? 6 A \$1,695,967. 7 Q Is that still your opinion today? 8 A Yes. 9 Q Included in that is there any cost associated with 10 remediating any deficiencies that have been noted or any 11 water penetration issues? 12 A No, there is not. 13 Q Mr. Gehrtz, based on your training and experience, how 14 long would it take to conditionate all off these subcontractors 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an unfinitied theckhook today, how 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a bow fied so to speak? 10 A Is may hould—my best estimation would be required 21 to get any additional materials on site to complete the 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 materials are there to finish 3 everything to complete the work right then and there. 2 months after all the materials are there to finish 3 everything to complete the work right then and there. 4 A C and that's assuming that the subs that are necessary 5 are available to complete the work right then and there. 5 A Correct. 6 A Correct. 6 A Correct. 7 Q Do subst typically line up projects in advance and a result of the materials are there to finish 3 everything to complete the work right then and there. 6 A Correct. 9 A They do line up in advance and they are not typically 10 readily available if schedules change. 11 Q How far in advance do they awally the timing up? 22 A Typically what we see is anywhere from three to its and the proper order and a three to the project of the particular conditions there it to provide the total projects in advance and they are not typically 10 readily available if schedules change. 12 Q No but the transfer of may work, Ideally more than six 14 months. But it doe		Page 130		Page 132
3 THE COURT: The Court receives 406 in Document 60-4 A Yes. 5 Q And what was that opinion? 6 A \$1,695,967, 7 Q Is that still your opinion today? 8 A Yes. 9 Q Included in that is there any cost associated with remoditating any deficiencies that have been noted or any little remoditating any deficiencies that have been noted or any little remoditating any deficiencies that have been noted or any little remoditating any deficiencies that have been noted or any little remoditating any deficiencies that have been noted or any little remoditating and experience, how little long would it take to coordinate all of these subcontractors for equired to finish this work, to get all the necessary little long would it take to coordinate all of these subcontractors for genitred to finish this work, to get all the necessary of the long would it take to coordinate all of these subcontractors for equired to finish this work, to get all the necessary of the long would it take to coordinate all of these subcontractors for genitred to finish this work, to get all the necessary of the long would it take to coordinate all of these subcontractors for genitred to make a project, and your investigation of this project, did you little long would it take to coordinate all of these subcontractors for genitred times about water damage and water penetration. 9 Do you helieve that remediation efforts we necessary to fix to be the issues and any damage provided to the building? 11 A In my opinion, yes, it is. 12 Q A year of your investigation of this project, did you little down any of your investigation of this project, did you little contractors for your training and 20 then wrapped up and a bow tied so to speak? 15 A Yes. 15 A Yes. 15 Q A Yes foundation. 15 required to mish this work, by the due to the building? 16 A In my opinion, yes, it is. 17 Q O what is that opinion as to what the cost would be required to mish the project did you little to the building? 18 A Yes. 19 Q A that of your due and the project did you little to hear any of yo	1	A Yeah.	1	MR. VERSTANDIG: Your Honor, no objection to Page
4 A Yes. 5 Q And what was that opinion? 6 A \$1,695,967. 7 Q Is that still your opinion today? 8 A Yes. 9 Q Included in that is there any cost associated with 10 remediating any deficiencies that have been noted or any 11 water penetration issues? 12 A No, there is not. 13 Q Mr. Gehrtz, bused on your training and experience, how 14 long would it take to coordinate all of these subcontractors 15 required to finish his work, to get all the necessary 16 materials on site, and then to ultimately complete the 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a how tied so to speak? 21 A I mean, I would — my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials as on site so completes the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what 1 we have on the site. And then I would say two to three 2 months after all the materials are there to finish 3 everything to complete in. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the work right then and there. 4 Q Do subs typically line up projects in advance and they are not typically readily available if schedules change. 11 Q How far in advance of any work. Ideally more than six 14 months. But it doesn't always work that way. 15 Q Fair enough. Mr. Gehrtz, the opinions that provided to that a provided to the value of the part is a proper or the projects and the part is the projects in indivance and they are not typically for readily available if schedules change. 16 Q Material the materials are there to finish 19 get it properly superveed in and in the provide and a transplant of the projects in advance and they are not typically for readily available if schedules change. 19 Q They do line up in advance and they are not typically for readily available if schedules change. 10 Q Fair enough. Mr. G	2	Q Did you have an opinion regarding the ultimate cost to	2	406.
5 Q And what was that opinion? 6 A \$1,095,967. 7 Q Is but still your opinion today? 8 A Yes. 9 Q Included in that is there any cost associated with 10 remediating any deficiencies that have been noted or any 11 water penetration issues? 12 A No, there is not. 13 Q Mr. Gebrtz, based on your training and experience, how 14 long would it take to conclinate all of these subcontractors 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an unlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it propely sequenced in and in the proper roter and 20 then wrapped up and a bow tied so to speak? 21 A I mean, I would — my best estimation would be three to 22 four months assuming thers a month hat would be required 23 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what Page 131 1 we have on the site. And then I would asy two to three 2 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming thet is the substitute and there. 5 A Correct. 7 Q Do subs typically line up projects in advance and are 4 they always available? 9 A They do line up in advance and they are not typically 10 readily available? 11 Q Hoos fin a davance of any work, Ideally more than is: 12 months, air does al always work that way, 13 months in davance of one you training and 14 experience, were those based upon your training and 15 experience in construction management? 16 offered Ecr 6-01. Page 406 as a summany exhibit under 107. I 20 A Yes, they are. 21 MR. HUSHKA: Objection, foundation. You know, we 22 benefit some foundation about - 20 pointion, I would like to hear more. So I'm going to 3 sustain. 4 Q And that's assuming that the subs that are necessary 2 of princing I would an extended the substitute of the complete the work right then and	3	complete The Ruins development?	3	THE COURT: The Court receives 406 in Document 60-
6 A \$ 1.695,967. 7 Q Is that still your opinion today? 8 A Yes. 9 Q Included in that is there any cost associated with 10 remediating any deficiencies that have been noted or any 11 water penetration issues? 12 A No, there is not. 13 Q Mr. Gehrtz, based on your training and experience, how 14 long would it take for conditate all of these subcontractors 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an untimited checkhook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a bow tied so to speak? 21 A I mean, I would — my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what 1 we have on the site. And then I would say two to three 2 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the vork right then and there. 6 A Correct 7 Q Do subs typically line up projects in advance and are 8 they always available? 9 A They do line up in advance and they are not typically 10 readily available if schedules change. 11 Q How far in advance do they usually line things up? 12 A Typically what we see is anywhere from there to six 13 months. But it doesn't always work that way. 14 (Q Are those all still your opinions? 15 (Q Mr. Gehtzt, we've talked this morning at a few different embers and any dwate gand water damage and the particular 2 opinion, I would like to bear more. So I'm poing to 3 sustain. 14 (Q Mr. Gehtzt, whe remediation of this projection is not hea	4	A Yes.	4	1.
7 Q Is that still your opinion today?	5	Q And what was that opinion?	5	(Exhibit 60-1 admitted into evidence)
8 A Yes. 9 Q Included in that is there any cost associated with 10 remediating any deficiencies that have been noted or any 11 water penetration issues? 12 A No, there is not. 13 Q Mr. Gehrtz, based on your training and experience, how 14 long would it take to coordinate all of these subcontractors 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an unlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then warped up and a bow ties do so speak. 21 A I mean, I would — my best estimation would be three to 22 four months assuming there's a month that would be required 21 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the work right then and there. 5 A Correct. 6 A Correct. 7 Q Do subst Spically line up projects in advance and are 8 they always available? 9 A They do line up in advance and they are not typically readily available if schedules change. 11 Q How far in advance do they usually line things up? 12 A Typically what we see is anywhere from three to six months in advance of any work. Ideally more than six months. But it doesn't always work that way. 15 Q Fair enough. Mr. Gehrtz, the opinions that provided toldy 2 offer ECT 60-1, page 406 as a summary exhibit under 107. 1 Selectives from the provide to 2 septence in construction management? 18 A Yes. 19 Q A ret hose all still your opinions? 20 A Yes, they are. 21 MR. HUSHKA: Optor Honor, at this time we would 22 offer ECT 60-1, Page 406 as a summary exhibit under 107. 1 Selectives from three to six and the province of work, does the construction industry sometimes 199 good of work typic to line up that 22 selection in foun	6	A \$1,695,967.	6	BY MR. HUSHKA:
9 Do you believe that remediation efforts are necessary to fix 10 remediating any deficiencies that have been noted or any 11 water penetration issues? 12 A No, there is not. 13 Q Mr. Gehrtz, based on your training and experience, how 14 long would it take to coordinate all off these subcontractors 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an unlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 10 then wrapped up and a bow tied so to speak? 12 A I mean, I would — my best estimation would be three to 12 four months assuming there's a month that would be required 13 to get any additional materials on site, to complete the 14 complete such remediation efforts? 15 A Yes. 16 Q What is that opinion? 17 MR. HUSHKA: Objection, foundation. You Honor, 18 previewing, it's going — it would at least seem that it's 19 about to be a quote from a third party. 20 THE COURT: Yeah. I'm not hearing that ye. But 21 your foundation was not — 22 MR. VERSTANDIG: The objection is not hearsay. 23 It's lack of foundation. You know, we 24 heard some foundation about remediation, but I think for the 25 four months and then I would say two to three 26 months after all the materials are there to finish 27 everything to completion. 28 A Correct. 29 Q Do subs typically line up projects in advance and are 39 A They do line up in advance and they are not typically 29 A They do line up in advance of othey usually line things up? 20 A They do line up in advance of othey usually line things up? 21 A Typically what we see is anywhere from three to six 23 months in advance of othey usually line things up? 24 A Typically what we see is anywhere from three to six 25 months in advance of othey usually line things up? 26 A Typically what we see is anywhere from three to six 27 months in advance of othey usually line things up? 28 A Typically what we see	7	Q Is that still your opinion today?	7	Q Mr. Gehrtz, we've talked this morning at a few
10 remediating any deficiencies that have been noted or any 11 water penetration issues? 12 A No, there is not. 13 Q Mr. Gehrtz, based on your training and experience, how 14 long would it take to coordinate all of these subcontractors 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an unlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a bow tied so to speak? 21 A I mean. I would — my best estimation would be three to 22 four months assuming there is a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what 2 everything to completion. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the 8 they always available? 9 A They do line up in advance and they are not typically 10 readily available? if schedules change. 11 Q How far in advance of oney work. Ideally more than six 14 months. But it doesn't always work that way. 15 Q Fair enough, Mr. Gehrtz, the opinions that peroprioside today 18 nombs in advance of any work. Ideally more than six 19 Q Are those all still your opinions? 20 A Yes, they are. 21 MR. HUSHKA: Your Honor, at this time we would 22 offee ECF 60-1, Page 406 as a summary exhibit under 107. I eshericace in construction management? 23 to get error of the water damage and water damage in The 18 most in advance of any work ideally more dath six 18 type of work, does the construction midustry sometimes 19 Q Are those all still your opinions that he provided today 20 offee ECF 60-1, Page 406 as a summary exhibit under 107. I eshericace in construction management? 21 offee ECF 60-1, Page 406 as a summary exhibit under 107. I eshericace in construction management? 22 offee ECF 60-1, Page 406 as a sum	8	A Yes.	8	different times about water damage and water penetration.
11 water penetration issues? 12 A No, there is not. 13 Q Mr. Gehrtz, based on your training and experience, how 14 long would it take to coordinate all of these subcontractors 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an ultimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a bow tied so to speak? 21 A I mean, I would — my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what 2 work have on the site. And then I would say two to three 2 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 3 are available to complete the work right then and there. 6 A Correct. 7 Q Do subst typically line up projects in advance and are 8 they always available? 9 A They do line up in advance and they are not typically 10 readily available if schedules change. 11 Q How far in advance do they usually line things up? 12 A Typically what we see is anywhere from three to six 3 months in advance of they usually line things up? 14 A Typically what we see is anywhere from three to six 3 months in advance of they usually more than six 14 months. But it doesn't always work that way. 15 Q Fair enough. Mr. Gehrtz, the opinions that you've 16 offered here, were those based upon your training and 17 experience in construction management? 18 A Yes. 19 Q A re those all still your opinions? 20 A Yes, they are. 21 MR. HUSHKA: Your Honor, at this time we would 22 offer ECF 60-1, Page 406 as a summary exhibit under 107. 1 25 believe it summarizes the opinions that how the formation in the summarizes the opinions that how the fo	9	Q Included in that is there any cost associated with	9	Do you believe that remediation efforts are necessary to fix
12 Q Mr. Chertz, based on your training and experience, how 13 Q Mr. Cehrtz, based on your training and experience, how 14 long would it take to coordinate all of these subcontractors 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an unlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a bow tied so to speak? 21 A I mean, I would — my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say tow to three 25 months after all the materials are there to finish 26 everything to complete to. 37 A Coyou have an opinion as to what the cost would be to complete the work right that are necessary 38 materials that are necessary or doing an accounting of what 19 project? Assuming that the subs that are necessary 21 materials that are necessary or doing an accounting of what 10 get it properly sequenced in and in the proper order and 22 to four months assuming that the subs that are necessary 23 materials that are necessary or doing an accounting of what 11 we have on the site. And then I would say two to three 22 months after all the materials are there to finish 3 everything to complete the 3 everything to complete to. 4 Q And that's assuming that the subs that are necessary 4 Q Do subs typically line up projects in advance and are 4 they always available? 19 A They do line up in advance of any work. right then and there. 4 A They do line up in advance of any work. Ideally more than six 4 months. But it doesn't always work that way. 15 Q Fair enough. Mr. Gehrtz, the opinions that you've 16 offered here, were those based upon your training and 17 experience in construction management? 18 A Yes. 19 Q A ret hose all still your opinions? 20 A Yes, they are. 21 MR. PUSHK	10	remediating any deficiencies that have been noted or any	10	both the issues and any damage provided to the building?
13 - do you have an opinion as to what the cost would be to 14 long would it take to coordinate all of these subcontractors 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an unlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a bow tied so to speak? 12 A I mean, I would — my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what 1 we have on the site. And then I would say two to three 2 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 3 are available to completion where the sthey always available? 10 readily available if schedules change. 11 Q How far in advance do they usually line things up? 12 A Typically what we see is anywhere from three to six 13 months in advance of any work. Ideally more than six 14 months. But it doesn't always work that way. 15 Q Fair enough. Mr. Gehrtz, the opinions that you've 16 offered here, were those based upon your training and 17 experience in construction management? 18 A Yes. 19 Q A ree those all still your opinions? 20 A Yes, they are. 21 MR. HUSHKA: Your Honor, 18 A Yes. 21 MR. HUSHKA: Objection, foundation. Your Honor, 18 projects in advanced and ree there to a quote from a third party. 22 If Is lack of foundation. You know, we 23 list lack of foundation. You know, we 24 may be a foundation about remediation, but I think for the 24 installation. So I would say two to three 25 list lack of foundation about remediation, but I think for the 26 months and water damage in The 30 months in advance of they usually line things up? 19 A They do line up in a	11	water penetration issues?	11	A In my opinion, yes, it is.
14 complete such remediation efforts? 15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an unlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a bow tied so to speak? 21 A I mean, I would — my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say now month of acquiring any 25 materials that are necessary or doing an accounting of what	12	A No, there is not.	12	Q As part of your investigation of this project, did you
15 required to finish this work, to get all the necessary 16 materials on site, and then to ultimately complete the 17 project? Assuming you had an unlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 them wrapped up and a bow tied so to speak? 21 A I mean, I would - my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what 26 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the work right then and there. 6 A Correct. 7 Q Do subst typically line up projects in advance and are 8 they always available? 9 A They do line up in advance and they are not typically 10 readily available if schedules change. 11 Q How far in advance of any work. Ideally more than six 13 months in advance of any work. Ideally more than six 14 months. But it doesn't always work that way. 15 Q Fair cough, Mr. Gehrz, the opinions that you've 16 offered here, were those based upon your training and 17 experience in construction management? 18 A Yes. 20 A Yes, they are. 21 MR. HUSHKA: Objection, foundation. Your Honor, 18 previewing, it's going – it would at least seem that it's about to be a quote from a third party. 18 about to be a quote from a third party. 19 about to be a quote from a third party. 11 BLOURT: Yeah. I'm not hearing that yet. But 22 pour foundation was not - 23 It's lack of foundation. 24 THE COURT: It's lack of foundation. 25 It's lack of foundation. 26 Page 133 1 purposes of understanding the scope of the particular 2 opinion, I would like to hear more. So I'm going to sustain. 4 MR. HUSHKA: Certainly, Your Honor. 5 BY MR. HUSHKA: 6 Q Mr. Gehrz, what remediation efforts do you belie	13	Q Mr. Gehrtz, based on your training and experience, how	13	do you have an opinion as to what the cost would be to
16 materials on site, and then to ultimately complete the 17 project? Assuming you had an untlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a bow tied so to speak? 21 A I mean, I would — my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what Page 131 1 we have on the site. And then I would say two to three 2 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the work right then and there. 6 A Correct. 7 Q Do substypically line up projects in advance and are 8 they always available? 9 A They do line up in advance and they are not typically 10 readily available if schedules change. 11 Q How far in advance do they usually line things up? 12 A Typically what we see is anywhere from three to six 13 months in advance of any work. Ideally more than six 14 months. But it doesn't always work that way. 15 Q Fair enough. Mr. Gehrtz, the opinions that you've 16 offered here, were those based upon your training and 17 experience in construction management? 18 A Yes. 21 MR. HUSHKA: Objection, foundation. 22 Jour foundation as a theat least seem that it's 22 pour foundation was not 23 lifs lack of foundation. 24 THE COURT: It's lack of foundation. You know, we 25 heard some foundation about remediation, but I think for the 26 primary available to complete the work right then and there. 27 Q Do substypically line up projects in advance and are 28 they always available? 29 A They do line up in advance and they are not typically 20 readily available if schedules change. 21 Q How far in advance of any work. Ideally more than six 21 months in advance of any work. Id	14	long would it take to coordinate all of these subcontractors	14	complete such remediation efforts?
17 project? Assuming you had an unlimited checkbook today, how 18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 them wrapped up and a bow fied so to speak? 21 A I mean, I would my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what Page 131 1 we have on the site. And then I would say two to three 2 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the work right then and there. 6 A Correct. 7 Q Do subs typically line up projects in advance and are 8 they always available? 9 A They do line up in advance and they are not typically 10 readily available if schedules change. 11 Q How far in advance do they usually line things up? 12 A Typically what we see is anywhere from three to six 13 months in advance of any work. Ideally more than six 14 months. But it doesn't always work that way. 15 Q Fair enough. Mr. Gebrtz, the opinions that you've 16 offered here, were those based upon your training and 17 experience in construction management? 18 A Yes. 21 MR. HUSHKA: Objection, foundation. 22 quote from a third party. 22 Journ foundation was not 23 daylot foundation. 24 THE COURT: It's lack of foundation. You know, we 25 heard some foundation about remediation, but I think for the 26 purposes of understanding the scope of the particular 2 opinion, I would like to hear more. So I'm going to 3 sustain. 4 MR. HUSHKA: Objection foundation. 21 Place COURT: Veah. I'm not hearing that yet. But 22 your foundation as not 23 MR. PUSHKA: Objection foundation. 24 THE COURT: It's lack of foundation. 25 It's lack of foundation. 26 It's Low Counties the scope of the particular 2 opinion, I would like to hear more.	15	required to finish this work, to get all the necessary	15	A Yes.
18 long would it take for you to actually line everything up to 19 get it properly sequenced in and in the proper order and 20 then wrapped up and a bow tied so to speak? 21 A I mean, I would — my best estimation would be three to 22 four months assuming there's a month that would be required 23 to get any additional materials on site to complete the 24 installation. So I would say one month of acquiring any 25 materials that are necessary or doing an accounting of what 1 we have on the site. And then I would say two to three 2 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the work right then and there. 6 A Correct. 7 Q Do subs typically line up projects in advance and are 8 they always available? 9 A They do line up in advance and they are not typically 10 readily available if schedules change. 11 Q How far in advance do they usually line things up? 12 A Typically what we see is anywhere from three to six 13 months. But it doesart always work that way. 15 Q Fair enough. Page 131 Page 131 Page 133 we have on the site. And then I would say two to three months after all the materials are there to finish everything to completion. Q And that's assuming that the subs that are necessary are available to complete the work right then and there. A Correct. Q Do subs typically line up projects in advance and are they always available? A They do line up in advance and they are not typically readily available if schedules change. How far in advance of they usually line things up? A Typically what we see is anywhere from three to six months in advance of any work. Ideally more than six months. But it doesn't always work that way. Q Fair enough. Mr. Gehrtz, the opinions that you've offered here, were those based upon your training and offered here, were those based upon your training and offered here, were those lastill your opinions? A Yes. A Yes. A Wes. Bage 133 purposes of understanding the scope of the particular opinion, I would like to hear more. So I'm going to sustain. MR. HUSHKA: Certainly, Your Honor. By MR. HUSHKA: A In my opinion based on what I've seen on other projects to that have similar scenarios, we would have to take the the walls, we would have to take the the walls, we would have to treat any to that have similar scenarios, we would have to treat any to that have similar scenarios, we would have to treat any to that have similar scenarios, we would have to treat any to that have similar scenarios, we would have to treat any to that have similar scenarios, we would have to treat any to that have similar scenarios, we would have to treat any to that have similar scenarios, we would have to treat any to that have similar scenarios, we would have to take the the shorts. In months in advance of any work. Ideally more than six to that have similar scenarios, we would have to treat any to that have similar scenarios, we would have to treat any to that have similar scenarios, we would have to treat any to that have similar scenarios, use of the particular. The provide	24	installation. So I would say one month of acquiring any	24	THE COURT: It's lack of foundation. You know, we
1 we have on the site. And then I would say two to three 2 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the work right then and there. 6 A Correct. 7 Q Do subs typically line up projects in advance and are 8 they always available? 9 A They do line up in advance and they are not typically 10 readily available if schedules change. 11 Q How far in advance do they usually line things up? 12 A Typically what we see is anywhere from three to six 13 months in advance of any work. Ideally more than six 14 months. But it doesn't always work that way. 15 Q Fair enough. Mr. Gehrtz, the opinions that you've 16 offered here, were those based upon your training and 17 experience in construction management? 18 A Yes. 19 Q Are those all still your opinions? 20 A Yes, they are. 21 MR. HUSHKA: Certainly, Your Honor. 5 BY MR. HUSHKA: Certainly, Your Honor. 6 Q Mr. Gehrtz, what remediation efforts do you believe are 7 required to correct the water damage and water damage in The 8 Ruins? 9 A In my opinion based on what I've seen on other projects 10 that have similar scenarios, we would have to trake the 11 sheetrock off the walls, we would have to trake the 12 mold growth, whether it's currently there or there's still 13 moisture that could lead to mold. Treat it, dry it, make 14 moisture that could lead to mold. Treat it, dry it, make 15 sure that it's not in a condition where it would allow for 16 offered here, were those based upon your training and 17 experience in construction management? 18 A Yes. 19 Q Are those all still your opinions? 20 A Yes, they are. 21 MR. HUSHKA: Certainly, Your Honor. 5 BY MR. HUSHKA: 6 Q Mr. Gehrtz, what remediation efforts do you believe are 7 required to correct the water damage and water damage in The 8 Ruins? 9 A In my opinion based on what I've seen on other projects 10 that have similar scenarios, we would have to take the 11 sheetrock off the walls, we would nave to take t	25	materials that are necessary or doing an accounting of what	25	heard some foundation about remediation, but I think for the
2 months after all the materials are there to finish 3 everything to completion. 4 Q And that's assuming that the subs that are necessary 5 are available to complete the work right then and there. 6 A Correct. 7 Q Do subs typically line up projects in advance and are 8 they always available? 9 A They do line up in advance and they are not typically 10 readily available if schedules change. 11 Q How far in advance do they usually line things up? 12 A Typically what we see is anywhere from three to six 13 months. But it doesn't always work that way. 15 Q Fair enough. Mr. Gehrtz, the opinions that you've 16 offered here, were those based upon your training and 17 experience in construction management? 18 A Yes. 19 Q Are those all still your opinions? 20 A Yes, they are. 21 MR. THE COURT: So just for clarification, are you relying on specific quotes from remediation experts in that actually looked at this particular scope of work for	3 4 5 6 7 8 9 10 11 12 13 14 15	MR. VERSTANDIG: Thank you. MR. HUSHKA: Your Honor, as an offer of proof, we would offer that they received a ServiceMaster restore quote that remediation services would be required in 39 different units in this case, including three hallways and that the cost of those remediation services would be \$293,951.43. Additionally, those remediation services would take 22 days, neither of which were accounted for in the opinions currently provided and before the Court as an offer of proof if we were allowed to go in on this. THE COURT: So response to the offer of proof? MR. VERSTANDIG: Your Honor, we appreciate the proffer. It is clearly set forth on the docket, which is how I know where this is going. It is very clearly the quote of a third party. It remains rank hearsay. If
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	to be cross-examined about their quote, how it is they came up with the quote, what considerations went into the quote, what considerations did not go into the quote. MR. HUSHKA: Your Honor, that would go to I believe the weight as opposed to the admissibility. If there's issues regarding that weight or the quote and the particular accuracy of that quote, I believe that would go to weight as opposed to the actual admissibility of the opinion and this Court can obviously assign any weight that it believes is appropriate. THE COURT: So just for clarification, are you relying on specific quotes from remediation experts in that actually looked at this particular scope of work for The Ruins? THE WITNESS: Can I explain the THE COURT: Yes.	3 4 5 6 7 8 9 10 11 12 13 14 15 16	MR. VERSTANDIG: Thank you. MR. HUSHKA: Your Honor, as an offer of proof, we would offer that they received a ServiceMaster restore quote that remediation services would be required in 39 different units in this case, including three hallways and that the cost of those remediation services would be \$293,951.43. Additionally, those remediation services would take 22 days, neither of which were accounted for in the opinions currently provided and before the Court as an offer of proof if we were allowed to go in on this. THE COURT: So response to the offer of proof? MR. VERSTANDIG: Your Honor, we appreciate the proffer. It is clearly set forth on the docket, which is how I know where this is going. It is very clearly the quote of a third party. It remains rank hearsay. If anything, the fact that it ends in 43 cents shows the
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	to be cross-examined about their quote, how it is they came up with the quote, what considerations went into the quote, what considerations did not go into the quote. MR. HUSHKA: Your Honor, that would go to I believe the weight as opposed to the admissibility. If there's issues regarding that weight or the quote and the particular accuracy of that quote, I believe that would go to weight as opposed to the actual admissibility of the opinion and this Court can obviously assign any weight that it believes is appropriate. THE COURT: So just for clarification, are you relying on specific quotes from remediation experts inthat actually looked at this particular scope of work for The Ruins? THE WITNESS: Can I explain the THE COURT: Yes. THE WITNESS: Okay. So I had reached out for an	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	MR. VERSTANDIG: Thank you. MR. HUSHKA: Your Honor, as an offer of proof, we would offer that they received a ServiceMaster restore quote that remediation services would be required in 39 different units in this case, including three hallways and that the cost of those remediation services would be \$293,951.43. Additionally, those remediation services would take 22 days, neither of which were accounted for in the opinions currently provided and before the Court as an offer of proof if we were allowed to go in on this. THE COURT: So response to the offer of proof? MR. VERSTANDIG: Your Honor, we appreciate the proffer. It is clearly set forth on the docket, which is how I know where this is going. It is very clearly the quote of a third party. It remains rank hearsay. If anything, the fact that it ends in 43 cents shows the specificity of the hearsay. It is not sorry.
3 4 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	to be cross-examined about their quote, how it is they came up with the quote, what considerations went into the quote, what considerations did not go into the quote. MR. HUSHKA: Your Honor, that would go to I believe the weight as opposed to the admissibility. If there's issues regarding that weight or the quote and the particular accuracy of that quote, I believe that would go to weight as opposed to the actual admissibility of the opinion and this Court can obviously assign any weight that it believes is appropriate. THE COURT: So just for clarification, are you relying on specific quotes from remediation experts in that actually looked at this particular scope of work for The Ruins? THE WITNESS: Can I explain the THE COURT: Yes. THE WITNESS: Okay. So I had reached out for an opinion on what a general scope might be because I don't do	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	MR. VERSTANDIG: Thank you. MR. HUSHKA: Your Honor, as an offer of proof, we would offer that they received a ServiceMaster restore quote that remediation services would be required in 39 different units in this case, including three hallways and that the cost of those remediation services would be \$293,951.43. Additionally, those remediation services would take 22 days, neither of which were accounted for in the opinions currently provided and before the Court as an offer of proof if we were allowed to go in on this. THE COURT: So response to the offer of proof? MR. VERSTANDIG: Your Honor, we appreciate the proffer. It is clearly set forth on the docket, which is how I know where this is going. It is very clearly the quote of a third party. It remains rank hearsay. If anything, the fact that it ends in 43 cents shows the specificity of the hearsay. It is not sorry. THE COURT: Right. So I sustained the objection.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	to be cross-examined about their quote, how it is they came up with the quote, what considerations went into the quote, what considerations did not go into the quote. MR. HUSHKA: Your Honor, that would go to I believe the weight as opposed to the admissibility. If there's issues regarding that weight or the quote and the particular accuracy of that quote, I believe that would go to weight as opposed to the actual admissibility of the opinion and this Court can obviously assign any weight that it believes is appropriate. THE COURT: So just for clarification, are you relying on specific quotes from remediation experts in that actually looked at this particular scope of work for The Ruins? THE WITNESS: Can I explain the THE COURT: Yes. THE WITNESS: Okay. So I had reached out for an opinion on what a general scope might be because I don't do mold remediation specifically. We did not have anybody go	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	MR. VERSTANDIG: Thank you. MR. HUSHKA: Your Honor, as an offer of proof, we would offer that they received a ServiceMaster restore quote that remediation services would be required in 39 different units in this case, including three hallways and that the cost of those remediation services would be \$293,951.43. Additionally, those remediation services would take 22 days, neither of which were accounted for in the opinions currently provided and before the Court as an offer of proof if we were allowed to go in on this. THE COURT: So response to the offer of proof? MR. VERSTANDIG: Your Honor, we appreciate the proffer. It is clearly set forth on the docket, which is how I know where this is going. It is very clearly the quote of a third party. It remains rank hearsay. If anything, the fact that it ends in 43 cents shows the specificity of the hearsay. It is not sorry. THE COURT: Right. So I sustained the objection. And now for purposes of appeal, the Red River State Bank is
3 4 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	to be cross-examined about their quote, how it is they came up with the quote, what considerations went into the quote, what considerations did not go into the quote. MR. HUSHKA: Your Honor, that would go to I believe the weight as opposed to the admissibility. If there's issues regarding that weight or the quote and the particular accuracy of that quote, I believe that would go to weight as opposed to the actual admissibility of the opinion and this Court can obviously assign any weight that it believes is appropriate. THE COURT: So just for clarification, are you relying on specific quotes from remediation experts inthat actually looked at this particular scope of work for The Ruins? THE WITNESS: Can I explain the THE COURT: Yes. THE WITNESS: Okay. So I had reached out for an opinion on what a general scope might be because I don't do mold remediation specifically. We did not have anybody go onto the site. So it was more general in nature in order to	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	MR. VERSTANDIG: Thank you. MR. HUSHKA: Your Honor, as an offer of proof, we would offer that they received a ServiceMaster restore quote that remediation services would be required in 39 different units in this case, including three hallways and that the cost of those remediation services would be \$293,951.43. Additionally, those remediation services would take 22 days, neither of which were accounted for in the opinions currently provided and before the Court as an offer of proof if we were allowed to go in on this. THE COURT: So response to the offer of proof? MR. VERSTANDIG: Your Honor, we appreciate the proffer. It is clearly set forth on the docket, which is how I know where this is going. It is very clearly the quote of a third party. It remains rank hearsay. If anything, the fact that it ends in 43 cents shows the specificity of the hearsay. It is not sorry. THE COURT: Right. So I sustained the objection. And now for purposes of appeal, the Red River State Bank is making an offer of proof. I'm looking to you for your
3 4 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	to be cross-examined about their quote, how it is they came up with the quote, what considerations went into the quote, what considerations did not go into the quote. MR. HUSHKA: Your Honor, that would go to I believe the weight as opposed to the admissibility. If there's issues regarding that weight or the quote and the particular accuracy of that quote, I believe that would go to weight as opposed to the actual admissibility of the opinion and this Court can obviously assign any weight that it believes is appropriate. THE COURT: So just for clarification, are you relying on specific quotes from remediation experts in that actually looked at this particular scope of work for The Ruins? THE WITNESS: Can I explain the THE COURT: Yes. THE WITNESS: Okay. So I had reached out for an opinion on what a general scope might be because I don't do mold remediation specifically. We did not have anybody go onto the site. So it was more general in nature in order to arrive at a cost to remediate. If that answers the	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	MR. VERSTANDIG: Thank you. MR. HUSHKA: Your Honor, as an offer of proof, we would offer that they received a ServiceMaster restore quote that remediation services would be required in 39 different units in this case, including three hallways and that the cost of those remediation services would be \$293,951.43. Additionally, those remediation services would take 22 days, neither of which were accounted for in the opinions currently provided and before the Court as an offer of proof if we were allowed to go in on this. THE COURT: So response to the offer of proof? MR. VERSTANDIG: Your Honor, we appreciate the proffer. It is clearly set forth on the docket, which is how I know where this is going. It is very clearly the quote of a third party. It remains rank hearsay. If anything, the fact that it ends in 43 cents shows the specificity of the hearsay. It is not sorry. THE COURT: Right. So I sustained the objection. And now for purposes of appeal, the Red River State Bank is making an offer of proof. I'm looking to you for your response to that offer of proof.
3 4 4 5 6 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	to be cross-examined about their quote, how it is they came up with the quote, what considerations went into the quote, what considerations did not go into the quote. MR. HUSHKA: Your Honor, that would go to I believe the weight as opposed to the admissibility. If there's issues regarding that weight or the quote and the particular accuracy of that quote, I believe that would go to weight as opposed to the actual admissibility of the opinion and this Court can obviously assign any weight that it believes is appropriate. THE COURT: So just for clarification, are you relying on specific quotes from remediation experts in that actually looked at this particular scope of work for The Ruins? THE WITNESS: Can I explain the THE COURT: Yes. THE WITNESS: Okay. So I had reached out for an opinion on what a general scope might be because I don't do mold remediation specifically. We did not have anybody go onto the site. So it was more general in nature in order to arrive at a cost to remediate. If that answers the question.	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	MR. VERSTANDIG: Thank you. MR. 1	THE COURT: Okay, then I will accept that as an	1	believe that those four subcontractors would not be able to
2	offer of proof.	2	provide?
3	MR. HUSHKA: Thank you.	3	A Elevator, building sprinkler, appliances, exterior
4	BY MR. HUSHKA:	4	signage, supply of postal specialties, carpet material and
5	Q Mr. Gehrtz, again, without speaking to the	5	installation. If you can scroll up a little bit more.
6	particularities of any quotes received or considered by you,	6	Q What about electrical before we go up. Would they be
7	the timeline that you have provided and the 1.6 million and	7	able to do that?
8	change number that you provided, did that include any cost	8	A I don't believe so. I'm not familiar with all four of
9	or time for remediation services?	9	those, but I don't believe they are an electrician. So
10	A No, it did not.	10	Q Sorry for interrupting. Any others that you see on
11	Q But do you believe that such remediation services are	11	this list?
12	necessary?	12	A Moisture protection and the supply of miscellaneous
13	A I do believe there is, yes.	13	metals and CMU block, masonry.
14	Q If you were to see a mold testing inspection that did	14	Q And you believe obviously that the cost associated with
15	not yield did not receive excuse me. If there was a	15	those line items are what is in this summary exhibit?
16	mold test performed and that test came back negative but did	16	A Correct.
17	not test every unit where you observed water penetration or	17	MR. HUSHKA: No further questions at this time,
18	every common space that you observed water penetration, do	18	Your Honor.
19	you believe that that would be sufficient to exclude the	19	THE COURT: Okay. Do we want to take a break
20	possibility of mold in The Ruins?	20	before you begin with cross-examination or are you ready to
21	A I do not personally. No. I'd like to see it at each	21	just proceed?
22	location to make sure that there is no potential for mold to	22	MR. VERSTANDIG: Your Honor, we are prepared to
23	grow wherever there was water visible or penetration	23	proceed. I would caution I think it's going to be on the
24	visible.	24	lengthier side. And I would likely ask for a recess before
25	Q And in your report, I think report one that came in the	25	I conclude to confer with my client. But I'm happy to begin
	Page 139		Page 141
1	punch list, does that identify the areas where there's water	1	now.
2	penetration in the units that such testing would be	2	THE COURT: Okay. I say we try to go another half
3	required?	3	hour for sure and then take a short break.
4	A It does, yes.	4	Just by way of logistics, is everybody prepared to
5	Q All right. Mr. Gehrtz, I'm reaching the termination of	5	go without lunch? Okay.
	my initial questioning. But just a couple more brief issues	6	Mr. VerStandig, I can't really see if you nodded
7	here before we wrap up.	7	or not.
8	I believe you testified that over a dozen trades or	8	MR. VERSTANDIG: Your Honor, yes. Admittedly I
9	subs were necessary and \$1.69 million was needed to complete	9	also have the privilege of being able to turn off my camera
10	this project. Is that a correct summary?	10	for two seconds and grab a granola bar.
11	A Yes.	11	THE COURT: Okay. You are the lucky one here for
12	Q Do you believe that this project could be completed in	12	sure.
13	a timely manner with only labor and material contributions	13	MR. VERSTANDIG: Yes.
14	from B&W Construction, Lakeside Construction, Limoges	14	THE COURT: Okay. I'll try to take, you know, a
15	Construction and Watertight?	15	15-minute break or around noon depending on where you are
16	A Personally I don't feel that it would get all the way	16	with your examination so that you can enjoy a granola bar.
17	there.	17	But given the fact that I'm going to have to stop at 2:00, I
18	Q Why not?	18	think it would be helpful if we can find a way to complete
19	A I think there's other trades that need to be involved	19	this witness's testimony if at all possible. Okay.
20	in getting the project to completion in my opinion.	20	MR. VERSTANDIG: Thank you, Your Honor.
21	Q What specific trades?	21	THE COURT: So we're just going to begin. So Mr.
22	A Well, I'm not exactly familiar with the specific	22	VerStandig, you may begin.
23	subcontractors that were identified.	23	MR. VERSTANDIG: Thank you. And I think we can at
24	Q If we look at the summary exhibit that's in front of	24	least for the time being take the exhibit down.

	Page 142		Page 144
	BY MR. VERSTANDIG:		Q But again, the order of sequencing and I think that
2	Q Mr. Gehrtz, what is the aesthetic of The Ruins design?	2	sounds like a grotesque redundancy would be somewhat, not
3	A I guess an apartment building. I don't is that	3	nearly entirely, related to the desired aesthetic.
4	I'm not exactly sure the what you're asking necessarily.	4	A I'd say yeah.
5	But my assumption of the aesthetic, the completion of the	5	Q Okay. Did you view the buildings known as Generations
6	completion aesthetic would be a finished residential	6	or Parkside?
7	apartment complex.	7	
8	Q Can we agree that different finished residential	8	Q They're both in Watertown, South Dakota. You didn't
9	apartment complexes have different looks, some more modern	9	visit them while you were down there?
10	than others?	10	A We did not.
11	A Yeah.	11	Q Okay. Do you have any idea of whether those buildings
12	Q Can we agree that with the ebbs and flows of time,	12	are in high demand, low demand, or any other sort of demand
13	certain things come in and out of style?	13	for renters?
14	A Yeah.	14	A I do not.
15	Q What might have been awfully chic in the 1930s might be	15	Q Did you know those buildings existed until three
16	repugnant today?	16	minutes ago?
17	A I'd say that's fair to say. I'm not a designer, but I	17	A I did.
18	would generally agree with you on that.	18	Q Okay. Now, generally and we'll be a little more
19	Q As part of your inspection in this case, what steps did	19	specific later on when you gave your cost to complete
20	you take to investigate the intended aesthetic for this	20	estimate, I didn't see a line item in there for your
21	building at completion? Did you review anything suggesting	21	company's fees. Where was that?
22	what Mr. Craig and his team intended to look at at the time	22	A It wasn't included. Was asked to put a cost to
23	the certificate of occupancy is obtained?	23	complete the scope of the work and I didn't account for any
24	A I did not. My investigation was based on site	24	management, whether it was by me or by somebody else. So it
25	observations and my experience on what I reasonably expect	25	was strictly scopes of work based on the sworn construction

2 3 4 5 6 7 8 9	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the that has to do with the design of the building and the	2 3 4 5 6 7 8 9	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I
2 3 4 5 6 7 8 9 10	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the - that has to do with the design of the building and the construction of the building, not necessarily the aesthetic	2 3 4 5 6 7 8 9 10	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't
2 3 4 5 6 7 8 9 10 11 12	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion.	2 3 4 5 6 7 8 9 10 11 12	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll
2 3 4 5 6 7 8 9 10 11 12 13	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be	2 3 4 5 6 7 8 9 10 11 12 13	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll
2 3 4 5 6 7 8 9 10 11 12 13 14	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the - that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be rather similar, albeit not identical notions, correct?	2 3 4 5 6 7 8 9 10 11 12 13 14	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll apply an overall percentage to the entire project, but I
2 3 4 5 6 7 8 9 10 11 12 13 14 15	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the - that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be rather similar, albeit not identical notions, correct? A Let me clarify. Design meaning code-related components	2 3 4 5 6 7 8 9 10 11 12 13 14 15	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll apply an overall percentage to the entire project, but I won't apply it on an individual subcontractor.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be rather similar, albeit not identical notions, correct? A Let me clarify. Design meaning code-related components versus aesthetic-related components. For example, a one-	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll apply an overall percentage to the entire project, but I won't apply it on an individual subcontractor. So the way I put my estimates together is each
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be rather similar, albeit not identical notions, correct? A Let me clarify. Design meaning code-related components versus aesthetic-related components. For example, a one-hour rated floor assembly needs to have gypcrete on it	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll apply an overall percentage to the entire project, but I won't apply it on an individual subcontractor. So the way I put my estimates together is each individual line item is what the cost for that particular
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be rather similar, albeit not identical notions, correct? A Let me clarify. Design meaning code-related components versus aesthetic-related components. For example, a one-hour rated floor assembly needs to have gypcrete on it whether it's a high-end apartment or a base-level apartment.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll apply an overall percentage to the entire project, but I won't apply it on an individual subcontractor. So the way I put my estimates together is each individual line item is what the cost for that particular subcontractor would be. And in this particular case, I did
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be rather similar, albeit not identical notions, correct? A Let me clarify. Design meaning code-related components versus aesthetic-related components. For example, a one-hour rated floor assembly needs to have gypcrete on it whether it's a high-end apartment or a base-level apartment. So there are some components that don't in my opinion have a	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll apply an overall percentage to the entire project, but I won't apply it on an individual subcontractor. So the way I put my estimates together is each individual line item is what the cost for that particular subcontractor would be. And in this particular case, I did not apply a factor for management or for oversight or
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be rather similar, albeit not identical notions, correct? A Let me clarify. Design meaning code-related components versus aesthetic-related components. For example, a one-hour rated floor assembly needs to have gypcrete on it whether it's a high-end apartment or a base-level apartment. So there are some components that don't in my opinion have a design-related sorry component to it.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll apply an overall percentage to the entire project, but I won't apply it on an individual subcontractor. So the way I put my estimates together is each individual line item is what the cost for that particular subcontractor would be. And in this particular case, I did not apply a factor for management or for oversight or anything because I was trying to establish the cost of the
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be rather similar, albeit not identical notions, correct? A Let me clarify. Design meaning code-related components versus aesthetic-related components. For example, a one-hour rated floor assembly needs to have gypcrete on it whether it's a high-end apartment or a base-level apartment. So there are some components that don't in my opinion have a design-related sorry component to it. Q And in some cases, but not nearly all, the aesthetic	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll apply an overall percentage to the entire project, but I won't apply it on an individual subcontractor. So the way I put my estimates together is each individual line item is what the cost for that particular subcontractor would be. And in this particular case, I did not apply a factor for management or for oversight or anything because I was trying to establish the cost of the work for the project.
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	for a finished building of that caliber. Q Can we agree that the aesthetic would probably have a material impact on the cost of signage, whether it be up or down? A It could, yeah. Q Okay. And it would probably have a material impact on the cost of gypcrete. Again, up or down. A I would maybe not agree with gypcrete. That's a pretty standard item that's not visible. That has to do with the - that has to do with the design of the building and the construction of the building, not necessarily the aesthetic of the building in my opinion. Q Well, the design and the aesthetic would seem to be rather similar, albeit not identical notions, correct? A Let me clarify. Design meaning code-related components versus aesthetic-related components. For example, a one-hour rated floor assembly needs to have gypcrete on it whether it's a high-end apartment or a base-level apartment. So there are some components that don't in my opinion have a design-related sorry component to it. Q And in some cases, but not nearly all, the aesthetic would also impact sequencing, would it not?	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	statement that was provided. Q Were any of those items marked up understanding that a general contractor would likely take a cut? A I don't know. Q Well, you put it together. Why would you know? A Are you asking specifically of my estimate that I put together? Q Yeah. A I didn't mark up any of the cost. It was a direct cost. Typically I will just expand a little bit on how I operate from a construction management standpoint. I don't apply a markup on individual subcontractor packages. I'll either operate on a lump sum fee for a total project or I'll apply an overall percentage to the entire project, but I won't apply it on an individual subcontractor. 37 (Pages 142 - 145)

Page 38 of 108 Document Page 146 Page 148 1 Watertown, South Dakota? 1 like I would get appropriate answers I guess. I did not I don't know. Basically for a skilled laborer it's 2 reach out to the builder because my assumption was that I probably on the higher end. For an unskilled laborer it's wouldn't be getting accurate information considering the 4 maybe -- sorry, the other way around. For a skilled laborer gravity of the situation. 5 I would say it's closer to that. For a non-skilled laborer I'm not sure I understand. I understand why you may it's maybe a little bit high. have been concerned that the builder wouldn't give you Would you be surprised to learn that the rough average information, but what would lead you to believe the builder -- and I don't -would give you inaccurate information? MR. HUSHKA: Objection, Your Honor. Foundation. Because I'm doing it under the hire of the opposing 10 MR. VERSTANDIG: Asking if he would be surprised attorney I guess. Just the situation feels like it's -- I 10 11 to learn something. I'm not asking if it's true. don't know. I don't know how to answer it I guess. But... 12 MR. HUSHKA: Surprised if he learned. It would be It says you were hired by the opposing attorney. I 12 a fact in evidence. It's not in evidence. There is no thought you had testified that you were hired by Mr. 13 13 14 foundation for this. 14 Aarestad. 15 MR. VERSTANDIG: We'll have it in evidence at the 15 I'm sorry, correction. I'm hired by Red River State 16 end of the --16 17 THE COURT: Hold on. Say it again, Mr. 17 Q You said you had spoken to Mr. Aarestad, right? 18 VerStandig? 18 A 19 MR. VERSTANDIG: I mean, it will be in evidence by Did you speak with opposing counsel? 19 0 Not during or not until -- not until just recently for 20 the end of the hearing. It's going to come from a 20 subsequent witness. I'm just trying to garner whether or 21 this case. All my communication has gone through Red River 22 not it would surprise him. 22 State Bank 23 THE COURT: Yeah. When you say just recently, ballpark. I'm not asking 23 24 MR. VERSTANDIG: My asking the question doesn't you a precise date. Season, year. 25 establish the fact. Within the last few months. I guess when the original Page 147 Page 149 1 THE COURT: No, but it infers that it is a fact. -- the first hearing was scheduled and then settled was the 2 And so without the foundation, that presents a problem the 2 first time we started to -- I started to have conversations. way that this particular question was asked. So I'm So you didn't reach out to Mr. Craig. Why didn't you actually going to sustain that one. 4 reach out to any of the subcontractors who had done work BY MR. VERSTANDIG: 5 there? Mr. Gehrtz, did you investigate how much was paid to 6 A Felt like that might have been an overstep of my laborers on the project thus far? request. My request was to do a site observation and give 8 A No. my expert opinion on what the cost to complete the project 9 Q Could you have investigated that? would be. And that's how I established my estimates. I'm not sure how I would have done that. I guess by Well, in at least one instance -- and I don't want you observations and site inspections. to say what they told you. But you did reach out to a third 11 11 12 Q Well, you could have done more than observations and 12 party to get a bid or a quote, right? site inspections. You could have called Mr. Craig, right? In one instance I did for -- yeah, correct. 13 13 I suppose I could have. Okay. Would it have made sense to reach out to the 14 15 Q You could have looked through permits and liens to see subs who are already working on this project to see what 15 16 what laborers worked on the project, couldn't you? their completion cost would be? 16 17 A I did not note the account for any liens on my 17 I guess I relied on my experience and my historical 18 data. We do a lot of estimating work in putting together But I'm not asking about cost. I'm saying you had 19 budgets for projects that are either to be started or under 20 means of figuring out which subcontractors had done work, 20 design. So I guess I relied on my historical experience 21 right? 21 with similar projects to develop it rather than digging 22 further into it with the actual subcontractors that were on 22 A I suppose.

38 (Pages 146 - 149)

Q How many apartment projects in Watertown, South Dakota

25 have you done estimates for in the past?

23 the job.

24

But you didn't choose to reach out to a general or any

of the subs to get a sense of what the cost had been, right?

25 A I guess given the nature of the case, I didn't feel

	Document Page 39 o)† 1	.08
	Page 150		Page 152
1	A None.	1	potential costs and expenses for all of the subs Mr. Hushka
2	Q How many projects in Watertown, South Dakota?	2	asked you about, right?
3	A In Watertown specifically, none.	3	A Correct.
4	Q How many projects within 50 miles of Watertown?	4	Q Okay. Your expert opinion though is that the cost of
5	A We've done work down in Sioux Falls as a company. And	5	completion is \$1,695,967 and no cents, correct?
6	primarily most of our work is in the Fargo, Moorhead, West	6	A Correct.
7	Fargo area. So within 50 miles.	7	Q That's not a range. That's a very precise number. It
8	Q I realize you're not here as a geography expert. But	8	ends with seven dollars. Why didn't you provide a range if
9	can we agree Sioux falls is more than 50 miles from	9	there's some potential variance?
10	Watertown?	10	A When I'm putting together an estimate, even though
11	A Yeah.	11	there could be a range plus or minus, I don't provide that
12	Q Okay. Would it not have been beneficial to speak with	12	range necessarily. So I guess I've never given an estimate
13	someone who has done work in the Watertown market?	13	with a range like that. I'm doing what I typically would do
14	A My opinion is that, whether it's in the Watertown	14	when I put together a cost or an opinion of cost. And I get
15	market or it's in the Fargo or Moorhead market, they are	15	to a number.
16	similar enough. The scope of work with the project is	16	Q Can we agree that with a range that number could be
17	similar enough. It's going to get within a range of what I	17	lower or nigher?
18	would expect. I don't see it ranging further because it's	18	A Yeah.
19	in Watertown specifically that would require me to reach out	19	Q Okay. I mean, it could be \$1,695,966.
20	to subcontractors directly in Watertown to establish my	20	A It could be.
21	opinion of the cost. So that was my basis for assumption in	21	Q Or even lower than that.
22	getting to that.	22	A Yeah. The cost is our opinion of what it would take to
23	Q I don't want to belabor this point. I'm aware that	23	complete the project. So that could range depending on
24	you're an expert in one field, and I'm not going to try to	24	timing of when subcontractors are bidding it. That could
25	cross-qualify you. But you have been to Watertown at least	25	vary on their current scope of work. That could vary in a
	Page 151		Page 153
1	a few times, right?	1	market. That could vary with a number of different things.
2	A Correct.	2	So it's a moment in time we're trying to capture a cost of
3	Q And you live somewhere in or about the Fargo-Moorhead	3	what it might be to the best of our abilities without
4	market, correct?	4	physically going and getting hard bids and hard numbers.
5	A Correct?	5	That's a whole other process to develop a cost.
6	Q Generally speaking, just observations as a human being,	6	Q Let's take a step back. When your company does general
7	not as an expert, there is a slightly different economic	7	contractor work, does it pay subs with its own funds?
8	condition in Watertown, South Dakota than in Fargo, North	8	A When we operate as a construction manager, we I'm
9	Dakota, right?	9	going to get a little bit into the weeds I guess to explain
10	A I would in my opinion they are similar enough where	10	that question. So construction manager versus general
11	I could use my experience within the Fargo-Moorhead market	11	contractor. General contractor holds a single contract and
12	to establish a cost.	12	pays all the subs directly. A construction manager, if it's
13	Q You think your experience in Fargo-Moorhead establishes	13	acting as agent of the owner, it's a contractual delivery
14	what contractors in Watertown would charge?	14	method. The contract for the sub is actually held directly
15	A Personally I do, at least to a range close enough to	15	with the owner and the owner pays the sub directly. If it's
16	get to a number. If you're a plumber or an electrician,	16	construction manager at risk, then the construction manager
17	whether you have ten employees or a hundred employees,	17	holds the contract for the sub and we pay the sub directly
18	generally you're going to operate similar as a business	18	after we receive payment for the owner. So we as a company
19	whether you're in Watertown or you're in Fargo. So the type	19	have operated in all three capacities, whether it's a GC, a
	of subcontractor that's on these mixed use projects are very	20	CMA or a CM at risk, if that makes sense.
20	1 3	1	
	similar. They are smaller generally in size and operate	21	Q That was actually enormously helpful. Thank you. Did
21	similar. They are smaller generally in size and operate very similarly, whether they are in the Fargo-Moorhead	21 22	Q That was actually enormously helpful. Thank you. Did your company act as a general contractor during the first 18
20212223		22	

39 (Pages 150 - 153)

24 March 2020 forward.

25 A If we -- for a project similar to this or just in

24 that's similar.

25 Q You said a range, correct? Meaning there is a range of

Page 40 of 108 Document Page 154 1 general capacity? What's your... 1 A Well, I guess my assumptions were still based on my That's a fair question. I appreciate it. Did your 2 observations. The fact that I have an incomplete set of 3 company act as a general contractor for an MDU, mixed plans at the time of that inspection I don't think changes 4 what I observed I guess if that makes sense. dwelling unit project, during the period beginning March 5 Q Okay. You testified about an air conditioning can 2020 and ending September 2021? We acted as a construction manager, as an agent of the issue. Do you remember that? 7 owner. Since we don't self-perform, we operate and manage Yeah. 8 the project as a construction manager and not a GC. You indicated that one of them appeared to be -- and Now, you said a moment ago your company has acted as a 9 I'm paraphrasing -- one of them appeared to be too low, 10 GC, correct? 10 11 A Correct. 11 A Say that again? You indicated one of them appeared to be too low. 12 Q How many times? 12 Q Too low? Numerous times. It just depends on the client and the 13 Too low proximate to the ground. 14 project and the size of project. It varies. But numerous 14 15 I don't recall --16 Q How many times since March of 2020? 16 MR. HUSHKA: So, Your Honor, I'd object. I think Probably more than 20, more than 30, somewhere in that 17 that mischaracterizes the too low or -- the wrong heights I 17 A 18 range. I don't know the specific number for you. think was the fire extinguishers, not in the AC unit. But I 18 But none during that 18-month period. guess he can answer I guess his testimony. But... 19 None for mixed use type projects. But we have acted as MR. VERSTANDIG: I remember the fire 20 21 a GC for other type projects during that timeframe for other 21 extinguishers, and I may have just misheard the witness. 22 22 clients and whatnot. THE WITNESS: I don't recall saying anything about Did you observe a general fluctuation in the cost of 23 an AC being too low. That's not typically a scenario that 24 is a concern on a project like that. 24 materials during that time period? 25 BY MR. VERSTANDIG: 25 A Yeah. Page 155 Did they go up or down? Were there issues with the placement of the AC cans Generally they went up as a result of the pandemic. 2 that you observed? Significantly or marginally? Nothing specific that I recall without seeing the --I'd say significantly. 4 forgive me if there's a note in the report. It was in April Okay. Let's talk about your report. You said that you 5 of 2024. 6 made an assumption regarding the CMU block completion. Do Okay. Now, you testified there with doors you were 7 you remember that? assuming half of them were on site and available. Do you 8 A Yeah. 8 remember saying that? What was the assumption? Yes. The assumption was the scope of what was entailed Why would that be an assumption? Why wouldn't you just 11 within that. So my assumption was that there was some check to see how many doors there are? 12 amount of work that needed to be installed on the first 12 A I did not do an accounting of all of the particular 13 floor to complete CMU. doors that were on site. Some of them were leaned up 13 Now, why is that an assumption and not something that against the door openings or near the door openings. Others 15 you were able to objectively discern based on your multiple 15 were not there. So I don't recall how many and how specific 16 visits to the property? 16 the observation was. During the first report, at the time of the first 17 You did account for certain things. You testified that 18 report I did not have a floor plan that showed accurately there's no washers and dryers, right? 19 what was being built there. At the time of cost of 19 A Right. 20 completion, I did have a full set of plans that I was able 20 Why would you account for certain things and not others 21 to reference. So when I referred to my assumption, it was 21 if it was going to go into your cost of materials 22 based on my assumptions that I made during my observations 22 assessment?

40 (Pages 154 - 157)

Well, specifically regarding the appliances, it's 24 fairly easy as we're walking through the units to determine

25 is there a washer and a dryer in the unit. If there's not,

23 A

23 in the first report.

So the various times you talked about assumptions,

that's based on an outdated scope of knowledge on your part?

Q

	Document Page 41 o	of 1	.08
	Page 158		Page 160
1	is there a large stack of washer and dryers on the first	1	project. Based on my records and inspection, I believe the
2	floor. Those are fairly easy items to identify whether	2	following appliances are currently missing from The Ruins
3	they're on site or not. But boxes of hardware and	3	project. 15 dishwashers, 15 ranges/stoves, 16 microwaves,
4	components that are in small packages that typically once	4	28 refrigerators, 25 washing machines, 28 clothes dryers."
5	you open them up and they're not secure, they just in the	5	MR. HUSHKA: Your Honor, we would object. I don't
6	course of construction they tend to be lost. So I didn't	6	believe that this document is in evidence. I'm not sure if
7	want to rummage through any materials to cause further issue	7	he's trying to impeach Mr. Gehrtz that he's providing an
8	with cost of completion or construction completion. So	8	inaccurate number or if he's implying that Mr. Aarestad's
9	items that were easily identifiable by visible inspection or	9	tabulation is incomplete. I'm not sure where this is going
10	observation were the items that we validate. Others that	10	at this point.
11	were more specific like that, we didn't open things up and	11	THE COURT: Me neither. So I'm going to let him
12	do counts of everything.	12	ask the next question. And you may object again.
13	Q I don't want to be too argumentative here, but surely	13	BY MR. VERSTANDIG:
14	we can agree that a door is of a size it's easily countable.	14	Q Mr. Gehrtz, if 25 washing machines are missing, would
15	It's not a screw or a bolt.	15	that lead you to believe that thirty-some-odd washing
16	A That's fair.	16	machines are present?
17	Q Okay. So you could have checked, but you chose not to.	17	MR. HUSHKA: Objection, Your Honor. Foundation.
18	A Yes.	18	It assumes that 25 are missing. This document is not in
19	Q Okay. Why is the absence of washers and dryers a	19	evidence.
20	problem?	20	THE COURT: Sustained.
21	A Why is the absence a problem?	21	MR. VERSTANDIG: All right. Then in that case we
22	Q Yeah.	22	would ask to go to docket entry 60-1 at Page 309. And this
23	A The cost of the material I guess is the main issue from	23	document is in evidence. This is the expert's report.
24	my perspective.	24	THE COURT: I missed the page number. Which
25	Q How many units is this building supposed to be?		number?

Page 162	Document Page 42 of 108			
Page 162	Page 164			
1 Q I know that Mr. Hushka asked you this, and I don't mean 1 A That's correct.				
2 to be redundant. But I'll be honest, it's a phrase I didn't 2 Q If any means there may not be any, right?				
3 really know until a week ago. What is luxury vinyl tile? 3 A That's possible.				
4 A It's a laminate flooring of some sort essentially. 4 Q Okays. Why is it 95 percent and not a hundred?				
5 There's various different types of floorings that can be 5 A The way I classify percent completion is typically	the			
6 classified as LVT. 6 last five percent of a project isn't deemed fully complet	ted			
7 Q Does an apartment building require luxury vinyl tile? 7 until a full punch list and detailed walk-through with				
8 A No. 8 either owner or stakeholders have been completed. So	that's			
9 Q Are there apartment buildings constructed in this day 9 why even though it may be complete, I deem it as 95 p	ercent			
10 and age not historic times without luxury vinyl tile? 10 complete until it's been verifiably completed with an				
11 A I can't speak for them, but I would assume probably 11 official punch list with owner and stakeholders.				
12 there are some that don't have LVT in them. 12 Q So if it's possible that there wouldn't be punch list				
13 Q Okay. Did you do anything to ascertain whether or not 13 items, this might actually be a hundred percent, right?				
14 LVT is part of the design for this building? 14 A It is possible, yes.				
15 A It was installed on one of the floors I believe. I 15 Q Okay. So for each of your approximations of prog	ress,			
16 think the fourth floor had 16 five percent that's been deducted, for wont of a better				
17 Q And you're confident that what you saw is LVT? 17 term, is hypothetical.				
18 A I take that back. I don't believe there was any 18 A I guess that's based on my experience in project				
19 flooring installed. 19 closeout. It also relates to retainage payment. Typicall	lv			
20 Q Okay. So why are you assuming a need for LVT in this 20 retainage payment isn't released to subcontractors until	•			
21 project? 21 punch list is formally completed and items are checked				
22 A There was carpet installed in the bedrooms. So if some 22 verified to be completed. So when I think about fully				
23 areas had carpet in the rooms but not the entire room being 23 complete, I think about a completed punch list when a				
24 carpeted, my assumption was that it was a typical flooring 24 building is being turned overr and then the retainage				
25 to apartment, which would be an LVT type product. 25 payment is paid to a subcontractor.				
	D 165			
Page 163 1 O But there are other types of flooring that could have 1 MR, VERSTANDIG: Madam Clerk, this time I	Page 165			
31	promise			
2 been there. Or I believe your quote called for additional - 3 - sorry, carpeting, not carpentry. 2 that I actually an done with this document. 3 BY MR. VERSTANDIG:				
	again a			
	-			
	28 101			
	hiah			
8 MR. VERSTANDIG: And madam clerk, I'm sorry. Can 8 Q Okay. And you said that you thought they seemed	mgn.			
9 we go back to the same docket entry? I will admit that I'm 9 And again, that's a paraphrase, not a quote.				
10 trying not to hop around as badly as I think I am. At this 10 A That's correct.				
11 time I'd like to go to Page 21, please. 11 Q Did you check the state municipal whatever the 12 BY MR. VERSTANDIG: 12 applicable building code would have been?				
	0.02			
15 A Correct. 16 Q Okay. And on the second floor you observed them in all 16 There may be some local jurisdictions that provide, but				
17 units. 17 generally speaking it's international building code.	•			
21 Q I'm sorry. I literally didn't hear you, and I 22 apologize. 21 building code. 22 A I also didn't include any of that in the cost to				
22 A Taiso didn't include any of that in the cost to 23 A That's correct. 23 repair, either.				
24 Q Okay. And you said that there's only minor if any 25 repair, ettner. 24 Q But you included it as an issue with the project.				
25 punch items punch list items remaining, correct? 25 A I believe I referred to it as a potential issue.				

Page 168 Q Okay. And going back to things that weren't counted. 2 You didn't count the number of forliets on site, did you? 3 A I personally did not. 4 Q Did a member of your team? 5 A I don't believe so. 6 Q That would impact cost of completion, would it not? 7 A When I put together my cost of completion, in the same of your team of the properties person with whose to make inquiry, right? 6 Q That would impact cost of completion, would it not? 7 A When I put together my cost of completion, in the same of your team? 8 East case secuation that materials are on site, So if it 9 didn't account for it, it would be more cost. So if it 9 didn't account for it, it would be more cost. So if it 10 Q Okay. You it alked about the horken boxed toilet at one 11 point. Do you remember that? 2 A I don't recall that. Can you reference when that was? 13 Q I mon trying to be a smart aleck. Your testimony 14 this morning. 15 A Okay. 16 Q Let me ask it differently then. Did you observe any 17 broken toides that have formed a part of your expert 18 point in list case? 19 A I believe that I did. 10 Q Okay. Were any of the ones you observed still in their 10 box? 2 A I don't recall. I helieve so, but I don't recall for 2 C Corect. 2 A I don't recall. I helieve so, but I don't recall for 2 C Corect. 3 Q Okay. And when those issues where they are 4 C Corect. 5 Page 169 6 Vary. And when those issues arise, those are normally 6 Vary. And when those issues arise, those are normally 7 A corect. 8 Page 169 9 Q I think you did testify that when toilets are 10 think you did testify that when toilets are 2 A I don't recall. I helieve so, but I don't recall for 2 C Correct. 3 Q Okay. And when those issues arise, those are normally 4 covered by a warranty in your experience, aren't they? 5 A Depending on the situation, if it was a slupping issue, of it may not be a warranty is such a strategie of th		Document Page 43 c)† <u>1</u>	.08
2 you didn't count the number of toilets on site, did you? 3 A 1 personally did not. 4 Q Did a member of your team? 5 A 1 don't believe so. 6 Q That would impact cost of completion, would it no? 7 A When 1 put feather my cost of completion, mould it no? 8 A Weach 1 put feather my cost of completion, mould it no? 9 didn't account for it, it would be more cost. 10 Q Okay. You talked about the broken boxed trilet at one 1 point. Do you remember that? 2 A 1 don't recall that. Can you reference when that was? 3 Q T mor trying to be a smarral sele. Your testimony 14 this morning. 3 A 1 believe that I did. 3 Q Let me ask it differently then. Did you observe any 15 broken toilets that have formed a part of your expert 18 opinion in this case? 19 A 1 believe that I did. 20 Q Okay. Were any of the ones you observed still in their 18 lox? 21 A 1 don't recall. Thelieve so, but I don't recall for 22 certain. 22 A 1 don't recall. Thelieve so, but I don't recall for 23 certain. 23 Q Fall think you did testify that when toilets are 24 pipel in boxes, there are sometimes issues where they are 25 whipped in howes, there are sometimes issues where they are 26 the wind of the wardons it issues where they are 27 the replacement cost of something that arrives in broken condition, 2 and it's documented at the time of receipt, then it's usually how by 5 the contractor. 24 A 1 firs a not insend or previous of the more of the plant of the wardons in the proper and the time of receipt, then it's usually how by 5 the contractor. 3 Q Okay. And when those issues arise, those are normally 6 to an arrived or if it arrives in broken condition, 2 and it's documented at the time of receipt, then it's usually how by 5 the contractor. 3 Q Okay. And when those issues arise, those are normally 6 the proper and 6 the proper of the		Page 166		Page 168
3 A I personally did not. 4 Q Did a member of your team? 5 A I don't believe so. 6 Q That would impact cost of completion, would it not? 7 A When I put together my cost of completion, Fin asseming best case scenario that materials are on size. So if it good didn't account for it, it would be more cost. 10 Q Okay. You talked about the broken boxed toilet at one I point. Do you remember that? 11 point. Do you remember that? 12 A I don't recall that. Can you reference when that was? 13 Q Trun not trying to be a smart aleck. Your testimony I this morning. 14 A Okay. 15 A Okay. 16 Q Let me ask it differently then. Did you observe any I broken toilets that have formed a part of your expert to your a point in this case? 19 A I believe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 21 A I don't recall. I believe so, but I don't recall for 22 certain. 22 a sipped in boxes, there are sometimes issues where they are 23 decreased by a warranty is use. So it may need to be with 7 the wendor. But in general terms it's possible. 21 Q I nyour experience, how often is a builder made to bear 9 the replacement cast of something that arrives in broken on dition. 21 A Correct. 22 A I don't recall i regently then is a builder made to bear 9 the replacement and reconcided at the time of receipt, 9 the contractor. 23 A I would have been able to find that out by 0 contracting Mrs. Craig though, right? 24 A I this arrived or if it arrives in broken condition. 25 A I don't recall that the drawing set had shown an elevation 1 verify that the drawing set had shown an elevation 2 verify that the drawing set had shown an elevation 2 verify that the drawing set had shown an elevation 2 verify that the drawing set had shown an elevation 3 then trylically there is a case for warranty is live to complete their 3 verify that the drawing set had shown an elevation 2 verify that the drawing set had shown an elevation 2 verify that the drawing set had shown an elevation 2 verify that the drawing set had shown an elev	1 Q	Okay. And going back to things that weren't counted.	1	documented at the time of receipt, the project manager or
4 A Yeah. 5 A I don't believe so. 6 Q That would impact cost of completion, would it not? 7 A When I put together my cost of completion, I'm assuming 8 best case scenario that materials are on site. So if it 9 didn't account for it, it would be more cost. 10 Q Okay. You talked about the broken boxed toilet at one 11 point. Do you remember that? 12 A I don't recall that. Can you reference when that was? 13 Q I'm to trying to be a smart aleck. Your testimony 14 this morning. 15 A Okay. 16 Q Latir meak it differently then. Did you observe any 17 broken toilets that have formed a part of your expert 18 opinion in this case? 19 A I believe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 a broken or in need of repair, correct? 26 A Or recal. 27 A On the alley side of the building I recall a step from 28 the substitution in this case is that at there is - typically what I 29 broken toilets that have formed a part of your expert 20 Correct. 3 Q Okay. Were any of the ones you observed still in their 4 broken or in need of repair, correct? 4 D And I think you did testify that when toilets are 5 shipped in boxes, there are sometimes issues where they are 5 Page 107 5 A Depending on the situation, if it was a shipping issue, 6 it may not be avarranty issue. So it may need to be with 7 the vendor. But in general terms it's possible. 8 Q I nyour experience, how often is a builder made to bear 9 the replacement cost of something that arrives in broken condition. 11 A I it's arrived or if it arrives in broken condition. 12 defined that there is a case for warranty. If it's not 14 documented at the time of receipt, then it's usually bore by the corractor. 15 Q And you don't know what was documented at the time of receipt, then it's soully bore by the corractor. 16 Q And you don't know what was documented at the time of receipt here, do you? 17 A I it's arrived or if it a	2 Y	ou didn't count the number of toilets on site, did you?	2	general contractor would have been the appropriate person
5 A I don't believe so. 6 Q That would impact cost of completion, would it not? 7 A When I put together my cost of completion, I'm assuming 8 best case scenario that materials are on site. So if it 9 didn't account for it, it would be more cost. 10 Q Okay, You talked about the broken boxed toilet at one 11 point. Do you remember that? 12 A I don't recall that. Can you reference when that was? 13 Q I'm not trying to be a smart aleck. Your testimony 14 this morning. 15 A Okay. 16 Q Lex re ask it differently then. Did you observe any 17 broken toilets that have formed a part of your expert 18 opinion in this case? 19 A I believe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 a lipsed in boxes, there are sometimes issues where they are 26 a lipsed in boxes, there are sometimes issues where they are 27 broken or in need of repair, correct? 28 A Correct. 39 Q Okay. And when those issues arise, those are normally 40 covered by a warranty in your experience, aren't they? 5 A Depending on the situation, if it was a shipping issue, it may not be a warranty issue, so it may need to be with the vendor. But in general terms it's possible. 40 Q And you didn't know what was documented at the time of receipt, then it's usually bore by the courtector. 41 It is sarrived or if it arrives in broken condition. 42 Q And you don't know what was documented at the time of receipt, then it's usually bore by the courtector. 43 A I don't recall the correct properly or a plan set, 21 were greated by the courted or a warranty issue, so it may need to be with a few cuments and recorded at the time of receipt, then it's usually bore by the courted or a warranty issue, so it may need to be with the vendor. But in general terms it's possible. 40 Q And you don't know what was documented at the time of receipt, then it's usually bore by the courted. 51 A I don't recall the itime of receip	3 A	I personally did not.	3	with whom to make inquiry, right?
6 Q That would impact cost of completion, would it not? 7 A When I put together my cost of completion, firm assuming best case scenario that materials are on site. So if it is search to the material are on site. So if it of the warranted or warrantable. 9 Q Glay, You talked about the broken boxed toilet at one 1 point. Do you remember that? 12 A I don't recall that. Can you reference when that was? 13 Q I'm not trying to be a smart aleck. Your testimony this morning. 14 this morning. 15 A Ostay. 16 Q Let me ask it differently then. Did you observe any 17 broken toilets that have formed a part of your expert 18 opinion in this case? 19 A I believe that I did. 10 Q Okay. Were any of the ones you observed still in their 21 box? 21 A I don't recall. I believe so, but I don't recall for 22 certain. 22 definition of the state of th	4 Q	Did a member of your team?	4	A Yeah.
8 Men I put together my cost of completion, I'm assuming 8 best case scenario that materials are on site. So if it 9 didn't account for it, it would be more cost. 10 Q Okay. You talked about the broken boxed toilet at one 11 point. Do you remember that? 12 A I don't recall that. Can you reference when that was? 13 Q I'm not trying to be a smart aleck. Your testimony 14 this morning. 15 A Okay. 16 Q Let me ask it differently then. Did you observe any 17 broken toilets that have formed a part of your expert 18 opinion in this case? 19 A I believe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 a Dokay. And when those issues arise, those are normally of covered by a warranty is your experience, how often is a builder made to bear the replacement cost of something that arrives in broken condition? 28 Q In and it first arrived or if it arrives in broken condition? 29 And your don't know what was documented at the time of receipt, then it's usually bore by the contractor. 30 Q Okay. And when those issues arise, those are normally of the contractor. 31 Q I man for the plan. 32 don't recall that the very some string that arrives in broken condition? 33 don't first arrived or if it arrives in broken condition. 44 Q And you didn't look into what the drawing set did or the plan of the	5 A	I don't believe so.	5	Q In your experience is concrete work normally
8 hest case scenario that materials are on site. So if it 9 didn't account for it, it would be more cost. 10 Q Okay. You talked about the broken boxed toilet at one 11 point. Do you remember that? 12 A I don't recall that. Can you reference when that was? 13 Q I'm not trying to be a smart aleck. Your testimony 14 this morning. 15 A Okay. 16 Q Let me ask it differently then. Did you observe any 17 broken toilets that have formed a part of your expert 18 opinion in this case? 19 A I believe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 A Correct. 31 Q Okay. And when those issues arise, those are normally 42 covered by a warranty issue. So it may need to be with 43 T the vendor. But in general terms it's possible. 44 Q I and your experience, now often is a builder made to bear the replacement cost of something that arrives in broken or documented and recorded at the time of receipt, the replacement cost of something that arrives in broken of the receipt, then the vendor. But in general terms it's possible. 45 Q I not ure experience, would that the wind the wind the vendor. But in general terms it's possible. 46 Q I may one be a warranty issue. So it may need to be with the vendor. But in general terms it's possible. 47 Q And you didn't look into whathe drawing set did or documented and recorded at the time of receipt, do documented and recorded at the time of receipt, then the vendor. But in general terms it's possible. 48 Q I not our experience, how often is a builder made to bear the replacement cost of something that arrives in broken or contraction. 59 We contractor. 50 Q Okay. And when those issues arise those are normally of the replacement cost of something that arrives in broken or contraction. 50 Q Okay and on't know what was documented to bear the replacement cost of something that a	6 Q	That would impact cost of completion, would it not?	6	warrantied?
9 Okay. You talked about the broken boxed toilet at one 11 point. Do you remember that? 12 A I don't recall that. Can you reference when that was? 13 Q I'm not trying to be a smart aleck. Your testimony 14 this morning. 15 A Okay. 16 Q Let me ask it differently then. Did you observe any 17 token toilets that have formed a part of your expert 18 opinion in this case? 19 A I holive that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 a T owner and your expertimes, aren't they? 27 A Correct. 38 Q Okay. And when those issues arise, those are normally over experience, aren't they? 4 A I owner armany issue. So it may not be a warranty issue. So it may need to be with the very and its arives in broken condition, 10 A I this arrived or if it arrives in broken condition, 11 A I this arrived or if it arrives in broken condition, 12 and it's documented and recorded at the time of receipt, then it's usually bore by the contractor. 19 A A Owner and the contractor. 10 Q And you don't know what was documented at the time of receipt, then it's usually bore by the contractor. 10 Q And you don't know what was documented at the time of receipt, then it's usually bore by the contractor. 10 Q You would have been able to find that out by contracting Mr. Craig though, right? 21 A I don't know, I don't know that answer. That's contracting Mr. Craig though, right? 22 A I don't know, I don't know that answer. That's contracting Mr. Craig though, right? 23 A Other thace the time of receipt, then it's usually bore by contracting Mr. Craig though, right? 24 A I don't know, I don't know that answer. That's contracting Mr. Craig though, right? 25 A I don't know, I don't know that answer. That's contracting Mr. Craig tho	7 A	When I put together my cost of completion, I'm assuming	7	A If it's not installed per plan, there is a potential
10 Q Okay. You talked about the broken boxed toilet at one 11 point. Do you remember that? 12 A I don't recall that. Can you reference when that was? 13 Q I'm not trying to be a smart aleck. Your testimony this morning. 14 this morning. 15 A Okay. 16 Q Let me ask it differently then. Did you observe any 17 Portion to this case? 17 broken toilets that have formed a part of your expert 18 opinion in this case? 18 A I don't recall. I believe that I did. 19 Q Okay. Were any of the ones you observed still in their 20 box? 20 A I don't recall. I believe so, but I don't recall for 21 certain. 21 do Q Ald think you did testify that when toilets are 22 shipped in boxes, there are sometimes issues where they are 23 ordrain. 24 Q And I think you did testify that when toilets are 24 billy performed or in need of repair, correct? 25 A Correct. 26 A Orrect. 27 A Depending on the situation, lif twas a shipping issue, 6 it may not be a warranty isn your experience, aren't they? 28 A Depending on the situation, lif twas a shipping issue, 6 it may not be a warranty isn your experience, aren't they? 29 A Depending on the situation, lif twas a shipping issue, 6 it may not be a warranty isn your experience, aren't they? 20 A Depending on the situation, lif twas a shipping issue, 6 it may not be a warranty isn your experience, aren't they? 21 A I don't recall a feet to there being a step approaching the building. 22 do large a summany is the building area. 23 do large is the alely to the finished grade of the purking area. 24 Q And think you did testify that the -my assumption in this case is that there is typically then I be will the -my assumption in this case is that there is typically then I be will the -my assumption in this case is that there is typically then I be will the -my assumption in this case is that there wis a subcontractor will install I be ethe plan. 25 box? 26 A Correct. 27 A Doyn don't how when those issues arise, those are normally the correct? 28 A Orrect. 39 Q Okay. And when those issues arise, those	8 be	est case scenario that materials are on site. So if it	8	for it to be warrantied or warrantable.
1	9 di	idn't account for it, it would be more cost.	9	Q I didn't mean to cut you off. I'm sorry about that. I
12 A I don't recall that. Can you reference when that was? 13 Q I'm not trying to be a smart aleck. Your testimony 14 this morning. 15 A Oan the alley side of the building I recall a step from 15 A Okay. 15 Q Okay. 15 Q Okay. 16 Q Let me ask it differently then. Did you observe any 17 broken toilets that have formed a part of your expert 18 Okay. 18 Okay. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19 See is that a subcontractor will install it per the plan. 19	10 Q	Okay. You talked about the broken boxed toilet at one	10	think you had testified that there was some sort of concrete
13 A On the alley side of the building I recall a step from the imming. 14 this morning. 15 A Okay. 16 Q Cate me ask it differently then. Did you observe any 16 varrant? 17 broken toilets that have formed a part of your expert 18 assumption in this case? 18 assumption in this case is that there is typically what I 9 see is that a subcontractor will install it per the plan. 18 assumption in this case is that there is typically what I 9 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that there is typically what I 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per the plan. 19 see is that a subcontractor will install it per blan. 19 see is that a subcontractor will pertain the plan. 19 see is that a subcontractor will pertain the plan. 19 see is that the subcontractor will pertain the plan. 19 see is that the subcontractor will pertain the plan. 19 see is that the subcontractor will pertain the plan. 19 see is that the subcontractor will pertain the plan. 19 see is that a subcontractor will pertain the plan. 19 see is that the subcontractor will pertain the	11 pc	oint. Do you remember that?	11	issue that led to there being a step approaching the
14 this morning. 15 A Okay. 16 Q Let me ask it differently then. Did you observe any 17 broken to idlets that have formed a part of your expert 17 A No, because my experience would that be within 18 warranty? 18 opinion in this case? 19 A I believe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 21 box? 22 A I don't recall. I believe so, but I don't recall for 22 it. What I see is that as becontractor will install it per the plan. 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 25 shipped in boxes, there are sometimes issues where they are 26 shipped in boxes, there are sometimes issues where they are 27 shown or in need of repair, correct? 25 A Correct. 26 A Correct. 37 Q Okay. And when those issues arise, those are normally 4 covered by a warranty in your experience, aren't they? 38 Q lokay. And when those issues arise, those are normally 4 covered by a warranty in your experience, aren't they? 39 G better that I did. 30 Q okay. And when those issues arise, those are normally 4 covered by a warranty in your experience, now fire it a builder made to bear 4 the replacement cost of something that arrives in broken 2 and it's documented and recorded at the time of receipt, 4 documented and recorded at the time of receipt, 4 documented and recorded at the time of receipt, 4 documented and recorded at the time of receipt, 4 documented at the time of receipt,	12 A	I don't recall that. Can you reference when that was?	12	building.
15 A Okay. 16 Q Let me ask it differently then. Did you observe any 17 broken toilets that have formed a part of your expert 18 opinion in this case? 18 opinion in this case? 29 A Delewe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 21 Loon? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 y And I think you did testify that when toilets are 27 a Correct. 28 A Depending on the situation, if it was a shipping issue, 29 f it may not be a warranty issue. So it may need to bear in the replacement cost of something that arrives in broken 29 the replacement cost of something that arrives in broken 20 condition? 21 and it's documented and recorded at the time of receipt, 21 then it's arrived or if it arrives in broken condition, 22 and it's documented at the time of receipt, then it's usually bore by 25 the contractor. 26 Q Nay ou don't know what was documented at the time of receipt, 27 a I don't recall for 28 a Correct. 39 Q Okay. And when those issues arise, those are normally 40 covered by a warranty in your experience, aren't they? 41 A I tit's arrived or if it arrives in broken condition, 42 and it's documented and recorded at the time of receipt, 43 then typically there is a case for warranty. If it's not 44 documented at the time of receipt, then it's usually bore by 45 the contractor. 46 Q And you don't know what was documented at the time of receipt, 47 a That was for the installation of all the siding. In 48 A I do not. 49 You would have been able to find that out by 40 You would have been able to find that out by 41 A I tit's arrived or if it arrives in broken condition, 41 G Vow would have been able to find that out by 42 G Nand you don't know what was documented at the time of receipt, then it's susually bore by 43 A I don not. 44 Okay. And you don't know what was documented at the time of receipt, then it's susually bore by 44 G	13 Q	I'm not trying to be a smart aleck. Your testimony	13	A On the alley side of the building I recall a step from
16 Q Let me ask it differently then. Did you observe any 17 broken to tilets that have formed a part of your expert 18 opinion in this case? 18 A No, because my experience would be that the − my 18 opinion in this case? 19 A I believe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 A Correct. 27 A Correct. 28 A Correct. 30 Q Okay. And when those issues arise, those are normally 31 the nay not be a warranty in your experience, aren't they? 32 A Depending on the situation, if it was a shipping issue, 33 it may not be a warranty issue. So it may need to be with 34 the replacement cost of something that arrives in broken or individed in the time of receipt, and the time of receipt, then it's usually bore by 35 the tootractor. 36 then typically there is a case for warranty. If it's not 36 do umented at the time of receipt, then it's usually bore by 37 receipt here, do you? 38 A I don not. 39 Q You would have been able to find that out by 40 Q You would have been able to find that out by 41 Q You would have been able to find that out by 42 Q You would have been able to find that out by 43 A I don't know. I don't know that answer. That's 44 A I don't know. I don't know that answer. That's 45 A Define as it in this case it that there is 'typically what I assuming that it was a shipping is see is that a subcontractor will install it per bying to complete their 45 A Depending on the situation. 46 Correct. 47 verify that the drawing set had shown an elevation 2 difference. Regardless if it was shown or not, it's work 3 did not show in this case? 48 Q Pow unit the drawing set had shown an elevation 2 difference. Regardless if it was shown or not, it's work 3 did not show in this case? 49 Q And you didn't look into whether the subcontractor had 1 to verify that the drawing set had shown an elevation 2 di	14 th	is morning.	14	the alley to the finished grade of the parking area.
17 A No, because my experience would be that the my 18 opinion in this case? 18 assumption in this case is that there is typically what I 19 A I believe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 shipped in boxes, there are sometimes issues where they are 27 broken or in need of repair, correct? 28 A Correct. 3 Q Okay. And when those issues arise, those are normally 4 covered by a warranty in your experience, aren't they? 5 A Depending on the situation, if it was a shipping issue, 6 it may not be a warranty issue. So it may need to be with 7 the vendor. But in general terms it's possible. 8 Q In your experience, how often is a builder made to bear of the replacement cost of something that arrives in broken of condition? 10 condition? 11 A It it's arrived or if it arrives in broken condition, 12 and it's documented and recorded at the time of receipt, then it's usually bore by the the typically there is a case for warranty. If it's not receipt there, do you? 18 A I don to. 19 Q You would have been able to find that out by 20 contracting Mr. Craig though, right? 21 A I don't know that answer. That's 22 assuming that it was a documented properly at the time and 25 absuming that it was a documented properly at the time and 26 A No, because my experience in this case is that there is – typically what I in their subcontractor lad if the elevations are in the evation that the time is not read plane steps in the subcontractor had be evation that is assumption in this case is that there is a clase visit inteir responsibility to try to solve 26 it may in the assumption i	15 A	Okay.	15	Q Okay. In your experience would that be within
18 opinion in this case? 18 of believe that I did. 29 Q Okay. Were any of the ones you observed still in their box? 20 A I don't recall. I believe so, but I don't recall for 20 certain. 21 oversight or management, they're trying to complete their 21 broken or in need of repair, correct? 29 A I don't recall for 25 shipped in boxes, there are sometimes issues where they are 26 liference. Regardless if it was shown or not, it's work 27 difference. Regardless if it was shown or not, it's work 28 did not show in this case is that a subcontractor will install it per the plan. 20 And if the elevations aren't noted properly on a plan set, 26 then it's not really their responsibility to try to solve 27 then it's not really their responsibility to try to solve 28 the it's not really their responsibility to try to solve 29 the repair. Complete their 29 oversight or management, they're trying to complete their 29 oversight or management, they're trying to complete their 29 oversight or management, they're trying to complete their 29 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 oversight or management, they're trying to complete their 20 difference. Regardless if it was shown an elevation 20 difference. Regardless if it was shown	16 Q	Let me ask it differently then. Did you observe any	16	warranty?
19 A I believe that I did. 20 Q Okay. Were any of the ones you observed still in their 21 box? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 Page 167 1 broken or in need of repair, correct? 2 A Correct. 3 Q Okay. And when those issues arise, those are normally 4 covered by a warranty in your experience, aren't they? 5 A Depending on the situation, if it was a shipping issue, 6 it may not be a warranty issue. So it may need to be with 7 the vendor. But in general terms it's possible. 8 Q In your experience, how often is a builder made to bear of the replacement cost of something that arrives in broken of the tripically there is a case for warranty. If it's not documented and recorded at the time of receipt, the contractor. 11 A I tit's arrived or if it arrives in broken condition, and it's documented and recorded at the time of receipt, the contractor. 15 the contractor. 16 Q And you don't know what was documented at the time of receipt, the receipt, then it's usually bore by 15 the contractor. 16 Q And you don't know what was documented at the time of receipt, then identify a contractor of the building. 17 receipt here, do you? 18 A I don to. 19 Q You would have been able to find that out by 20 contracting Mr. Craig though, right? 20 contracting Mr. Craig though, right? 21 A I don't know. I don't know that answer. That's 20 assuming that it was documented properly at the time and 20 And when did you last observe the existence or lack	17 br	roken toilets that have formed a part of your expert	17	A No, because my experience would be that the my
20 Q Okay. Were any of the ones you observed still in their 21 box? 22 A I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 To Page 167 27 Day 167 28 A Correct. 29 Q Okay. And when those issues arise, those are normally 4 covered by a warranty in your experience, aren't they? 5 A Depending on the situation, if it was a shipping issue, 6 it may not be a warranty issue. So it may need to be with 7 the vendor. But in general terms it's possible. 8 Q In your experience, how often is a builder made to bear 9 the replacement cost of something that arrives in broken 10 condition? 11 A It it's arrived or if it arrives in broken condition, 12 and it's documented and recorded at the time of receipt, 13 then typically there is a case for warranty issue so, but I don't recall for 2 difference. 2 and our didn't look into what the drawing set had shown an elevation 2 difference. Regardless if it was shown or not, it's work 3 that has to be repaired to be functional. 4 Q And you didn't look into what the drawing set did or 5 did not show in this case? 6 A During our site observation, we did not have that 7 information. 8 Q Okay. You're currently sitting in a bankruptcy 9 courtroom, right? 10 A Correct. 11 A It it's arrived or if it arrives in broken condition, 12 been paid, did you? 13 A I did not look into whether the subcontractor had 14 documented at the time of receipt, then it's usually bore by 15 the contractor. 16 Q And you don't know what was documented at the time of 17 receipt here, do you? 18 A I do not. 19 Q You would have been able to find that out by 19 Q You would have been able to find that out by 20 contracting Mr. Craig though, right? 21 A I don't know. I don't know that answer. That's 22 Q And when did you last observe the existence or lack	18 or	pinion in this case?	18	assumption in this case is that there is typically what I
21 then it's not really their responsibility to try to solve 22 a I don't recall. I believe so, but I don't recall for 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 shipped in boxes, there are sometimes issues where they are 27 Page 167 Page 167 Page 168 Page 169 1 verify that the drawing set had shown an elevation 2 difference. Regardless if it was shown or not, it's work 3 Q Okay. And when those issues arise, those are normally 4 covered by a warranty in your experience, aren't they? 5 A Depending on the situation, if it was a shipping issue, 6 it may not be a warranty issue. So it may need to be with 7 the vendor. But in general terms it's possible. 8 Q In your experience, how often is a builder made to bear 9 the replacement cost of something that arrives in broken 10 condition? 11 A It it's arrived or if it arrives in broken condition, 2 and it's documented and recorded at the time of receipt, 13 then typically there is a case for warranty. If it's not 14 documented at the time of receipt, then it's usually bore by 15 the contractor. 16 Q And you don't know what was documented at the time of 17 receipt here, do you? 18 A I do not. 19 Q You would have been able to find that out by 20 contracting Mr. Craig though, right? 21 A I don't know. I don't know that answer. That's 22 assuming that it was documented property at the time and 23 oversight or management, they ir responsibility to try to solve 24 scope of work and get paid and get out of the job. 25 so in this particular case, would have to confirm and 24 verify that the drawing set had shown an elevation 25 difference. Regardless if it was shown or not, it's work 3 that has to be repaired to be functional. 4 Q And you didn't look into what the drawing set had shown an elevation 2 difference. Regardless if it was shown or not, it's work 3 that has to be repaired to be functional. 4 Q Nad you didn't look into whether the subcontractor had 12 been paid, did you? 15 of	19 A	I believe that I did.	19	see is that a subcontractor will install it per the plan.
22 it. What I see is they install it. If there isn't proper 23 certain. 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are 26 Page 167 27 A Correct. 28 Q Okay. And when those issues arise, those are normally 29 A covered by a warranty in your experience, aren't they? 20 A Depending on the situation, if it was a shipping issue, 31 it may not be a warranty issue. So it may need to be with 4 the vendor. But in general terms it's possible. 4 Q In your experience, how often is a builder made to bear 4 It it's arrived or if it arrives in broken condition, 4 and it's documented and recorded at the time of receipt, then it's usually bore by the contractor. 4 Q And you don't know what was documented at the time of receipt, then eight subscibles and the time of receipt receipt here, do you? 4 A I do not. 5 Q You would have been able to find that out by contracting Mr. Craig though, right? 5 A I don't know. I don't know. I don't know that answer. That's assuming that it was documented properly at the time and correctly assuming that it was documented properly at the time and correctly assuming that it was documented properly at the time and correctly assuming that it was documented properly at the time and correctly assuming that it was documented properly at the time and correctly assuming that it was documented at the time of the vision and get out of the job. 5 So in this particular case, would have to confirm and corpor oversight or management, they're trying to complete their sope oversight oversight or management, they're trying to complete their sope oversight of the scope of work and get paid and get out of the job. 5 So in this particular case, would have to confirm and 2 difference. Regardless if it was shown or not, it's work that has to be repaired to be functional. 4 Q And you din't look into what the drawing set had shown in this case? 5 did not show in this case? 6 A During our site observation, we did not have that information. 8 Q Okay. Yo	20 Q	Okay. Were any of the ones you observed still in their	20	And if the elevations aren't noted properly on a plan set,
23 oversight or management, they're trying to complete their 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are Page 167 Page 167 Page 168 A Correct. Q Okay. And when those issues arise, those are normally 4 covered by a warranty in your experience, aren't they? 5 A Depending on the situation, if it was a shipping issue, 6 it may not be a warranty issue. So it may need to be with 7 the vendor. But in general terms it's possible. 8 Q In your experience, how often is a builder made to bear 9 the replacement cost of something that arrives in broken 10 condition? 11 A It it's arrived or if it arrives in broken condition, 12 and it's documented and recorded at the time of receipt, 13 then typically there is a case for warranty. If it's not 14 documented at the time of receipt, then it's usually bore by 15 the contractor. 16 Q And you don't know what was documented at the time of 17 receipt here, do you? 18 A I do not. 19 Q You would have been able to find that out by 20 contracting Mr. Craig though, right? 21 A I don't know. I don't know that answer. That's 22 assuming that it was documented properly at the time and 23 oversight or management, they're trying to complete their 24 scope of work and get paid and get out of the job. 25 So in this particular case, would have to confirm and 26 work and get paid and get out of the job. 25 So in this particular case, would have to confirm and 2 difference. Regardless if it was shown on not, it's work 3 that has to be repaired to be functional. 4 Q And you doin't look into what the drawing set did or 5 did not show in this case? 6 A During our site observation, we did not have that 7 information. 8 Q Okay. You're currently sitting in a bankruptcy 9 courtroom, right? 10 A Correct. 11 Q You also didn't look into whether the subcontractor had 12 been paid, did you? 13 A I did not look into whether they had been paid. 14 Q Okay. A significant part of your estimate was the cost 15 of Tyvek. I think you had it	21 bo	ox?	21	then it's not really their responsibility to try to solve
23 oversight or management, they're trying to complete their 24 Q And I think you did testify that when toilets are 25 shipped in boxes, there are sometimes issues where they are Page 167 Page 167 Page 168 A Correct. Q Okay. And when those issues arise, those are normally 4 covered by a warranty in your experience, aren't they? 5 A Depending on the situation, if it was a shipping issue, 6 it may not be a warranty issue. So it may need to be with 7 the vendor. But in general terms it's possible. 8 Q In your experience, how often is a builder made to bear 9 the replacement cost of something that arrives in broken 10 condition? 11 A It it's arrived or if it arrives in broken condition, 12 and it's documented and recorded at the time of receipt, 13 then typically there is a case for warranty. If it's not 14 documented at the time of receipt, then it's usually bore by 15 the contractor. 16 Q And you don't know what was documented at the time of 17 receipt here, do you? 18 A I do not. 19 Q You would have been able to find that out by 20 contracting Mr. Craig though, right? 21 A I don't know. I don't know that answer. That's 22 assuming that it was documented properly at the time and 23 oversight or management, they're trying to complete their 24 scope of work and get paid and get out of the job. 25 So in this particular case, would have to confirm and 26 work and get paid and get out of the job. 25 So in this particular case, would have to confirm and 2 difference. Regardless if it was shown on not, it's work 3 that has to be repaired to be functional. 4 Q And you doin't look into what the drawing set did or 5 did not show in this case? 6 A During our site observation, we did not have that 7 information. 8 Q Okay. You're currently sitting in a bankruptcy 9 courtroom, right? 10 A Correct. 11 Q You also didn't look into whether the subcontractor had 12 been paid, did you? 13 A I did not look into whether they had been paid. 14 Q Okay. A significant part of your estimate was the cost 15 of Tyvek. I think you had it	22 A	I don't recall. I believe so, but I don't recall for	22	it. What I see is they install it. If there isn't proper

	Page 170		Page 172
1	MR. VERSTANDIG: Madam clerk, could we please pull	1	A No.
2	up docket entry 182-2?	2	Q You don't know what those trades charge as your usual
3	BY MR. VERSTANDIG:	3	and customary rates, do you?
4	Q Does this appear to be the building that you've	4	A No.
5	inspected?	5	Q And you don't know if those trades earned any money for
6	A Yes, it does appear that way.	6	their work on Ruins, do you?
7	Q And if we could scroll to the second page, please. I	7	A I don't know that specifically. If there is a lien on
8	can't believe I'm asking this question, but I'm going to.	8	the building for that particular subcontractor, I would
9	Is the thing clearly labelled Tyvek what you have referred	9	assume that would imply that they are owed money, but I
10	to as Tyvek?	10	don't know that for sure.
11	A Yes. That's what I'm referring to.	11	Q Now, you viewed this building three times and you're an
12	Q Okay.	12	expert in commercial construction, right?
13	A Building wrap.	13	A Correct.
14	Q Was that Tyvek there when you last inspected?	14	Q Let's turn this around. Let's not focus for a second
15	A What was the date of this photo?	15	on the cost of completion. Do you have a sense of what the
16	Q If I answer that question, Mr. Hushka is going to	16	cost to get the building into its current condition would
17	object. So I'm just asking if what you saw was there. Or	17	have been?
18	if you don't remember, that's a perfectly fine answer.	18	A If I were to put this if I were to do an estimate of
19	A I don't recall. I'm not sure whether or not this	19	an initial build, I would imagine that the cost would be
20	section of Tyvek had been repaired at the time. I don't	20	anywhere between \$225,000 to \$250,000 per residential unit.
21	believe it was, but I don't recall specially.	21	It's typically how just a ballpark range. I don't know
22	Q Okay. And could we please scroll to the third page?	22	how that fits into the math, but that's generally speaking
23	Just a different angle. Does this give you any better	23	where I would put it.
24	recollection?	24	Q So you said \$225,000 to \$250,000. Correct?
25	A I don't recall.	25	A Correct.

1	BY MR. VERSTANDIG:	1	Q When making your third report and your opinions, the
2	Q Mr. Gehrtz, from everything you've testified to today,	2	assumptions that you made, were you basing that on what was
3	while it would certainly take materials and effort, it would	3	actually to be constructed and just your views, or how did
4	be very feasible to complete this project, correct?	4	those two interact? I'm not sure I understood or fully
5	A I think it's feasible to complete this project, yes.	5	tracked that. Were you assuming were you using your same
6	Q Okay. And in your experience in the field, completing	6	assumptions from the first report or were you actually
7	the project would add significant value to it, correct?	7	making assumptions to complete per project specifications?
8	MR. HUSHKA: Objection. I believe beyond the	8	A I was making my cost on the project and specifications,
9	scope of his certified expertise regarding appraisal.	9	but also referencing my assumptions and my observations.
10	THE COURT: No, I'll allow it.	10	Sorry, my observations from my prior reports.
11	MR. HUSHKA: Okay.	11	Q So your observations were from prior, but you were
12	MR. VERSTANDIG: I didn't ask for the number. I	12	tying those to relate it to how this project is supposed to
13	just asked whether or not it would add value.	13	be completed?
14	THE COURT: Yeah. I overruled the objection.	14	A Correct.
15	Sorry. I wasn't very articulate about that. So you may	15	Q Thank you. One thing on that report
16	answer.	16	MR. HUSHKA: and Sharon, if I can have you pull up
17	THE WITNESS: Okay. Furthering the construction	17	ECF 60-1, Page 406. This is that summary exhibit that was
18	would add value to the project.	18	admitted.
	· ·	l	BY MR. HUSHKA:
19	MR. VERSTANDIG: Thank you, Your Honor. Nothing	19	
20	further for this witness.	20	Q While she's getting that pulled up, Mr. Gehrtz, do you
21	THE COURT: Mr. Feist, do you have any questions?	21	recall being asked questions regarding ceiling fans from Mr.
22	MR. FEIST: No, I do not. Thank you.	22	VerStandig?
23	THE COURT: Is there anybody else on the video	23	A Yes.
24	conference that is not appearing right now, that you have	24	Q And specifically was asked that you only noted it as 95
25	your video conference equipment off? Okay. All right. I	25	percent completed even though it may have been a hundred

REDIRECT EXAMINATION OF MATTHEW GEHRTZ BY MR. HUSHKA: Q Mr. Gehrtz, one thing I want to clear up to make sure I am understanding it correctly. Mr. VerStandig asked you about various assumptions you made versus the completed plans and everything of that nature. And I just wanted to	3 4 5 6 7 8 9 10 11 12	percent completed. Is that an accurate summary? A Yes. Q Do you recall and we'll get this pulled up. Did you have any costs associated with completing ceiling fan construction in this summary? A No. Q Even though you had it down as 95 percent complete and allowing for a punch list five percent, you didn't associate any cost with that five percent? A Correct. Q The estimates that you did provide in here are your opinions as to cost to completion, when was this provided
2 3 4 5 6 7 8 9 10 11 12 13	only permit those parties that appear by video conference or in-person to offer evidence or cross-exam. There are no other parties indicating a wishing to ask questions or eligible to ask questions, so I'm going to go back to redirect. Mr. Hushka? MR. HUSHKA: Thank you, Your Honor. 1	Q Is that why you didn't talk to any of the	1	believe for some of the various things she will testify to.
2	subcontractors that had performed work?	2	THE COURT: Okay. So I'm going to look to Debtor.
3	A Correct.	3	Do you have a witness that you think could be taken out of
4	Q As for the subcontractors that did perform work on this	4	order. Or if you would prefer to, you can definitely follow
5	project this is a continued hearing. So earlier on Mr.	5	the order that you want to, just like Red River State Bank
6	Craig had testified that he brought in subcontractors from	6	is. And then do you have an opinion about whether you think
7	out of town and had essentially stacked them to work on this	7	it would be helpful to just begin with that witness knowing
8	project and the other two projects.	8	that we have to have a cutoff somewhere between 1:30 and
9	MR. HUSHKA: Mr. VerStandig, you can object if you	9	1:45? So what are your thoughts about that? About the
10	believe I'm mischaracterizing that.	10	logistics of the remaining hearing. Go ahead.
11	BY MR. HUSHKA:	11	MR. VERSTANDIG: Yeah. With the witness out of
12	Q But if crews were brought in from outside the Watertown	12	order, I think the answer is twofold, but not helpful.
13	region, do you believe that your knowledge and your general	13	While it's probably theoretically doable, we also didn't
14	experience and the quotes that you used are applicable if	14	expect any of our witnesses were going to testify today. So
15	the crews that performed work on this were brought in from	15	they are not exactly here and ready. So I think one happens
16	outside the region?	16	to be watching on Zoom, but that's not something that we're
17	A I do.	17	really prepared to launch into at the moment.
18	Q And do you have any trepidations or reservations or	18	I will say generally I don't think any of our
19	concerns as we sit here today about the accuracy of the	19	witnesses, with the possible exception of Mr. Craig are
20	projections and opinions that you provided?	20	going to be overly loquacious. I expect it will be a
21	A No, I don't.	21	relatively brief presentation. There may be a number of
22	MR. HUSHKA: Nothing further, Your Honor.	22	them, but they will be short and punchy on Tuesday.
23	THE COURT: Recross?	23	I can certainly respect and appreciate that the
24	MR. VERSTANDIG: None, Your Honor.	24	bank doesn't want someone on the stand for five days knowing
25	THE COURT: On behalf of Watertown Development	25	that would limit their ability to communicate with them
_			
	Page 179		Page 181
1	Page 179 anything further?	1	Page 181 during the recess. I'm also indifferent to that. Obviously

2 3 4 5 6 7	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I	2 3 4 5 6 7	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? THE COURT: So is it the bank's preference to just wait until Tuesday to begin? Am I understanding?
2 3 4 5 6 7 8	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I believe is going to be much longer than the one hour that we	2 3 4 5 6 7 8	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? THE COURT: So is it the bank's preference to just wait until Tuesday to begin? Am I understanding? MR. HUSHKA: I believe it would be, Your Honor.
2 3 4 5 6 7 8	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I believe is going to be much longer than the one hour that we have today. So I don't know if the Court would want to keep	2 3 4 5 6 7 8 9	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? THE COURT: So is it the bank's preference to just wait until Tuesday to begin? Am I understanding? MR. HUSHKA: I believe it would be, Your Honor. THE COURT: Okay. So I'm hearing lots of
2 3 4 5 6 7 8 9	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I believe is going to be much longer than the one hour that we have today. So I don't know if the Court would want to keep him on the stand for the five days or if we want to just	2 3 4 5 6 7 8 9	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? THE COURT: So is it the bank's preference to just wait until Tuesday to begin? Am I understanding? MR. HUSHKA: I believe it would be, Your Honor. THE COURT: Okay. So I'm hearing lots of witnesses left. Are we going to be able to finish on
2 3 4 5 6 7 8 9 10	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I believe is going to be much longer than the one hour that we have today. So I don't know if the Court would want to keep him on the stand for the five days or if we want to just call him on Tuesday, or how the Court wants to proceed.	2 3 4 5 6 7 8 9 10	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? THE COURT: So is it the bank's preference to just wait until Tuesday to begin? Am I understanding? MR. HUSHKA: I believe it would be, Your Honor. THE COURT: Okay. So I'm hearing lots of witnesses left. Are we going to be able to finish on Tuesday?
2 3 4 5 6 7 8 9 10 11 12	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I believe is going to be much longer than the one hour that we have today. So I don't know if the Court would want to keep him on the stand for the five days or if we want to just call him on Tuesday, or how the Court wants to proceed. Also obviously wanting to maximize times that we can	2 3 4 5 6 7 8 9 10 11 12	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? THE COURT: So is it the bank's preference to just wait until Tuesday to begin? Am I understanding? MR. HUSHKA: I believe it would be, Your Honor. THE COURT: Okay. So I'm hearing lots of witnesses left. Are we going to be able to finish on Tuesday? MR. HUSHKA: I believe Mr. Luther may be a similar
2 3 4 5 6 7 8 9 10 11 12 13	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I believe is going to be much longer than the one hour that we have today. So I don't know if the Court would want to keep him on the stand for the five days or if we want to just call him on Tuesday, or how the Court wants to proceed. Also obviously wanting to maximize times that we can hopefully wrap this up next week as well. So I don't I'd	2 3 4 5 6 7 8 9 10 11 12 13	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? THE COURT: So is it the bank's preference to just wait until Tuesday to begin? Am I understanding? MR. HUSHKA: I believe it would be, Your Honor. THE COURT: Okay. So I'm hearing lots of witnesses left. Are we going to be able to finish on Tuesday? MR. HUSHKA: I believe Mr. Luther may be a similar timeframe to what Mr. Gehrtz was today. Again, not knowing
2 3 4 5 6 7 8 9 10 11 12 13 14	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I believe is going to be much longer than the one hour that we have today. So I don't know if the Court would want to keep him on the stand for the five days or if we want to just call him on Tuesday, or how the Court wants to proceed. Also obviously wanting to maximize times that we can hopefully wrap this up next week as well. So I don't I'd defer to the Court to how it wants to handle this	2 3 4 5 6 7 8 9 10 11 12 13 14	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? THE COURT: So is it the bank's preference to just wait until Tuesday to begin? Am I understanding? MR. HUSHKA: I believe it would be, Your Honor. THE COURT: Okay. So I'm hearing lots of witnesses left. Are we going to be able to finish on Tuesday? MR. HUSHKA: I believe Mr. Luther may be a similar timeframe to what Mr. Gehrtz was today. Again, not knowing what the cross would be from the other side, I believe my
2 3 4 5 6 7 8 9 10 11 12 13 14 15	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I believe is going to be much longer than the one hour that we have today. So I don't know if the Court would want to keep him on the stand for the five days or if we want to just call him on Tuesday, or how the Court wants to proceed. Also obviously wanting to maximize times that we can hopefully wrap this up next week as well. So I don't I'd defer to the Court to how it wants to handle this logistically.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? THE COURT: So is it the bank's preference to just wait until Tuesday to begin? Am I understanding? MR. HUSHKA: I believe it would be, Your Honor. THE COURT: Okay. So I'm hearing lots of witnesses left. Are we going to be able to finish on Tuesday? MR. HUSHKA: I believe Mr. Luther may be a similar timeframe to what Mr. Gehrtz was today. Again, not knowing what the cross would be from the other side, I believe my outline for his direct is slightly shorter length, but a
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	anything further? MR. FEIST: No, thank you. THE COURT: Okay. Then you may be excused. MR. HUSHKA: Your Honor, procedurally I'm going to defer to the court on how it wants to proceed. Our next witness would be Mr. Josh Luther would be another expert, would be our appraisal expert. Obviously, his testimony I believe is going to be much longer than the one hour that we have today. So I don't know if the Court would want to keep him on the stand for the five days or if we want to just call him on Tuesday, or how the Court wants to proceed. Also obviously wanting to maximize times that we can hopefully wrap this up next week as well. So I don't I'd defer to the Court to how it wants to handle this logistically. THE COURT: So can you tell me if you are asking -	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	during the recess. I'm also indifferent to that. Obviously if they want to put them up, that's fine by me and I'm happy to cross them on Tuesdays. But there may be better flow to having a two-minute recess between direct and cross as opposed to 24 times what is it, 120 hours? 1	again, I don't know again, we haven't made any decision	1	Erica, there is no reason I'm supposed to come out on
2	as to Mr. Craig. I think it will depend on what comes in	2	Monday at the moment, but I'm sure I could rejigger that to
3	with those other two. And then I don't know what Mr.	3	Sunday.
4	VerStandig believes is necessary or not for him.	4	MS. TANABE: My co-counsel just reminded me that
5	MR. VERSTANDIG: So, Your Honor, from our side,	5	we do have court in another case on Monday. So we can
6	whether we try to synergistically do it through cross or do	6	definitely be here on Tuesday and Wednesday, but not Monday.
7	it as direct, Mr. Craig is going to take the stand. In	7	THE COURT: Okay. Court in different different
8	terms of our other witnesses and I'm pulling up the list	8	court, not this court?
9	as we speak it is more likely than not that Barry Matson	9	MR. HUSHKA: Southern District in New York.
10	and Jason Biggins will each testify, but I don't think	10	MS. TANABE: Yes.
11	either of them are going to be very long. And I think my	11	MR. HUSHKA: On Monday morning. And then I
12	direct will probably be well under half an hour for each of	12	believe we do have the status conference in Hartford and CCU
13	them.	13	and Promark at 2:30 on my calendar at least.
14	Ms. Craig may retake the stand. But similarly,	14	THE COURT: Yeah. That's yeah. So the morning
15	whether it's Ms. Cathcart or myself, I would anticipate	15	is out you're telling me, right? Because I yeah, the
16	that's 10 to 20 minutes. And then obviously we're going to	16	morning is out. And so the afternoon I did schedule some
17	use the weekend to assess strategy. But the other people on	17	hearings, which could take not that much time. But I don't
18	our list would be similar duration. And that's without	18	know. If we wanted to start in the afternoon and carry it
19	cross. And I don't know how much time the bank would take	19	over, we could do that. When did I schedule them? Are they
20	there. I think Tuesday is certainly going to be a day. And	20	at 2:00 or okay. So in theory we could do 3:00 to 5:00.
21	I recognize, or at least I hope that no one is going to	21	Does your flight get you in here by then?
22	suggest Wednesday morning as the extension of Tuesday.	22	MR. VERSTANDIG: I'm actually scheduled to land a
23	THE COURT: Well, that was my next question. I	23	hair after a hair before 2:00 p.m. at the moment. So if
24	don't remember where the parties were, but I was highly	24	planes land on time, I'll be there Monday anyway without
25	reluctant to use Wednesday. And I assume that means that	25	rejiggering travel.

And we can inform the Court ASAP if he would not be available for some reason. THE COURT: Oh, is he on video? Do you want to ask him? MR. LUTHER: Yes, I am available. Sorry. THE COURT: Oh, great. Well, that worked out handy. All right. I mean, I think getting two hours in on direct might be a great idea. MR. HUSHKA: I agree. I think that if nothing else, we could find a good stopping spot. And one day overnight I am a lot more comfortable with than six days between now and Tuesday. THE COURT: Me too. And then it's important that I remember what's already been testified to. So that's a great help, to do it on Monday afternoon rather than now. Okay. So we'll resume then on Monday. If you're not

1	open. You know what? I have some flexibility the following	1	THE COURT: Not yet.			
2	week which we can visit about late on Tuesday if it looks	2	MR. VERSTANDIG: Yeah. We're going to file an			
3	like it's not going to happen. Do you want to preview that	3	amended disclosure statement to go with the new plan. We			
4	for me or do we want to just wait and hope that Tuesday is	4	don't plan to proceed on that.			
5	going to work?	5	THE COURT: Okay.			
6	MR. VERSTANDIG: Your Honor, if it's going to be	6	MS. TANABE: What time would you like us here on			
7	the following week, there would be a strong preference for	7	Tuesday the 25th?			
8	it to be Monday. I'm looking. I have a non-essential and	8	THE COURT: I don't have anything in the morning.			
9	certainly re-schedulable medical appointment on Tuesday.	9	Do we start at 8:30 again? That was early.			
10	And then I don't know if anyone else is headed to winter	10	MS. TANABE: 8:30 is good.			
11	leadership, but that's Wednesday, Thursday, Friday.	11	THE COURT: Yeah. No, I'm not yeah. 8:30 was			
12	THE COURT: So it looks like I have Monday, right?	12	early. 8:30 is great for Tuesday. 3:00 for Monday.			
13	What is that on there? Okay, great. Monday. I have Monday	13	As to the disclosure statement, there have been			
14	the is it the first of December? Yeah. So we can do our	14	cases where amended disclosure statements are filed and no			
15	best on Tuesday.	15	party objects to the fact that there has been sufficient			
16	MR. VERSTANDIG: Your Honor, for this coming	16	notice. But the parties here anticipate that would be a			
17	Monday if there is an issue with my flight and it's not	17	problem and you would need to serve it from the beginning			
18	going to be on time, may I appear via video again from	18	ant notice it for 28 days. Is that your understanding?			
19	presumably a hotel in Chicago or wherever it may be without	19	MR. VERSTANDIG: Your Honor, transparently, we'd			
20	filing a motion?	20	love to go forward with it on Tuesday. We'd love to argue			
21	THE COURT: Yes, you may.	21	that it's not such a material amendment as to be an issue.			
22	MR. VERSTANDIG: Thank you.	22	But we've added a plan trustee. I don't know that I'm going			
23	THE COURT: Yes. Okay. I think we have the	23	to win that argument in good faith. And I think adding a			
24	logistics. We are going to start Monday at 3:00. I may	24	plan trustee probably does require us giving the postal			
25	touch base with the security officers to see if we can stay	25	service some more money.			
	Page 187		Page 189			
1	until 6:00. Is that going to impose any yeah, that will	1	THE COURT: Okay. And you don't disagree, Red			
2	be a problem? If it is, it is. I get the	2	River State Bank?			
3	MR. HUSHKA: I would have to confirm with my wife	3	MS. TANABE: Correct.			
4	that she can do daycare pickup. But if she can, it's not a	4	THE COURT: Okay. All right. So then I'm going			
5	problem. But I don't know that as we sit here.	5	to anticipate that that will not go forward if I see an			
6	THE COURT: Okay. So I will reserve. I	6	amended disclosure statement. So we'll cross that bridge in			
7	completely understand those restrictions and obligations.	7	terms of when that next hearing will be on another day. So			
8	So we'll shoot for wrapping up by 5:00 unless there is some	8	that should leave most of the day on Tuesday for sure.			
9	opportunity extend. It wouldn't be any later than 6:00 I	9	MS. TANABE: And then just to clarify, we could			
10	know because the building closes. And they'll get really	10	potentially spill over into the 26th, or did you want us to			
11	angry with me. And then most of the Tuesday I at this time	11	not go forward			
12	have one hearing in South Dakota that I know is going to go	12	THE COURT: I would really like you to not.			
13	away. But that would be like a five-minute hearing. Oh, I	13	MS. TANABE: Okay.			
14	might have to move another one, too. I've got another	14	THE COURT: I think if Monday the 1st is			
15	Minnesota hearing. I'll do my best to clear it so we can	15	available, I think we should not proceed on the 26th.			
16	proceed.	16	If it happens to be a circumstance we're on the			
17	All right. Any other concerns about conflicts? I	17	last witness and we have a half hour of testimony or some			
1	Till right. Tilly other concerns about confinets. T		roully unusual aircumstance like that I would consider it			
18	didn't ask you, Mr. Feist. Are you available Monday	18	really unusual circumstance like that, I would consider it.			
18 19		18 19	But I'm going to try to avoid it in the interest of the			
	didn't ask you, Mr. Feist. Are you available Monday afternoon, all day Tuesday? MR. FEIST: Yes, I am. Thank you.		But I'm going to try to avoid it in the interest of the sanity of all people participating. Okay. Anything			
19 20 21	didn't ask you, Mr. Feist. Are you available Monday afternoon, all day Tuesday? MR. FEIST: Yes, I am. Thank you. THE COURT: Okay. Great. All right.	19 20 21	But I'm going to try to avoid it in the interest of the			
19 20 21 22	didn't ask you, Mr. Feist. Are you available Monday afternoon, all day Tuesday? MR. FEIST: Yes, I am. Thank you. THE COURT: Okay. Great. All right. MS.
